The Roles of International Law in Development ,2023-10-21 The Roles of International Law in Development provides an in-depth analysis of the relationship between public international law and development. Unlike the existing body of literature on public international law, this book investigates how international law and development interact, and evaluates how significant a role international law plays in development. Bringing together a collection of perspectives from contributors working across multiple development fields, the chapters explore the relevance and applicability of international law to particular sectors and issues implicated in development activities. They analyse how international law rules and processes can influence procedural and substantive aspects of development policies as these regulate various forms of financial support, trade, technical assistance, and policy dialogue. They also explore whether, and how, development could be more effective and yield more equitable and sustainable outcomes if the relevant and applicable rules of international law were better understood, consistently incorporated, and appropriately applied in development activities. One of the foundational premises of this book is that development policy and practice should be grounded more systematically in international law, rejecting the notion that development

policy is a 'self-contained' regime operating in a legal vacuum. By reflecting the substantive rules of international law, this in turn anchors development in international legal accountability.

Motor Learning and Development Pamela S. Beach, Melanie Perreault, Ali Brian, Douglas H. Collier, 2023-04-03 Different from any other motor behavior text on the market, *Motor Learning and Development, Third Edition With HKPropel Access*, combines two subdisciplines of motor behavior in an accessible and easy-to-follow manner. By uniting these two disciplines under the same cover, the text prepares students to create, apply, and evaluate motor skill programs for people of all skill and development levels. *Motor Learning and Development, Third Edition*, outlines the fundamental concepts of both motor learning and motor development. It explores movement patterns across all ages throughout the human life span, including the influences of life transitions and individual and sociocultural constraints. The text provides a complete framework for students to consider the many variables for each individual and then create and implement developmentally appropriate movement programs. The third edition has been revised and updated with current research and examples, and it includes the following enhancements: Expanded coverage of fundamental movement skills and skill classification Four new chapters exploring the assessment of gross motor development, sociocultural constraints, developmental models for instruction, and program design Additional videos illustrating fundamental motor skills, motor

milestones, and infant reflexes New supplemental activities at the end of each chapter prompting students to apply concepts from the text to their own life experience Motor Learning and Development, Third Edition, also has related online activities and video clips designed to encourage critical thinking and application of concepts. Lab activities, which can be assigned by instructors in HKPropel, require students to complete hands-on assignments and draw conclusions. Over 90 videos demonstrate people of various ages, including infants, completing motor tasks so students can observe and assess movements throughout the life span firsthand. Other learning aids within the book include chapter objectives, glossary terms, sidebars, and supplemental activities to emphasize the evolution from research to practice. Opening vignettes in each chapter demonstrate the breadth of professions that use research in motor behavior. Motor Learning and Development, Third Edition, offers a foundation for understanding how humans acquire and continue to develop their movement skills throughout the life span. Note: A code for accessing HKPropel is not included with this ebook but may be purchased separately.

Climate Change and Migration Quentin Wodon,Andrea Liverani,George Joseph,Nathalie Bougnoux,2014-07-10 Climate change and migration are major concerns in the MENA region, yet the empirical evidence on the impact of climate change and extreme weather events on migration remains limited.

Information is broadly lacking on how households in vulnerable areas perceive changes in the climate, how they are affected by extreme weather events, whether they benefit from community and government programs to help them cope with and adapt to a changing climate, and how these conditions influence the decision of household members to migrate, either temporarily or permanently. This introductory chapter summarizes briefly the main results of the study which relied on existing data as well as focus groups and new household surveys collected in 2011 in Algeria, Egypt, Morocco, Syria, and Yemen. The results suggest that households do perceive important changes in the climate, and that many households are being affected by extreme weather events resulting in losses in income, crops, and livestock. The coping and adaptation strategies used by households to deal with weather shocks are diverse, but also limited, with most households not able to recover from the negative impact of weather shocks. The ability of community level responses and government programs to support households is also very limited. Finally, while climate change is not today the main driver of migration flows, it does appear to contribute substantially to these flows, so that worsening climatic conditions are likely to exacerbate future migration flows.

The United Nations World Water Development Report 3 World Water Assessment Programme, 2012-05-23 The United Nations World Water Development Report, published every three years, is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It

offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind, resulting from the collaboration and contributions of the 26 UN agencies, commissions, program, funds, secretariats and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises - in climate change, energy and food and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict. Water is required to meet our fundamental needs and rising living standards and to sustain our planet's fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development and technological change. Adding complexity and risk is climate change, with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening, with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector and

civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now!

Routledge Handbook of Sport for Development and Peace Holly Collison, Simon C. Darnell, Richard Giulianotti, P. David Howe, 2018-10-09 Sport and physical activity are now regularly used to promote social and economic development, peacebuilding and conflict resolution, on an international scale. The emergence of the 'Sport for Development and Peace' (SDP) sector, comprised of governments, NGOs, sport organizations and others, reveals a high level of institutionalization of this activity, while SDP now constitutes an important element of the scholarly analysis of sport. This volume analyses and critically discusses the central elements of, and research issues within, the field of SDP and also provides a series of case studies (substantive and geographic) of key research. It is the most holistic and far-reaching text published on this topic to date. Featuring multidisciplinary perspectives from world-leading researchers and practitioners from around the world, the book covers a wide range of topics, including SDP structures, policies and funding streams, how SDP relates to human rights, social exclusion and corporate social responsibility, SDP and gender, SDP and disability, SDP and health, SDP and homelessness, and SDP and the environment. The Handbook of Sport for Development and Peace is a vital resource for researchers, students and educators in the fields of sports studies, physical education, sport for

development and peace, sport-based youth development, sport and politics, sociology of sport, and sport policy.

Tourism Development in Japan Richard Sharpley, Kumi Kato, 2020-10-29 This significant and timely volume focuses on the unique trajectory of tourism development in Japan, which has been characterized by an historical emphasis on promoting both domestic and international tourism to Japanese tourists, followed by the more recent policy of competing aggressively in the international incoming tourist market. Initial chapters present an overview of past and present tourism, including policy and research perspectives. Thematic perspectives on tourism and specific contexts and places in which tourism occurs are then examined. Strains of Japanese tourism such as sport, surf, forest, mountain, urban, tea, pilgrimage and even whaling heritage tourism are among those analyzed. The book also explores tourism's role in confronting difficult pasts and presents, and the challenges facing the development of tourism in contemporary Japan. A short postscript outlines some of the challenges and possible future directions tourism in Japan may take in light of the COVID-19 crisis. Written by a team of well-known editors and contributors, including academics from Japan, this volume will be of great interest to upper-students and researchers and academics in development studies, cultural studies, geography and tourism.

Artificial Intelligence Research and Development Sandra Sandri, Miquel Sànchez-Marrè, Ulises Cortés, 2009 This book is a collection of 45 accepted

papers originally submitted for the 12th International Conference of the Catalan Association for Artificial Intelligence (ACIA). It also includes a brief summary of two papers from invited speakers. The Catalan Association for Artificial Intelligence was founded in 1994 with the aim of fostering cooperation among researchers from the Catalan-speaking AI research community. Collaboration between ACIA members and the wider international AI community has also been well-established now for many years. The papers in these proceedings reflect this collaboration and include contributions not only from the Catalan-speaking regions of Spain, but also from France and Italy, and from as far afield as Mexico and Australia. Of all the fields in computer science, AI is the one most intertwined with all sorts of disciplines dealt with in the human experience, often employing lessons learnt in one discipline to implement a task in another. The papers in this volume reflect the rich diversity in AI, covering areas such as logics, natural language, machine learning, computer vision, robotics and multi-agent systems.

Serious Games Development and Applications Minhua Ma, Manuel Fradinho Oliveira, Jannicke Baalsrud Hauge, 2014-10-03 This book constitutes the refereed proceedings of the 5th International Conference on Serious Games Development and Applications, SGDA 2014, held in Berlin, Germany, in October 2014. The 14 revised full papers presented together with 4 short papers were carefully reviewed and selected from 31 submissions. The focus of the papers

was on the following: games for health, games for medical training, serious games for children, music and sound effects, games for other purposes, and game design and theories.

Proceedings of the International Field Exploration and Development Conference 2022 Jia'en Lin, 2023-08-05 This book focuses on reservoir surveillance and management, reservoir evaluation and dynamic description, reservoir production stimulation and EOR, ultra-tight reservoir, unconventional oil and gas resources technology, oil and gas well production testing, and geomechanics. This book is a compilation of selected papers from the 12th International Field Exploration and Development Conference (IFEDC 2022). The conference not only provides a platform to exchange experience, but also promotes the development of scientific research in oil & gas exploration and production. The main audience for the work includes reservoir engineer, geological engineer, enterprise managers, senior engineers as well as professional students.

Southern Perspectives on the Post-2015 International Development Agenda Debapriya Bhattacharya, Andrea Ordóñez Llanos, 2016-11-03 At the turn of the millennium, the unanimous adoption of the Millennium Development Goals (MDGs) by the United Nations General Assembly marked a new chapter in international development. However, voices from the Global South were noticeably absent in shaping the agenda. Fifteen years later, the global context has changed so much that it would have been inconceivable not to have taken voices from the South into account when planning the new Sustainable Development Goals (SDGs). Since its inception in 2012, the Southern Voice on Post-MDG International Development Goals (Southern Voice), a network of 48 think tanks from Africa, Asia and Latin America, has generated a substantial body of

original research to feed into various aspects of the post-2015 development agenda, such as the missing dimensions of the MDGs, ways to mitigate existing challenges in delivering on aspired outcomes, and new issues, goals, targets and indicators that are crucial for the next global development framework. Southern Perspectives on the Post-2015 International Development Agenda consolidates this research and stitches together development realities and policy experiences from the Global South, infusing unique local perspectives to the global debate on the post-2015 agenda. The compendium addresses the overarching themes underpinning the new international development framework by focusing on issues such as sustainability and growth, inclusion and social policies, governance and capacities, and financing of the new agenda. Southern Voice seeks to challenge the knowledge asymmetry afflicting the global knowledge system by channelling evidence-based policy analyses produced by centres of excellence, located in the Global South. This is a valuable resource for academics and researchers, policymakers and practitioners, and concerned students in search of alternative views on sustainable development.

Cell and Molecular Biology of Artemia Development A. Warner, 2013-06-29 The brine shrimp *Artemia* has become an important experimental system for studies of the developmental process. In recent years the shrimp has yielded considerable information on the pattern of development, bio chemistry, and gene structure and expression of crustaceans. This book is a compilation of

research activity from twenty five of the most active research laboratories working with brine shrimp in the above areas. It also represents the proceedings of a NATO Advanced Research Workshop held in Montreal, Canada, August 11-13, 1988. The book contains twenty nine full papers covering the major areas discussed at the workshop. In addition, one page abstracts representing seventeen poster presentations which were given at the workshop, and which were deemed to be most relevant to the theme of the book, are included. These are designated with an [a] in the Table of Contents following the title of each paper. A considerable amount of discussion which took place during the workshop has not been included in the book because of space limitations. However, the editors will endeavour to make some of this information available at a later date through the Artemia Newsletter. In addition to the high percentage of invited speakers who attended and contributed to the workshop, the organizers would like to thank a number of participants who made valuable contributions to the major discussion sessions. These include: John Freeman, Michael Horst, Herman Slegers, Jack Vaughn, Frank Conte, Sandy McLennan, Clive Trotman and Patrick Sorgeloos.

9th International Conference on the Development of Biomedical Engineering in Vietnam Van Toi Vo, Thi-Hiep Nguyen, Binh Long Vong, Ngoc Bich Le, Thanh Qua Nguyen, 2023-11-19 This book presents cutting-edge research and developments in the field of biomedical engineering, with a special emphasis on results achieved in Vietnam and neighboring low- and middle-income countries.

Covering both fundamental and applied research, and focusing on the theme of “Translational Healthcare Technology from Advanced to Low and Middle Income Countries in the Era of Covid and Digital Transformation”, it reports on the design, fabrication, and application of low-cost and portable medical devices, biosensors, and microfluidic devices, on improved methods for biological data acquisition and analysis, on nanoparticles for biological applications, and on new achievements in biomechanics, tissue engineering, and regeneration. It describes the developments of molecular and cellular biology techniques, neuroengineering techniques, and statistical and computational methods, including artificial intelligence, for biomedical applications. It also discusses strategies to address some relevant issues in biomedical education and entrepreneurship. Gathering the proceedings of the 9th International Conference on The Development of Biomedical Engineering in Vietnam, BME 9, held on December 27-29, 2022, in Ho Chi Minh, Vietnam, the book offers important answers to current challenges in the field and a source of inspiration for scientists, engineers, and researchers with various backgrounds working in different research institutes, companies, and countries.
