Advances in Corrosion Control of Magnesium and its Alloys Viswanathan S. Saji, 2023-08-22 Magnesium (Mg) and its alloys have received widespread acceptance in automobile industries and biomedical applications with substantial recent advancements made in their development, however a significant limitation remains their poor aqueous and galvanic corrosion resistance. This book covers both the fundamentals and recent advancements in two major corrosion protection strategies of magnesium and its alloys, namely, metal-matrix composites and protective coatings. Key features: Covers all aspects of metal-matrix composites and protective coatings for magnesium alloys to improve their corrosion resistance, wear resistance, mechanical properties and biocompatibility Provides the most recent research advancements in the corrosion mitigation strategies of magnesium and its alloys Complete with case studies specific to practical applications, this book serves as a ready reference for graduate students, researchers, engineers and industry professionals in the fields of materials, corrosion science, biofouling and protective coatings.

Conversion Coatings for Magnesium and its Alloys Viswanathan S. Saji, T. S. N. Sankara Narayanan, Xiaobo Chen, 2022-02-01 This book covers fundamentals and recent advancements on conversion coatings for magnesium and its alloys. The

contents are presented in two sections, respectively dealing with chemical and electrochemical conversion coatings. The chemical conversion coating section is further subdivided into inorganic conversion coatings, organic conversion coatings and advanced approaches/coatings. The section on electrochemical conversion coatings spans from fundamentals to state-of-the-art progress on electrochemical anodization and plasma electrolytic oxidation of magnesium and its alloys.

Convergence of Blockchain Technology and E-Business D. Sumathi,T.

Poongodi,Balamurugan Balusamy,Bansal Himani,Firoz Khan K P,2021-07-08 The purpose of this edited book is to provide the relevant technologies and case studies in a concise format that will simplify and streamline the processing of blockchain. The goal is for the contents of this book to change the way business transformations are conducting in economic and social systems. The book examines blockchain technology, the transaction attributes, and its footprint in various fields. It offers fundamentals and terminologies used in blockchain, architecture, and various consensus mechanisms that can be deployed in areas such as healthcare, smart cities, and supply chain management. The book provides a widespread knowledge into the deployment of security countermeasures that can be implemented for a blockchain network and enables the reader to consider the management of business processes and the implementation process in detail. The book highlights the challenges and provides various e-business case studies of security countermeasures. The

book serves researchers and businesses by providing a thorough understanding of the transformation process using blockchain technology.

Corrosion and Protection of Magnesium Alloys Liang Wu,Xiao-Bo Chen,Yingwei Song,2023-02-16 Magnesium (Mg) alloys, possessing good thermal and electrical conductivity, low density, recyclability, high specific strength, and excellent damping capacity, are regarded as one of the most promising light metallic materials. Mg alloys are also known as the “inexhaustible green light engineering material” compared with steel, aluminum, copper, and engineering plastics, providing some important applications in communications, automotive, defense, aerospace, and biomedical industries. However, the low electrode potential causes poor corrosion resistance in the environment of moist air, sulfur, and marine atmosphere. And thus, the corrosion and protection technology of Mg and its alloys is listed as an important research topic in this field. In this Research Topic, the latest research papers on corrosion and protection of Mg and its alloys are collected to provide a platform for researchers and readers to understand the recent developments in this field. Good use of this platform could improve the international research level in corrosion and protection of Mg and its alloys and promote the “green, safe, life-extending and smart” anti-corrosion technology and expand the application range of Mg and its alloys. High-quality Original Research and Review articles in this field are all welcome for submission to this Research Topic. Research interests include but are not

limited to the following areas: • Corrosion behaviors and mechanisms • Surface treatment technology • Biodegradable medical applications • High-temperature oxidation • Inhibitors for Mg and its alloys • New monitoring, evaluation, simulation, and prediction methods

High Plasticity Magnesium Alloys Fusheng Pan, Bin Jiang, Jingfeng Wang, Yaobo Hu, Suqin Luo, 2022-01-21 *High Plasticity Magnesium Alloys* focuses on the microstructure, mechanical properties and processing methods of magnesium alloy materials. The title offers theory and methods on high-plasticity magnesium alloys, including phase diagram construction, alloying and deformation. Four typical high-plasticity magnesium alloys are discussed through thermodynamic phase diagram construction and the characterization of their microstructure, mechanical properties and texture at as-cast, extruded, rolled and heat-treated states. Chapters update principle calculations for the effects of alloying elements, Mg-Gd-Zr medium strength and high-plasticity alloys, medium strength and high-plasticity Mg-Mn based alloys, medium strength and high-plasticity Mg-Sn based alloys, and Mg-Gd-Y-Zn-Mn high-strength and high-plasticity magnesium alloys. This book presents the plasticity of magnesium alloys, and guides the design and development of new high-strength and high-plasticity magnesium alloys. It provides detailed solutions for practicing industrial engineers. Presents in-depth theory and research methods on high-plasticity magnesium alloys Considers the microstructure, mechanical properties and processing methods of high-

performance magnesium alloys Shows the first principles needed to calculate the effects of various alloying elements Introduces the development of magnesium alloys with relatively high plasticity Characterizes the plasticity of polycrystalline metallic materials Provides detailed solutions for industrial engineers who need to use high-performance magnesium alloys

Zhou Zuoren and an Alternative Chinese Response to Modernity Susan Daruvala, 2000 This book explores nation and modernity in China by focusing on the work of Zhou Zuoren (1885-1967). Through his literary and aesthetic practice as an essayist, Zhou espoused a way of constructing the individual and affirming the individual's importance in opposition to the normative national subject of most May Fourth reformers.

Decision-making in Deng's China Carol Lee Hamrin, Suisheng Zhao, A. Doak Barnett, 2019-07-23 Considers the politics of central decision-making by focusing on senior policy makers and implementing bureaucracies on the one hand, and actors in economic and non-economic arenas on the other. The contributors held significant party and government positions in China up to 1989.

Cultural Revolution and Revolutionary Culture Alessandro Russo, 2020-08-28 In *Cultural Revolution and Revolutionary Culture*, Alessandro Russo presents a dramatic new reading of China's Cultural Revolution as a mass political experiment aimed at thoroughly reexamining the tenets of communism. Russo

explores four critical phases of the Cultural Revolution, each with its own reworking of communist political subjectivity: the historical-theatrical “prologue” of 1965; Mao's attempts to shape the Cultural Revolution in 1965 and 1966; the movements and organizing between 1966 and 1968 and the factional divides that ended them; and the mass study campaigns from 1973 to 1976 and the unfinished attempt to evaluate the inadequacies of the political decade that brought the Revolution to a close. Among other topics, Russo shows how the dispute around the play *Hai Rui Dismissed from Office* was not the result of a Maoist conspiracy, but rather a series of intense and unresolved political and intellectual controversies. He also examines the Shanghai January Storm and the problematic foundation of the short-lived Shanghai Commune. By exploring these and other political-cultural moments of Chinese confrontations with communist principles, Russo overturns conventional wisdom about the Cultural Revolution.

Rebellion and Factionalism in a Chinese Province Keith Forster, 2019-07-26 A detailed case study of provincial politics during the decade-long Cultural Revolution, which analyzes the form and changing nature of mass organizations established in China by 1966. The text traces their evolution, activities and ultimate dissolution ten years later.

Revolutionary Cycles in Chinese Cinema, 1951–1979 Z. Wang, 2014-07-17 A comprehensive history of how the conflicts and balances of power in the

Maoist revolutionary campaigns from 1951 to 1979 complicated and diversified the meanings of films, this book offers a discursive study of the development of early PRC cinema.

Turbulent Decade Jiaqi Yan, Gao Gao, 1996-01-01 The Great Proletarian Cultural Revolution occurred in the second decade after Mao Zedong and his comrades came to power in 1949. A comprehensive narrative account of this colossal event, written by Yan Jiaqi, one of the principal leaders of China's pro-democracy movement, and his wife, Gao Gao, a noted sociologist, appeared in Hong Kong in 1986 and was quickly banned by the Communist government. Not surprisingly, censorship and restricted circulation in China resulted in underground reproduction and serialization. The work was thus widely read, coveted, and appreciated by a populace who had just freed itself from the cultural drought and political dread of the event. Yan and Gao later spent two years revising and expanding their work. The present volume, *Turbulent Decade: A History of the Cultural Revolution*, is based on the revised edition and has been masterfully edited and translated by D. W. Y. Kwok in consultation with the authors. Following Professor Kwok's eloquent introduction and a short foreword in which the authors analyze the basic causes of the Cultural Revolution, Part One of the narrative focuses on the years 1965-1967. In two short years, Mao managed to turn public opinion against Liu Shaoqi, president of the Republic, and launch the Cultural Revolution. The reader is introduced to the Red Guards and encounters the

cult of personality, the first resistance to the Cultural Revolution, the attack on Zhou Enlai, and the persecution and death of Liu Shaoqi. Part Two examines the rise and fall of Lin Biao during the years 1959-1971. Lin's bid for power, which began with the consolidation of his personal clique in the army and mass-level persecution in the late stages of the Cultural Revolution, ended in a failed coup and his death in an air crash. Part Three follows Jiang Qing from 1966 to her arrest in 1976 for her part in instigating mass violence and the persecution of key figures, including Zhou Enlai. During this period, the political fortunes of Deng Xiaoping rose and fell for a second time, the first protest at Tiananmen Square in 1976 ended in a bloody suppression, and that same year the Gang of Four were arrested. Unlike social scientific treatments of political phenomena, Turbulent Decade includes little discussion of economics, still less of international relations, and no institutional analysis. Instead, the authors' fervent belief in the truthful telling of history through its leading personalities pervades the work.

The World Turned Upside Down Yang Jisheng, 2021-01-19 Yang Jisheng's *The World Turned Upside Down* is the definitive history of the Cultural Revolution, in withering and heartbreaking detail. As a major political event and a crucial turning point in the history of the People's Republic of China, the Great Proletarian Cultural Revolution (1966–1976) marked the zenith as well as the nadir of Mao Zedong's ultra-leftist politics. Reacting in part to

the Soviet Union's revisionism that he regarded as a threat to the future of socialism, Mao mobilized the masses in a battle against what he called bourgeois forces within the Chinese Communist Party (CCP). This ten-year-long class struggle on a massive scale devastated traditional Chinese culture as well as the nation's economy. Following his groundbreaking and award-winning history of the Great Famine, Tombstone, Yang Jisheng here presents the only history of the Cultural Revolution by an independent scholar based in mainland China, and makes a crucial contribution to understanding those years' lasting influence today. The World Turned Upside Down puts every political incident, major and minor, of those ten years under extraordinary and withering scrutiny, and arrives in English at a moment when contemporary Chinese governance is leaning once more toward a highly centralized power structure and Mao-style cult of personality.

An Aesthetics Anthology ZONG Baihua, 2023-03-20 This book is a collection of insightful writings on aesthetics and Chinese and Western art by ZONG Baihua, one of the most esteemed scholars of aesthetics in China. The 22 essays in the book dive deep into a variety of topics, including the aesthetic theory and aesthetic thoughts in ancient China and the West, history of Chinese art, Western classical art, and art theory, as well as Chinese poetics. The book explores different types of art in the Chinese and Western culture, ranging from the painting, Chinese calligraphy, sculpture, ancient architecture, and music to Chinese classic and modern poetry. Taking a comparative approach,

the author expounds on the key elements of traditional Chinese aesthetic thinking and artistic conception and also elucidates the art theory in ancient Greek and Kant's aesthetics. Presented in an engaging way and written in poetic prose, this title will be a must-read for both academic and general readers interested in aesthetics, Chinese ancient art, and art theory.

Making Religion, Making the State Yoshiko Ashiwa, David L. Wank, 2009 This volume combines the perspective of religion as a constructed category of modernity with the analytic focus and empirical grounding of institutional social science to develop a new approach to the study of state and religion in modern and contemporary China.

Mao's Last Revolution Roderick MACFARQUHAR, Michael Schoenhals, 2009-06-30 Explains why Mao launched the Cultural Revolution, and shows his Machiavellian role in masterminding it. This book documents the Hobbesian state that ensued. Power struggles raged among Lin Biao, Zhou Enlai, Deng Xiaoping, and Jiang Qing - Mao's wife and leader of the Gang of Four - while Mao often played one against the other.

Wenhui Yao Book Review: Unveiling the Magic of Language

In a digital era where connections and knowledge reign supreme, the enchanting power of language has become more apparent than ever. Its capability to stir emotions, provoke thought, and instigate transformation is actually remarkable. This extraordinary book, aptly titled "**Wenhui Yao**," compiled by a highly acclaimed author, immerses readers in a captivating exploration of the significance of language and its profound impact on our existence. Throughout this critique, we shall delve to the book's central themes, evaluate its unique writing style, and assess its overall influence on its readership.
