

World Archipelago Internet

Walter McKenzie

Google Archipelago Michael Rectenwald,2019-09-15 Google Archipelago: The Digital Gulag and the Simulation of Freedom begins with familiar cultural politics as points of entry to the book's theme regarding the reach, penetration, and soon the ubiquity of the digital world. In a book about enormous sea changes brought about by digital technology, Google Archipelago begins and ends with the political, in particular with the objectives of the Big Digital conglomerates as global corporate monopoly capitalists or would-be-monopolies. Google Archipelago argues that Big Digital technologies and their principals represent not only economic powerhouses but also new forms of governmental power. The technologies of Big Digital not only amplify, extend, and lend precision to the powers of the state, they may represent elements of a new corporate state power. In contrast to academics who study digital media and bemoan such supposed horrors as digital exploitation, in Google Archipelago, Michael Rectenwald argues that the real danger posed by Big Digital is not digital capitalism as such, but leftist authoritarianism, a political outlook shared by academic leftists, who thus cannot recognize it in their object of study. Thus, while imagining that they are radical critics of Big Digital, academic digital media scholars (whom Rectenwald terms the digitalistas) actually serve as ideological smokescreens that obscure its real character. Two chapters interrupt the book's genre as non-fiction prose. Part historical science fiction and part memoir, these chapters render the story of a Soviet Gulag survivor and defector, and the author's earlier digital self. Google Archipelago intentionally blurs the lines between argument and story, fact and artifact, the real and the imaginary. This is necessary, Rectenwald argues, because one cannot pretend to describe the Google Archipelago as if from without, as something apart from experience. In any case, soon one will no longer go on the Internet. The Internet and cyberspace will be everywhere, while humans and other agents will be digital artifacts within it. The Google Archipelago represents the coextension of digitization and physical social space, the conversion of social space and its inhabitants into digital artifacts, and the potential to control populations to degrees unimagined by the likes of Stalin, Hitler, or Mao.

Ersatz Capitalism and Industrial Policy in Southeast Asia Fabian Bocek, 2022-05-17 This book applies and develops the concept of "ersatz capitalism" in the analysis of industrial policy blockades to economic development in Malaysia and Indonesia. Drawing on insights from international political economy, development studies, industrial and innovation policy, and new institutionalism to refer to a specific type of capitalism, the book analyzes different paths and institutions of economic development within the entire East Asian region. Comprehensive theoretical insights are complemented by empirical case studies that relate to country and sectoral studies – the automotive and ICT industries – in Malaysia and Indonesia. Applying contemporary research on international political economy to refer to a specific type of capitalism, the author examines how conflicts of interest between factions of state apparatus, associations, and companies contribute to the failure of developmental policies. The unique combination of theory formation and empirical analysis provides a novel approach to international comparative research on capitalism. The book will be of interest to researchers in the fields of international political economy, development studies, new institutionalism, East Asian and Southeast Asian studies, and industrial and innovation policy.

Islands in a Cosmopolitan Sea Iain Walker, 2019-08-01 Many people today have never heard of the Comoros, but these islands were once part of a prosperous regional trading economy that stretched halfway around the world. A key node in the trading networks of the Indian Ocean, the Comoros prospered by exchanging slaves and commodities with Arab and Indian merchants. By the sixteenth century, the archipelago served as an important supply point on the route from Europe to Asia. The twentieth century brought the establishment of French colonial rule and a plantation economy. Since declaring its independence in 1975, the Comoros has been blighted by more than twenty coups, a radical revolutionary government and a mercenary regime. Today, the island nation suffers chronic mismanagement and relies on remittances from a diaspora community in France. Nonetheless, the Comoros is largely peaceful and culturally vibrant-- connected to the outside world in the internet age, but, at the same time, still slightly apart. Iain Walker traces the history and unique culture of these enigmatic islands, from their first settlement by Africans, Arabs and Austronesians, through their heyday within the greater Swahili world, to their decline as a forgotten outpost of the French colonial empire.

Digital Indonesia Edwin Jurriens, 2018-02-14 This book places Indonesia at the forefront of the global debate about the impact of 'disruptive' digital technologies. Digital technology is fast becoming the core of life, work, culture and identity. Yet, while the number of Indonesians using the Internet has followed the upward global trend, some groups e;the poor, the elderly, women, the less well-educated, people living in remote communities; are disadvantaged. This interdisciplinary collection of essays by leading researchers and scholars, as well as e-governance and e-commerce insiders, examines the impact of digitalisation on the media industry, governance, commerce, informal sector employment, education, cybercrime, terrorism, religion, artistic and cultural expression, and much more. It presents groundbreaking analysis of the impact of digitalisation in one of the world's most diverse, geographically vast nations. In weighing arguments about the opportunities and challenges presented by digitalisation, it puts the very idea of a technological 'revolution' into critical perspective.
