**John Henry and His People** John Garst, 2021-12-28 The song John Henry, perhaps America's greatest folk ballad, is about an African-American steel driver who raced and beat a steam drill, dying with his hammer in his hand from the effort. Most singers and historians believe John Henry was a real person, not a fictitious one, and that his story took place in West Virginia--though other places have been proposed. John Garst argues convincingly that it took place near Dunnavant, Alabama, in 1887. The author's reconstruction, based on contemporaneous evidence and subsequent research, uncovers a fascinating story that supports the Dunnavant location and provides new insights. Beyond John Henry, readers will discover the lives and work of his people: Black and white singers; his captain, contractor Frederick Dabney; C. C. Spencer, the most credible eyewitness; John Henry's wife; the blind singer W. T. Blankenship, who printed the first broadside of the ballad; and later scholars who studied John Henry. The book includes analyses of the song's numerous iterations, several previously unpublished illustrations and a foreword by folklorist Art Rosenbaum.

**Human Values and the Design of Computer Technology** Batya Friedman, 1997-12-13 Human values--including accountability, privacy, autonomy, and respect for person--emerge from the computer systems that we build and how we choose to use them. Yet, important questions on human values and

system design have remained largely unexplored. If human values are controversial, then on what basis do some values override others in the design of, for example, hardware, algorithms, and databases? Do users interact with computer systems as social actors? If so, should designers of computer persona and agents seek to build on such human tendencies, or check them? How have design decisions in hospitals, research labs, and computer corporations protected or degraded such values? This volume brings together leading researchers and system designers who take up these questions, and more.
