**Global Media and Public Diplomacy in Sino-Western Relations** Jia Gao,Catherine Ingram,Pookong Kee,2016-07-22 Many researchers and China observers would agree that understanding how China pursues global communication is critical for assessing its growing soft power. While soft power as a concept has, in many ways, become almost inextricably linked with the PRC's (People's Republic of China) international diplomacy of the twenty-first century, the specific role of global media within soft power diplomacy and the corresponding influence of Western mediated public diplomacy within China is a lacuna that has remained largely unexplored. Moreover, the different Chinese and Western perspectives on the influence of global media and public diplomacy on Sino-Western relations, and the changing role of global media on this crucial aspect of international politics, have not yet been critically examined. This volume presents a broad social science audience with recent innovative scholarship and research findings on global media and public diplomacy concerning Sino-Western relations. It focuses on the implicit nexus between global media and public diplomacy, and their actual utilisation in and impact on the shifting relationships between China and the West. Special attention is given to the changing nature of globalised media in both China and Western nations, and how globalised media is influencing, shaping and changing international politics. The contributions delve deeply into both theory and practice, and focus especially upon the analysis of several key aspects of the issue from both Chinese and Western perspectives. This combination of approaches distinguishes the volume from most other published works on the topic, and greatly enriches our knowledge base in this important contemporary field.

Ptolemaic Philae Eleni Vassilika,1989 This book examines the Ptolemaic temples of the island of Philae, in Upper Egypt. The temples were modified and extended during the course of the Ptolemaic dynasty and this detailed study presents the first full publication of the architectural development and relief decoration of this site. Separate chapters address the principles of decoration, the architectural development of the site, the attributes of the Pharaoh and deities, the evolution of the human figure in the reliefs and, finally, artisan work methods. A computer facilitated the recording of the 29 variables associated with each of the 824 offering scenes. This approach, adaptable to other sites, allowed the handling of an otherwise unmanageable amount of information. The computer database is printed in full, with tabulated information gathered from it. The 1274 drawings illustrate all the offerings, crowns, clothing and other attributes depicted in the relief decoration at Philae. The plates illustrate the architectural details, the work methods of the artisans and the changing rendering of the human figure during the course of the Ptolemaic dynasty.
