**Identity, Space, and Everyday Life in Contemporary Northeast China** Zhen Troy Chen, Jiawen Han, Xianwen Kuang, Xi Liu, 2024-01-03 This edited volume is first of its kind to document and critically analyse the changes that took place since China's opening-up and reform and its impact on Dongbei, China's North-East region, known for its remote and vast landscape, unique and othered culture, rich resources, mighty infrastructures and industries, geopolitical significance. Through presenting up-to-date and multidimensional case studies, the book covers three major aspects of Dongbei, which put people at the heart of our scholarly focus, namely people's mediated life through traditional and new media; people's social, cultural, and living spaces; artistic and fictional representations of people's everyday life.

**China at War** Hans van de Ven, 2018-02-12 China's mid-twentieth-century wars pose extraordinary interpretive challenges. The issue is not just that the Chinese fought for such a long time—from the Marco Polo Bridge Incident of July 1937 until the close of the Korean War in 1953—across such vast territory. As Hans van de Ven explains, the greatest puzzles lie in understanding China's simultaneous external and internal wars. Much is at stake, politically, in how this story is told. Today in its official history and public commemorations, the People's Republic asserts Chinese unity against Japan during World War II. But this overwrites the era's stark divisions between Communists and Nationalists, increasingly erasing the civil war from memory. Van de Ven argues that the war with Japan, the civil war, and its aftermath were in fact of a piece—a singular process of conflict and political change. Reintegrating the Communist uprising with the Sino-Japanese War, he shows how the Communists took advantage of wartime to increase their appeal, how fissures between the Nationalists and Communists affected anti-Japanese resistance, and how the fractious coalition fostered conditions for revolution. In the process, the Chinese invented an influential paradigm of war, wherein the Clausewitzian model of total war between well-defined interstate enemies gave way to murky campaigns of national liberation involving diverse domestic and outside belligerents. This history disappears when the realities of China's mid-century conflicts are stripped from public view. *China at War* recovers them.

***Underground Empire*** Henry Farrell, Abraham Newman, 2023-09-12 A deeply researched investigation that reveals how the United States is like a spider at the heart of an international web of surveillance and control, which it weaves in the form of globe-spanning networks such as fiber optic cables and obscure payment systems. America's security state first started to weaponize these channels after 9/11, when they seemed like necessities to combat terrorism—but now they're a matter of course. Multinational companies like AT&T and Citicorp build hubs, which they use to make money, but which the government can also deploy as choke points. Today's headlines about trade wars, sanctions, and technology disputes are merely tremors hinting at far greater seismic shifts beneath the surface. Slowly but surely, Washington has turned the most vital pathways of the world economy into tools of domination over foreign businesses and countries, whether they are rivals or allies, allowing the U.S. to maintain global supremacy. In the process, we have sleepwalked into a new struggle for empire. Using true stories, field-defining findings, and original reporting, Henry Farrell and Abraham Newman show how the most ordinary aspects of the post-Cold War economy have become realms of subterfuge and coercion, and what we must do to ensure that this new arms race doesn't spiral out of control.

***Saving the Nation*** Margherita Zanasi, 2010-02-15 Economic modernity is so closely associated with nationhood that it is impossible to imagine a modern state without an equally modern economy. Even so, most people would have difficulty defining a modern economy and its connection to nationhood. In *Saving the Nation*, Margherita Zanasi explores this connection by examining the first nation-building attempt in China after the fall of

the empire in 1911. Challenging the assumption that nations are products of technological and socioeconomic forces, Zanasi argues that it was notions of what constituted a modern nation that led the Nationalist nation-builders to shape China's institutions and economy. In their reform effort, they confronted several questions: What characterized a modern economy? What role would a modern economy play in the overall nation-building effort? And how could China pursue economic modernization while maintaining its distinctive identity? Zanasi expertly shows how these questions were negotiated and contested within the Nationalist Party. Silenced in the Mao years, these dilemmas are reemerging today as a new leadership once again redefines the economic foundation of the nation.

The Tradition and Modern Transition of Chinese Law Jinfan Zhang, 2014-02-20 The book was first published in 1997, and was awarded the first prize of scientific research by the Ministry of Justice during the ninth Five-Year Plan of China. In 2005, it was adopted the text book for the postgraduates of law majors. In 2009, it was awarded the second prize of the best books on law in China. The book discusses from different aspects the long legal tradition in China, and it not only helps us to have a further understanding of Chinese legal system but also combines theories and practice and illustrate the modern legal transition which probes the history of Chinese legal system. As is known to us all, China is a country with a long legal history, which can be traced back to more than three thousand year ago. So the legal tradition of China has been passed down from generation to generation without any interruptions. This feature is peculiar to Chinese legal history which is beyond all comparison with that of other countries such as ancient Egypt, ancient India, ancient Babylon and ancient Persia. Through the study of Chinese legal history we can have a deeper understanding of the histories, features, origins and the transition of Chinese legal tradition. The Chinese legal tradition originated from China, and it is the embodiment of the wisdom and creativity of Chinese civilization. The great many books, researching materials, legal constitutions, archives, files and records of different dynasties in China have provided us with rare, complete and systematic materials to research. The book has a complete, systematic and detailed research on Chinese legal tradition and its transition and it gives people a correct recognition of the process of the perfection of laws during its development and its position as well as its value in the social progress in order to grasp its regular patterns. It also has showed us the most valuable part and core of Chinese legal Tradition and it is a summary of Chinese legal tradition and its transition from different perspectives, different angles and different levels. From the book, we can see that the ancient Chinese Legal Culture had once shocked the world and exerted great influence on the civilization of the world legal system, especially the legal systems in Asian countries. The book also has discussed the reestablishment of law in the late Qing Dynasty and the beginning of the Chinese law's transition to modernity. In a word, the book has not only combined the legal system and the legal culture together, but also integrated the important historical figures and events ingeniously and it is a valuable and readable book with authenticity.

*China and Nordic Diplomacy* Bjørnar Sverdrup-Thygeson, Wrenn Yennie Lindgren, Marc Lanteigne, 2017-10-10 This book seeks to explore Nordic approaches to China and the idea of sub-regional diplomacy. China's multi-tiered approach to Europe can be seen vividly in the Nordic sub-region, which has been engaging Beijing through a variety of different means corresponding to the political and economic structures found in the Nordic states. In some areas, a specific Nordic approach can be observed, including areas related to economic cooperation, Arctic diplomacy, and institution-building. However, the Nordic states also have widely differing historical experiences with China leading up to the present day. Each of the Nordic states has also had to balance their China relations with those of the EU and other major players such as the United States. With case studies on the EU, Denmark, Finland, Iceland, Norway and Sweden, this volume addresses the question of a specifically Nordic approach to Chinese relations. It

explores not only the contributions of the Nordics to China relations, but also adds to the greater study of sub-regional approaches to Chinese diplomacy at a time when Sino-European relations are arguably at their most complex. This book will be of much interest to students of Chinese politics, Nordic politics, diplomacy and IR in general.

Empires of Ideas William C. Kirby, 2022-07-05 The United States is the global leader in higher education, but this was not always the case and may not remain so. William Kirby examines sources of—and threats to—US higher education supremacy and charts the rise of Chinese competitors. Yet Chinese institutions also face problems, including a state that challenges the commitment to free inquiry.

Orchestration James Reilly, 2021-01-08 The Chinese government has more control over more wealth than any other government in world history. With the Communist Party controlling the commanding heights of the world's second-largest economy, China appears ideally structured to pursue economic statecraft, using economic resources to advance its foreign policy goals. Yet as this book shows, domestic complications frequently constrain Chinese leaders. They have responded with a distinctive approach to economic statecraft: orchestration. Drawing upon extensive field research across Asia and Europe, *Orchestration* traces the origins, operations, and effectiveness of China's economic statecraft. In this book, James Reilly examines the ideas and institutions at the heart of China's approach to economic statecraft, and assesses Beijing's orchestration in four cases: Myanmar, North Korea, Western Europe, and Central/Eastern Europe. China's unique experience as a planned economy, and then a developmental state, all under a single Leninist party, left Chinese leaders with unchallenged authority over their economy. However, despite successfully mobilizing companies, banks, and local officials to rapidly expand trade and investment abroad, Chinese leaders largely failed to influence key policy decisions overseas. For countries around the world, economic engagement with China thus yields more benefits with fewer costs than generally assumed. *Orchestration* engages three central questions. First, why does China deploy economic statecraft in this particular fashion? Secondly, when is China's economic statecraft most effective? Finally, what can the China case tell us about economic statecraft more broadly? The findings show how China uses economic resources to exert influence abroad and identify when Beijing is most effective. By exploring the domestic drivers of China's economic statecraft, this book helps launch a new research field: the comparative study of economic statecraft.

**Revolution in the Highlands** Stephen C. Averill, 2006 This extensively researched and elegantly written study offers a fine-grained analysis of the origins of the Chinese Communist Revolution in the countryside. Building on decades of research in newly available sources and multiple trips to Jiangxi, Stephen Averill provides a definitive local perspective on the rise of a revolution that reshaped China and the world. A rich work of social history, it goes beyond recently popular organizational approaches to explore the ways in which the party and social networks interpenetrated and interacted in the early stages of revolutionary base-building. The Jinggangshan highlands provided the base for Mao Zedong's first efforts at rural revolution. Chinese histories and most Western accounts have focused on the heroic exploits of Mao and his Communist Party comrades, battling the natural elements, hostile military forces, and skeptical authorities in the urban-based Communist Central Committee. This long-awaited work penetrates the hagiographic haze of Mao-centered analysis to provide a close narrative and rich social history of the Jinggangshan base. The author explores the historical patterns of local strongman rule, clientelist politics, lineage conflict, and ethnic struggle within which the party competed for power. Through this multifaceted lens, the revolutionary experience in Jinggangshan is equally dramatic but considerably more sobering than the conventional story. Among Western studies of the Chinese revolution, this work stands out as the definitive account of the critical moment in the 1920s when the physical and ideological center of the Communist movement shifted from the cities to the countryside. This was a process of elite-mediated political osmosis and adaptive compromises with local traditions. The party was not simply an outside force manipulating social tensions for its own political ends. There was, instead, an intricate interweaving of local networks and social cleavages in the highlands with the political

structures and policy divisions of t

*Information Engineering of Emergency Treatment for Marine Oil Spill Accidents* Lin Mu,Lizhe Wang,Jining Yan,2019-09-10 Oil spills are a serious marine disaster. Oil spill accidents usually occur in shipping, ports and offshore oil development.
