East of the River T. P. M Thorne, 2015-04-23 It is the end of the 2nd Century, and Han Dynasty China is a divided place. Jiangdong - 'East of the River' - forms part of the south-eastern province of Yang, and it is far from prosperous. When the Yellow Turban Rebellion threatens to engulf the empire, the valiant 'Tiger of Jiangdong', Sun Jian, steps forward to fight for his underdeveloped region and the nation as a whole: his career takes him to the rebel-held northwest and the imperial capital, where the tyrant Dong Zhuo holds power. At the same time, others - such as Taishi Ci - fight for justice in an era where heroes are increasingly rare and power-hungry warlords are the norm. In the aftermath of the Dong

Zhuo crisis, Sun Jian is inextricably tied to the nobleman Yuan Shu, who has increasingly dangerous ambitions: inevitable tragedy looms as Sun Jian is forced to fight the forces of Jing Province Governor Liu Biao, and the responsibility for the Sun clan's future soon passes to Jian's eldest son Sun Ce. Sun Ce would first serve Yuan Shu through lack of choice, but as the political twists and turns of the era offer new opportunities, Ce is able to follow a path that eventually builds the foundations for the famous 'Three Kingdoms era' that became part of history, myth and legend.

Dictionary of the Ben Cao Gang Mu, Volume 2 Hua Linfu, Paul D. Buell, 2016-11-29 The Ben cao gang mu, compiled in the second half of the sixteenth century by a team led by the physician Li Shizhen (1518–1593) on the basis of previously published books and contemporary knowledge, is the largest encyclopedia of natural history in a long tradition of Chinese materia medica works. Its description of almost 1,900 pharmaceutically used natural and man-made substances marks the apex of the development of premodern Chinese pharmaceutical knowledge. The Ben cao gang mu dictionary offers access to this impressive work of 1,600,000 characters. This second book in a three-volume series verifies and localizes all 2,158 geographical and associated administrative names referred to in the Ben cao gang mu in connection with the origin and use of pharmaceutical substances.

Phoenix Kingdoms Fan Jeremy Zhang, Jay Xu, 2022

Featuring about 150 loans from China's Hubei Provincial Museum, this exhibition, set to open at the Asian Art Museum of San Francisco under the name Lost Kingdoms of Ancient China, examines the new finds of Zeng and Chu tombs together to explore the cultural landscape of the southern borderland of the Zhou dynasty. It also reveals the legendary rising story of the phoenix kingdom erased by the Qin, highlighting the importance of the middle Yangtze River region in forming a southern style in Chinese art. For a better understanding of the Zeng and Chu material, the exhibition catalogue consists of seven essays to elaborate the introduction to the remarkable art and culture of this region, with entries of about 150 works in six categories (jade, bronze ritual vessels, musical instruments and weapons, lacquerware for luxury and ceremony, funerary bronze and wood objects, and textiles and artefacts with designs). Seven contributors have written for this catalogue, including five outside scholars with expertise on different subjects--

The Numerology of the I Ching Taoist Master Alfred Huang, 2000-07-01 The first book to cover the complete Taoist teachings on form, structure, and symbol in the I Ching. • Provides many new patterns and diagrams for visualizing the layout of the 64 hexagrams. • Includes advanced teachings on the hosts of the hexagrams, the mutual hexagrams, and the core hexagrams. • Written by Taoist Master Alfred Huang, author of The Complete I Ching. The Numerology of the I Ching is the first book to bring the complete Taoist teachings

on form, structure, and symbol in the I Ching to a Western audience, and it is a natural complement to Alfred Huang's heralded Complete I Ching. It examines not only the classic circular arrangement of the eight trigrams but also the hidden numerology in this arrangement and its relationship to tai chi and the Chinese elements. Huang explains the binary code underlying the I Ching, the symbolism behind the square diagram of all 64 hexagrams, and Fu Xi's unique circular layout of the 64 hexagrams, completely unknown in the West. Entire chapters are devoted to such vital material as the hosts of the hexagrams, the mutual hexagrams, and the core hexagrams--all barely hinted at in previous versions of the I Ching. With appendices listing additional symbolism for each hexagram, formulas for easily memorizing the Chinese names of the sixty-four hexagrams, and much more, The Numerology of the I Ching is a must for serious I Ching students.

Dreaming across Languages and Cultures Laurence Wong, 2014-10-02 Dreaming across Languages and Cultures: A Study of the Literary Translations of the Hong lou meng (also called The Dream of the Red Chamber, Red Chamber Dream, or The Story of the Stone) is a groundbreaking monograph in translation studies. Integrating theory with practice, it examines, analyses, compares, and evaluates 14 versions of the greatest Chinese novel in five major European languages, namely, English, French, German, Italian, and Spanish. In this study, translation, linguistic, literary, and semiotic theories, as well as the author's own experience of translating Dante and Shakespeare, are drawn on. Though primarily aimed at scholars specializing in translation and in Hong lou meng studies, the book also introduces students of Chinese literature, comparative literature, and cultural studies to new interdisciplinary perspectives. By illustrating salient points with lively and interesting examples, too, it enables the non-specialist to see the fascinating intricacies of language and translation, as well as the complex relationship between translation and culture. In view of its new approach to a new topic, of its many impressive insights, and, above all, of the amazing depth and breadth of its investigation, Dreaming across Languages and Cultures is truly monumental.
