National Geographic Atlas of China National Geographic Society (U.S.), 2008 Bursting with full-colour maps and graphics, this essential atlas provides in-depth geographical coverage as it highlights the dramatic cultural and economic changes now occurring in China. National Geographic's renowned cartographers have mapped the entire country - all its administrative regions and their cities, towns, and transportation networks - to create a complete and meticulously researched panorama of the world's fastest growing economy and most populous nation. In addition to newly compiled political and physical maps, colourful thematic presentations provide information on trade, energy, natural resources,

environment, military strength, religion, ways of life, communications, and more. An exhaustive place-name index helps readers navigate to thousands of specific locations. State-of-the-art satellite imagery and mosaics - at the highest resolution ever published by National Geographic - reveal incredible variety and amazing details of China's sweeping physical landscapes. Ten major cities chosen from various regions throughout China receive close-up treatment, with maps laying out each metropolitan area and quick-read fact boxes listing local climate, time zone, population, and more. The profile of Beijing, the capital, pinpoints sites of the 2008 Summer Olympics. Also charted extensively is Shanghai, host of the 2010 World's Fair - China's first - expected to draw 70 million visitors. Since the nation's turn toward openness in the late 1970s, tourism has become a major growth industry in this land of bustling cities, spectacular vistas, ethnic diversity, and cultural and historical marvels. One of the 21 thematic topics focuses on tourism, with a map locating popular attractions such as the Great Wall, the Terra-cotta Warriors, Zhulong Nature Reserve, the Silk Road, the Imperial Palace, and Hong Kong's Star Ferry. A history section covers China's primary dynasties and then with a time line highlights the events of the twentieth century to the present. Charts, graphs, and photographs complete the visual coverage of China today, with expert commentaries adding insight on topics that range from the workings of China's government to the lifestyles of its people to the global implications of its stunning emergence as a major player on the world scene.

Overbearing Young Master's Sweetheart Zhang XiaoZao, 2020-05-28 Life forced her to only shake her head, but she didn't expect to offend the big boss, Tian Hua. She was finally able to escape the clutches of the Demon Claw, and only found out later on that the story had just begun! He looked at her face, his blue eyes deep and long. The one with the surname of Luo, he was my contracted lover. She was both bitter and indignant, but there was nothing she could do about it. Who knew that love was a truth. She pretended to trick him: What, you came back so early, did you miss me? He was slightly startled, and his face had a hint of embarrassment written on it that seemed like it could see through anyone's heart: The one with the surname Luo! You're getting bolder and bolder!

Chinese Cosmopolitanism Shuchen Xiang, 2023-09-26 A provocative defense of a forgotten Chinese approach to identity and difference. Historically, the Western encounter with difference has been catastrophic: the extermination and displacement of aboriginal populations, the transatlantic slave trade, and colonialism. China, however, took a different historical path. In Chinese Cosmopolitanism, Shuchen Xiang argues that the Chinese cultural tradition was, from its formative beginnings and throughout its imperial history, a cosmopolitan melting pot that synthesized the different cultures that came into its orbit. Unlike the West, which cast its collisions with different cultures in Manichean terms of the ontologically irreconcilable difference between civilization and barbarism, China was a dynamic identity created out of difference. The reasons for this, Xiang argues, are philosophical: Chinese philosophy has the conceptual resources for providing alternative ways to understand pluralism. Xiang explains that "Chinese" identity is not what the West understands as a racial identity; it is not a group of people related by common descent or heredity but rather a hybrid of coalescing cultures. To use the Western discourse of race to frame the Chinese view of non-Chinese, she argues, is a category error. Xiang shows that China was both internally cosmopolitan, embracing distinct peoples into a common identity, and externally cosmopolitan, having knowledge of faraway lands without an ideological need to subjugate them. Contrasting the Chinese understanding of efficacy—described as "harmony"—with the Western understanding of order, she argues that the Chinese sought to gain influence over others by having them spontaneously accept the virtue of one's position. These ideas from Chinese philosophy, she contends, offer a new way to understand today's multipolar world and can make a valuable contribution to contemporary discussions in the critical philosophy of race.
