Teenagers, Sexual Health Information and the Digital Age Kerry

Mckellar,Elizabeth Sillence,2020-01-06 Teenagers, Sexual Health Information and the Digital Age examines the online resources available on teenagers, including games and digital interventions. In addition, it highlights current issues such as sexting and pornography. Information needs and provisions are examined, and existing sexual health interventions and digital interventions are discussed, gathering both teenagers' and sexual health professionals' views on these services. In addition to a review of the current literature on sexual health and teenagers, the book examines groups of teenagers, particularly those vulnerable to risky sex and asks what are the predictors of these behaviors and what can be done to address the behaviors. Finally, the book will also provide reflections and practical advice on the ethical issues associated with research in this context. Provides guidance on the ethical issues with research associated with this topic Covers both teenagers' information needs as well as their existing levels of knowledge Assesses how teenagers engage with, and evaluate, sexual health information Addresses the challenges inherent in the online environment, such as unreliable and misleading information

Younger Sara Gottfried,2017-03-07 NEW YORK TIMES BESTSELLER The New York Times bestselling author of *The Hormone Cure* and *The Hormone Reset Diet* shows every woman how to create a lifestyle that will help her look great, feel energized, and slow down the effects of aging. Feel destined for cellulite, saddle bags, and belly fat? Does your family come from a long line of Alzheimer's, cancer, or heart disease? Will nothing help your aging skin or declining libido or flagging energy? This book is for you. The body is magnificent but it doesn't come with a lifetime warranty, or an operating manual. You're the result of millions of years of evolution, but many of the adaptations that helped your ancestors survive are now working overtime to accelerate the aging process. The assumption here is that we are our genes and therefore trapped by the past. The good news is that your genetic code—the DNA sequence that is the biochemical basis of heredity—can play a minor role in the way you age. The scientific reality is that 90 percent of the signs of aging and disease are caused by lifestyle choices, not your genes. In other words, you have the capability to overcome and transform your genetic history and tendencies.

Harvard/MIT—trained physician Sara Gottfried, M.D. has created a revolutionary 7-week program that empowers us to make the critical choices necessary to not just look young, but also feel young. Dr. Gottfried identifies and builds this book around the five-key factors that lead to accelerated aging -the muscle factor, the brain factor, the hormone factor, the gut factor, and the toxic fat factor. The 7-week program addresses these factors and treats them in an accessible and highly practical protocol and is as follows: Feed—Week 1 Sleep—Week 2 Move—Week 3 Release—Week 4 Expose—Week 5 Soothe—Week 6 Think—Week 7 *Younger* increases not only your lifespan, but also your healthspan. Dr. Gottfried's program makes it possible to change the way you age, stay younger longer, and remain healthy and vibrant for all of your days.

Brain Body Diet Sara Gottfried,2019-03-05 The multiple New York Times bestselling author and Harvard-MIT educated women's health expert delivers a revolutionary 40-day program to reconnect the brain and body to prevent and reverse the myriad symptoms and diseases afflicting millions of women. Do you struggle to lose weight or to fall and stay asleep at night? Do you feel lethargic and a depressed? Do you endure irregularity or other

digestive problems? Do you want to feel better and happier and to maximize your health and longevity? Dr. Sara Gottfried has the answer. Your health problems, she reveals, are in your head—caused by a malfunction in the connection between your brain and your body. Brain health is a powerful indicator of overall health and well-being. While our thoughts can affect our physical health, what we do to our body also has a lasting impact on our brains. When you ignore your brain-body symptoms, you raise your risk of serious cognitive decline, which leads to chronic health problems. It's a vicious cycle, but it can be broken, Gottfried argues. In *Brain Body Diet* she shows how brain body health is the key to reversing a myriad of chronic symptoms—empowering you to live up to our potential and achieve the lasting health you desire. The relationship between the body and the brain is necessary to function at our best today and for the rest of our lives. Designed for the female brain—which is different from the male brain—her breakthrough protocol will help you lose weight, get off harmful prescription medications, boost energy and mental functioning, and alleviate depression and anxiety in less than six weeks. Filled with incredible success stories, the most up-to-date scientific research, and the rich insights that are the hallmarks of her previous bestsellers, *Brain Body Diet* will completely change the way you look at your life and help you achieve total body health.

The Window of Opportunity David James Purslove Barker, Renate L.

Bergmann, Pearay L. Ogra, 2008-01-01 There is no longer any doubt that the inherited genetic constitution of the individual has a large influence on the entire life cycle, from human fetal development and pre- and postnatal growth to subsequent health status. However, growing evidence suggests that this predisposition is not rigid, but that early genetic imprinting, caused by exposure to a diverse spectrum of nutrients, macromolecules, microbial agents and other cellular or soluble components present in the external environment, is also of importance. According to this concept of the developmental origins of adult diseases, intrauterine and early life events play an important role in the etiology of human diseases: there seems to exist a critical 'window of opportunity' in the human infant before and during pregnancy, and up to 24 months of age. Altered exposure to different environmental agents during this critical period may determine the nature of responses in the perinatal period, and the expression of specific disease states in later life. The papers presented in this publication thus focus on the impact of perinatal growth, nutrition, environmental microflora, and host immune responses on the outcome of health and disease in later life.

When Mother was a Little Girl Frances Stanton Brewster, 1901

Theorising Media and Practice Birgit Bräuchler, John Postill, 2010-11-30

Although practice theory has been a mainstay of social theory for nearly three decades, so far it has had very limited impact on media studies. This book draws on the work of practice theorists such as Wittgenstein, Foucault, Bourdieu, Barth and Schatzki and rethinks the study of media from the perspective of practice theory. Drawing on ethnographic case studies from places such as Zambia, India, Hong Kong, the United States, Britain, Norway and Denmark, the contributors address a number of important themes: media as practice; the interlinkage between media, culture and practice; the contextual study of media practices; and new practices of digital production. Collectively, these chapters make a strong case for the importance of theorising the relationship between media and practice and thereby adding practice theory as a new strand to the study of anthropology of media.

The Vulnerable Empowered Woman Tasha N. Dubriwny, 2012-11-14

The feminist women's health movement of the 1960s and 1970s is credited with creating significant changes in the healthcare industry and bringing women's health issues to public attention. Decades later, women's health issues are more visible than ever before, but that visibility is made possible by a process of depoliticization. *The Vulnerable Empowered Woman* assesses the state of women's healthcare today by analyzing popular media

representations—television, print newspapers, websites, advertisements, blogs, and memoirs—in order to understand the ways in which breast cancer, postpartum depression, and cervical cancer are discussed in American public life. From narratives about prophylactic mastectomies to young girls receiving a vaccine for sexually transmitted disease, the representations of women's health today form a single restrictive identity: the vulnerable empowered woman. This identity defuses feminist notions of collective empowerment and social change by drawing from both postfeminist and neoliberal ideologies. The woman is vulnerable because of her very femininity and is empowered not to change the world, but to choose from among a limited set of medical treatments. The media's depiction of the vulnerable empowered woman's relationship with biomedicine promotes traditional gender roles and affirms women's unquestioning reliance on medical science for empowerment. The book concludes with a call to repoliticize women's health through narratives that can help us imagine women—and their relationship to medicine—differently.

The Social Worlds of the Unborn D. Lupton, 2013-06-19 Human embryos and fetuses are highly public and contested figures. Their visual images appear across a wide range of forums. They have become commercial commodities as part of the IVF industry and are the focus of intense debates regarding concepts of personhood. This book discusses these issues, drawing on social and cultural theory and research.

The Enchantment Kristin Hannah, 2003-04 Emmaline Hatter was a beautiful, brilliant, and rich Wall Street financier in the nineteenth century until the crash of 1893 wiped her out completely. Desperate to recoup her losses, she joins Dr. Larence Digby in his search for the legendary lost city of Cibola, rumored to be rich in gold. Emmaline was used to getting her own way, but Larence was not about to give up control of his expedition to a woman. Somehow, in a world of enchantment, each would have to learn to believe -- to trust the other with their lives, their secrets, and their hearts . . .

Activism on the Web Veronica Barassi, 2015-05-22 Activism on the Web examines the everyday tensions that political activists face as they come to terms with the increasingly commercialized nature of web technologies and sheds light on an important, yet under-investigated, dimension of the relationship between contemporary forms of social protest

and internet technologies. Drawing on anthropological and ethnographic research amongst three very different political groups in the UK, Italy and Spain, the book argues that activists' everyday internet uses are largely defined by processes of negotiation with digital capitalism. These processes of negotiation are giving rise to a series of collective experiences, which are defined by the tension between activists' democratic needs on one side and the cultural processes reinforced by digital capitalism on the other. In looking at the encounter between activist cultures and digital capitalism, the book focuses in particular on the tension created by self-centered communication processes and networked-individualism, by corporate surveillance and data-mining, and by fast-capitalism and the temporality of immediacy. Activism on the Web suggests that if we want to understand how new technologies are affecting political participation and democratic processes, we should not focus on disruption and novelty, but we should instead explore the complex dialectics between digital discourses and digital practices; between the technical and the social; between the political economy of the web and its lived critique.

The Story of the Railway Children Paul Davies, Jane Hollowood, 1972 When their father is sent away to prison, three London children move to the country where they keep busy preventing accidents on the nearby railway, making many new friends, and generally learning a good deal about themselves.

Women and Dieting Culture Kandi M. Stinson, 2001 Commercial weight loss organizations have come under attack from feminist scholars for perpetuating the very social values that cause women to obsess about their weight. In *Women and Dieting Culture*, sociologist Kandi Stinson asks how these values are transmitted and how the women who join such organizations actually think about their bodies and weight loss. As part of her research, Stinson fully participated in a national, commercial weight-loss organization as a paying member. Her acute analysis and sensitive insider's portrayal vividly illustrate the central roles dieting and body image play in women's lives.

Reality TV Mark Andrejevic, 2004-09-08 Drawing on cultural theory and interviews with fans, cast members and producers, this book places the reality TV trend within a broader social context, tracing its relationship to the development of a digitally enhanced, surveillance-based interactive economy and to a savvy mistrust of mediated reality in general. Surveying several successful reality TV formats, the book links the rehabilitation of 'Big Brother' to the increasingly important economic role played by the work of being watched. The author enlists critical social theory to examine how the appeal of 'the real' is deployed as a pervasive but false promise of democratization.

Digital Labour and Karl Marx Christian Fuchs, 2014-01-03 How is labour changing in the age of computers, the Internet, and social media such as Facebook, Google, YouTube and Twitter? In *Digital Labour and Karl Marx*, Christian Fuchs attempts to answer that question, crafting a systematic critical theorisation of labour as performed in the capitalist ICT industry. Relying on a range of global case studies--from unpaid social media prosumers or Chinese hardware assemblers at Foxconn to miners in the Democratic Republic of Congo--Fuchs sheds light on the labour costs of digital media, examining the way ICT corporations exploit human labour and the impact of this exploitation on the lives, bodies, and minds of workers.

Deviant Bodies Jennifer Terry, Jacqueline L. Urla, 1995-12-22 ... the papers in *Deviant Bodies* reveal an ongoing Western preoccupation with the sources of identity and human character. -- *Times Literary Supplement* Highly recommended for cultural studies... -- *The Reader's Review* It would be useful for upper-level undergraduate and graduate courses in the sociology of the body, the history and sociology of science and medicine, and women's studies courses, particularly those exploring the feminist critiques of science and medicine. -- *Contemporary Sociology* ... a powerful deconstruction of the scientific gaze in configuring bodily deviance as a means of legitimating the social order within multiple historical and

social contexts.... the many excellent selections will make for compelling reading for students of medical anthropology and the history of science. American Anthropologist Deviant Bodies reveals that the normal, healthy body is a fiction of science. Modern life sciences, medicine, and the popular perceptions they create have not merely observed and reported, they have constructed bodies: the homosexual body, the HIV-infected body, the infertile body, the deaf body, the colonized body, and the criminal body.

What a Girl Wants? Diane Negra,2009-06-02 From domestic goddess to desperate housewife, What a Girl Wants? explores the importance and centrality of postfeminism in contemporary popular culture. Focusing on a diverse range of media forms, including film, TV, advertising and journalism, Diane Negra holds up a mirror to the contemporary female subject who finds herself centralized in commodity culture to a largely unprecedented degree at a time when Hollywood romantic comedies, chick-lit, and female-centred primetime TV dramas all compete for her attention and spending power. The models and anti-role models analyzed in the book include the chick flick heroines of princess films, makeover movies and time travel dramas, celebrity brides and bravura mothers, ‘Runaway Bride’ sensation Jennifer Wilbanks, the sex workers, flight attendants and nannies who maintain such a high profile in postfeminist popular culture, the authors of postfeminist panic literature on dating, marriage and motherhood and the domestic gurus who propound luxury lifestyling as a showcase for the ‘achieved’ female self.
