*An Introduction to Pharmacovigilance* Patrick Waller,Mira Harrison-Woolrych,2017-02-14 Pharmacovigilance is the science and activities relating to the detection, assessment, understanding and prevention of adverse effects or any other drug-related problems. This introductory guide is designed to aid the rapid understanding of the key principles of pharmacovigilance. Packed full of examples illustrating drug safety issues it not only covers the processes involved, but the regulatory aspects and ethical and societal considerations of pharmacovigilance. Covering the basics step-by-step, this book is perfect for beginners and is essential reading for those new to drug safety departments and pharmaceutical medicine students. The second edition is thoroughly revised and updated throughout and includes a new chapter on clinical aspects of pharmacovigilance.

*Medicines For Women* Mira Harrison-Woolrych,2015-01-28 In this definitive new text, the major medicines, devices and vaccines used by women worldwide are brought together for the first time in a single volume. Written and edited by international experts with an evidence-based approach, the book offers a comprehensive summary of all the key areas of women's medicines. In the first part, issues relating to female drug exposure and considerations for prescribing for subgroups of women - for example during pregnancy and lactation - are presented in the context of contemporary clinical practice. In the second part, specific groups of pharmaceutical products are reviewed, including oral contraceptives, emergency contraception, treatment of chronic pelvic pain, hormone replacement therapy, bisphosphonates, herbal medicines for women, contraceptive devices and human papilloma virus (HPV) vaccines. Every chapter reviews and summarises the efficacy and safety of each group of products and concludes with a useful set of clinical take home messages. In the third part, broader perspectives are presented - from a primary care overview of prescribing for women, through to regulatory, political and religious aspects, including issues with women's medicines in developing countries. The final two chapters focus on risk communication and conclude that women themselves should be placed at the centre of all discussions about their medicines. The book is aimed at prescribers, other healthcare professionals and students in the field of women's health throughout the world. It is an extremely valuable resource for all in clinical practice, for students of medicine, nursing, pharmacy and related sciences, and also for those in medicines regulation, pharmacovigilance and the pharmaceutical industry.

What she really wishes she could have is a torrid love affair with no strings attached—with someone like Oliver, the sinfully gorgeous struggling writer who regularly comes to her cafe at night to work on his stories. So when Oliver accidentally leaves behind his work in the cafe one night Rachel can't resist the temptation to read the story, and learns he's been secretly writing an erotic novel. Aroused by his inventive prose, Rachel offers to help Oliver with his story by acting it out with him. But what happens when she discovers that it was she who inspired Oliver's stimulating story?

*Practical Approaches to Risk Minimisation for Medicinal Products* World Health Organization,2014 Risk management of medicines is a wide and rapidly evolving concept and practice, following a medicine throughout its lifecycle, from first administration in humans through clinical studies and then marketing in the patient population at large. Previous reports from CIOMS I - VIII provided practical guidance in some essential components of risk management such as terminology and reporting of adverse drug reactions, management of safety information from clinical trials, and safety signal detection. Beyond the detection, identification, and characterization of risk, risk minimization is used as an umbrella term for the prevention or mitigation of an undesirable outcome. Risk management always includes tools for routine risk minimization such as product information, the format depending on the jurisdiction, to inform the patient and the prescriber, all of which serve to prevent or mitigate adverse effects. Until this current CIOMS IX document, limited guidance has been available on how to determine which risks need additional risk minimization, select the appropriate tools, apply and implement such tools globally and locally, and measure if they are effective and valuable. Included in the report is a CIOMS framework for the evaluation of effectiveness of risk minimization, a discussion of future trends and developments, an annex specifically addressing vaccines, and examples from real life.

**Pharmacoepidemiology and Pharmacovigilance** Sabrina Nour,Gilles Plourde,2018-10-17 Pharmacoepidemiology and Pharmacovigilance: Synergistic Tools to Better Investigate Drug Safety examines the role of pharmacoepidemiologic studies in drug development and its use as a prevention tool in pharmacovigilance activities. The book introduces the various epidemiologic tools and study designs commonly used for the surveillance of drug-related adverse effects and reviews the strengths and weaknesses of each. Criticisms surrounding pharmacoepidemiologic research and issues that often interfere or complicate the conduct and interpretation of these studies are also explored. Case studies illustrate the passive and active surveillance of adverse drug reactions in clinical situations, covering important pharmacoepidemiologic concepts like health risk management and safety. The book helps pharmaceutical industry groups engaged in drug safety, clinical investigators, medical evaluators and those seeking regulatory approval enhance the safety of the drug development process for all patient populations. Describes the main prevention tools for the passive and active surveillance of adverse effects associated with drugs Provides examples of diseases in various contexts related to clinical studies and the analysis of adverse drug reactions Offers case studies that illustrate real-life clinical situations Discusses important concepts related to pharmacoepidemiology and pharmacovigilance

*William Carey* S. Pearce Carey,Peter Masters,2008-04-01 A beautifully produced biography of the 'father of modern missions'. Pearce Carey's compelling pages convey the very atmosphere of that extraordinary period of missionary advance. This life of Carey is structured around a series of remarkable events, always unplanned and unexpected, which opened the way to undreamed of achievements. Carey and his colleagues overcame

mountainous obstacles to become the most productive church planters and Bible translators of all time. No other work compares with this moving treatment.

*Charles W. Colson: A Life Redeemed* Jonathan Aitken,2010-06-23 He was Nixon’s hatchet man. A jailed felon. And now, one of the most significant Christian leaders of our time. Here is his life story. Charles Colson has become one of the most revered leaders of our time. His ministry outreach, Prison Fellowship, has swelled to 40,000 volunteers working in 100 countries. His Angel Tree Christmas program provides presents to more than half a million children of prison inmates every year. His daily radio broadcast, BreakPoint, airs daily on more than 1,000 radio outlets across the country. And his twenty books have sold more than five million copies in the U.S. But God had to work some mighty miracles to bring this unusual servant to this prominent place of service. After all, Colson was known as President Nixon’s “hatchet man.” His involvement in the Watergate conspiracy led him to prison-and then to a life-changing encounter with God. Now, noted author Jonathan Aitken has written the first biography that compellingly presents a first-rate understanding of the political, historical, and spiritual journeys of Charles W. Colson... a life redeemed.

**The Oxford Handbook of Medieval Latin Literature** Ralph Hexter,David Townsend,2012-01-20 The twenty-eight essays in this Handbook represent the best of current thinking in the study of Latin language and literature in the Middle Ages. The insights offered by the collective of authors not only illuminate the field of medieval Latin literature but shed new light on broader questions of literary history, cultural interaction, world literature, and language in history and society. The contributors to this volume--a collection of both senior scholars and gifted young thinkers--vividly illustrate the field's complexities on a wide range of topics through carefully chosen examples and challenges to settled answers of the past. At the same time, they suggest future possibilities for the necessarily provisional and open-ended work essential to the pursuit of medieval Latin studies. While advanced specialists will find much here to engage and at times to provoke them, this handbook successfully orients non-specialists and students to this thriving field of study. The overall approach of The Oxford Handbook of Medieval Latin Literature makes this volume an essential resource for students of the ancient world interested in the prolonged after-life of the classical period's cultural complexes, for medieval historians, for scholars of other medieval literary traditions, and for all those interested in delving more deeply into the fascinating more-than-millennium that forms the bridge between the ancient Mediterranean world and what we consider modernity.

*The Stories of Flying Officer "X"* H. E. Bates,1976

**Evidence Synthesis and Meta-analysis for Drug Safety** Council for International Organizations of Medical Sciences (CIOMS),Council for International Organizations of Medical Sciences. Working Group X,2016 At any point in the drug development process, systematic reviews and meta-analysis can provide important information to guide the future path of the development program and any actions that might be needed in the post-marketing setting. This report gives the rationale for why and when a meta-analysis should be considered, all in the context of regulatory decision-making, and the tasks, data collection, and analyses that need to be carried out to inform those decisions. There is increasing demand by decision-makers in health care, the bio-pharmaceutical industry, and society at large to have access to the best available evidence on benefits and risks of medicinal products. The best strategy will take an overview of all the evidence and where it is possible and sensible, combine the evidence and summarize the results. For efficacy, the outcomes generally use the same or very similar predefined events for each of the trials to be included. Most regulatory guidance and many Cochrane Collaboration reviews have usually given more attention to assessment of benefits, while issues around combining evidence on harms have not been as well-covered. However, the (inevitably) unplanned nature of the data on safety makes the process more difficult. Combining evidence on adverse events (AEs), where these were not the focus of the original studies, is more challenging than combining evidence on pre-specified benefits. This focus on AEs represents the main contribution of the current CIOMS X report. The goal of the CIOMS X report is to provide principles on appropriate application of meta-analysis in assessing safety of pharmaceutical products to inform regulatory decision-making. This report is about meta-analysis in this narrow area, but the present report should also provide conceptually helpful points to consider for a wider range of applications, such as vaccines, medical devices, veterinary medicines or even products that are combinations of medicinal products and medical devices. Although some of the content of this report describes highly technical statistical concepts and methods (in particular Chapter 4), the ambition of the working group has been to make it comprehensible to non-statisticians for its use in clinical epidemiology and regulatory science. To that end, Chapters 3 and 4, which contain the main technical statistical aspects of the appropriate design, analysis and reporting of a meta-analysis of safety data are followed by Chapter 5 with a thought process for evaluating the findings of a meta-analysis and how to communicate these.
