Advanced Electrical and Electronics Engineering Jian Lee,2011-04-13 2010 First International Conference on Electrical and Electronics Engineering was held in Wuhan, China December 4-5. Advanced Electrical and Electronics Engineering book contains 72 revised and extended research articles written by prominent researchers participating in the conference. Topics covered include, Power Engineering, Telecommunication, Control engineering, Signal processing, Integrated circuit, Electronic amplifier, Nano-technologies, Circuits and networks, Microelectronics, Analog circuits, Digital circuits, Nonlinear circuits, Mixed-mode circuits, Circuits design, Sensors, CAD tools, DNA computing, Superconductivity circuits. Electrical and Electronics Engineering will offer the state of art of tremendous advances in Electrical and Electronics Engineering and also serve as an excellent reference work for researchers and graduate students working with/on Electrical and Electronics

Engineering.

Web API Development with ASP.NET Core 8 Xiaodi Yan, 2024-04-05 Develop web API applications using design patterns, advanced customization, and cutting-edge technologies, such as SignalR, gRPC, and GraphQL, while leveraging powerful cloud platforms and tools to accelerate development Key Features Gain proficiency in building modern ASP.NET Core web API applications Develop the skills to effectively test, debug, and secure your web API applications Streamline development workflows and boost productivity with cloud computing platforms and industry-standard CI/CD tools Purchase of the print or Kindle book includes a free PDF eBook Book Description Web API applications have become increasingly significant in recent years, fueled by the ever-accelerating pace of technological advancements. However, with this rapid evolution comes a pressing challenge: the need to create web API applications that are not only functional but also adaptable, maintainable, and scalable to meet the demands of users and businesses alike. This book will help you address this challenge head-on, equipping you with the knowledge and skills required to develop web API

applications from scratch. By providing a deeper understanding of the various protocols implemented by ASP.NET Core, including RESTful, SignalR (WebSocket), gRPC, and GraphQL, supplemented by practical examples and optimization techniques, such as using middleware, testing, caching, and logging, this book offers invaluable insights for both newcomers as well as seasoned developers to meet modern web development requirements. Additionally, you'll discover how to use cloud platforms such as Azure and Azure DevOps to enhance the development and operational aspects of your application. By the end of the book, you'll be fully prepared to undertake enterprise-grade web API projects with confidence, harnessing the latest advancements in ASP.NET Core 8 to drive innovation.

What you will learn

- Build a strong foundation in web API fundamentals
- Explore the ASP.NET Core 8 framework and other industry-standard libraries and tools for high-performance, scalable web APIs
- Apply essential software design patterns such as MVC, dependency injection, and the repository pattern
- Use Entity Framework Core for database operations and complex query creation
- Implement robust security measures to protect against malicious attacks and data breaches
- Deploy

your application to the cloud using Azure and leverage Azure DevOps to implement CI/CD Who this book is for This book is for developers who want to learn how to build web APIs with ASP.NET Core and create flexible, maintainable, scalable applications with .NET platform. Basic knowledge of C#, .NET, and Git will assist with understanding the concepts more easily.

Hepatocellular Carcinoma Ahmed Kaseb, 2013-10-23 Hepatocellular carcinoma (HCC) develops as a consequence of underlying chronic liver disease, most commonly cirrhosis. Therefore, HCC management draws on the expertise of a range of medical specialists. Many components of current novel therapeutic modalities for HCC are discussed in the current version of the book within the framework of a multidisciplinary approach with special emphasis on emerging treatment approaches and research strategies. This book is the essential clinical guide for oncologists, hepatologists, surgeons, and all physicians and researchers involved in the care of patients with HCC. I would like to thank the authors for their significant efforts in bringing this edition to life. This book is a tribute to their continued dedication to improving HCC outcome.

Bullying Faye Mishna,2012-09-01 With the increased recognition of the devastating effects of bullying, there is now a tremendous amount of information available on its prevalence, associated factors, and the evaluation data on well known school-wide anti-bullying education, prevention, and intervention programs. Yet numerous complex issues span individual and societal variables---including individual characteristics and vulnerability, peer and family relationships and dynamics, classroom and school milieus, and stigma and discrimination---making the task of understanding, assessing, and responding to bullying on the ground complicated for researchers and nearly impossible for school-based practitioners. Untangling some of the thorny issues around what causes and constitutes bullying, including how to think differently about overlapping phenomena such as racism, sexism, homophobia, or sexual harassment, Faye Mishna presents an exhaustive body of empirical and theoretical literature in such a way as to be accessible to both students and practitioners. Chapters will equip readers to think critically about contexts, relationships, and risk and protective factors that are

unique to individual students and schools, and to effectively assess and design multi-level interventions for a variety of aggressive behaviors. Paying particular attention to emerging types of victimization, such as cyber bullying, and to vulnerable groups, such as LGBTQ youth and students with disabilities, Mishna distills the key elements of successful interventions with both victims and aggressors and includes case examples and practice principles throughout. The result is an integrated, nuanced synthesis of current and cutting-edge scholarship that will appeal to students, practitioners, and researchers in social work, education, and psychology.

Programming TypeScript Boris Cherny,2019-04-25 Any programmer working with a dynamically typed language will tell you how hard it is to scale to more lines of code and more engineers. That's why Facebook, Google, and Microsoft invented gradual static type layers for their dynamically typed JavaScript and Python code. This practical book shows you how one such type layer, TypeScript, is

unique among them: it makes programming fun with its powerful static type system. If you're a programmer with intermediate JavaScript experience, author Boris Cherny will teach you how to master the TypeScript language. You'll understand how TypeScript can help you eliminate bugs in your code and enable you to scale your code across more engineers than you could before. In this book, you'll:

- Start with the basics: Learn about TypeScript's different types and type operators, including what they're for and how they're used
- Explore advanced topics: Understand TypeScript's sophisticated type system, including how to safely handle errors and build asynchronous programs
- Dive in hands-on: Use TypeScript with your favorite frontend and backend frameworks, migrate your existing JavaScript project to TypeScript, and run your TypeScript application in production

Modern Methods of Crystal Structure Prediction Artem R. Oganov, 2011-08-04 Gathering leading specialists in the field of structure prediction, this book provides a unique view of this complex and rapidly developing field, reflecting the numerous viewpoints of the different authors. A summary of the major achievements over the last few years and of the challenges still remaining makes this

monograph very timely.

Organic Thermoelectric Materials Zhiqun Lin, Ming He, 2019-10-18 Thermoelectric materials have received a great deal of attention in energy-harvesting and cooling applications, primarily due to their intrinsic low cost, energy efficient and eco-friendly nature. The past decade has witnessed heretofore-unseen advances in organic-based thermoelectric materials and devices. This title summarises the significant progress that has been made in the molecular design, physical characterization, and performance optimization of organic thermoelectric materials, focusing on effective routes to minimize thermal conductivity and maximize power factor. Featuring a series of state-of-the-art strategies for enhancing the thermoelectric figure of merit (ZT) of organic thermoelectricity, and highlighting cutting-edge concepts to promote the performance of organic thermoelectricity, chapters will strengthen the exploration of new high-ZT thermoelectric materials and their potential applications. With contributions from leading worldwide authors, *Organic Thermoelectric Materials* will appeal to graduate students as well as academic and industrial researchers across chemistry, materials science, physics and

engineering interested in the materials and their applications.

Social Informatics Samin Aref, Kalina Bontcheva, Marco Braghieri, Frank Dignum, Fosca

Giannotti, Francesco Grisolia, Dino Pedreschi, 2020-10-08 This volume constitutes the proceedings of the 12th International Conference on Social Informatics, SocInfo 2020, held in Pisa, Italy, in October 2020. The 30 full and 3 short papers presented in these proceedings were carefully reviewed and selected from 99 submissions. The papers presented in this volume cover a broad range of topics, ranging from works that ground information-system design on social concepts, to papers that analyze complex social systems using computational methods, or explore socio-technical systems using social sciences methods.

Advanced Thermoelectric Materials for Energy Harvesting Applications Saim Memon, 2019-10-30

Advanced Thermoelectric Materials for Energy Harvesting Applications is a research-intensive textbook covering the fundamentals of thermoelectricity and the process of converting heat energy into electrical energy. It covers the design, implementation, and performance of existing and advanced thermoelectric

materials. Chapters examine such topics as organic/inorganic thermoelectric materials, performance and behaviors of thermoelectric devices, and energy harvesting applications of thermoelectric devices.

Racialized Politics David O. Sears, Jim Sidanius, Lawrence Bobo, 2000-02-15 Are Americans less prejudiced now than they were thirty years ago, or has racism simply gone underground? Is racism something we learn as children, or is it a result of certain social groups striving to maintain their privileged positions in society? In *Racialized Politics*, political scientists, sociologists, and psychologists explore the current debate surrounding the sources of racism in America. Published here for the first

time, the essays represent three major approaches to the topic. The social psychological approach maintains that prejudice socialized early in life feeds racial stereotypes, while the social structural viewpoint argues that behavior is shaped by whites' fear of losing their privileged status. The third perspective looks to non-racially inspired ideology, including attitudes about the size and role of government, as the reason for opposition to policies such as affirmative action. Timely and important, this collection provides a state-of-the-field assessment of the current issues and findings on the role of racism in mass politics and public opinion. Contributors are Lawrence Bobo, Gretchen C. Crosby, Michael C. Dawson, Christopher Federico, P. J. Henry, John J. Hetts, Jennifer L. Hochschild, William G. Howell, Michael Hughes, Donald R. Kinder, Rick Kosterman, Tali Mendelberg, Thomas F. Pettigrew, Howard Schuman, David O. Sears, James Sidanius, Pam Singh, Paul M. Sniderman, Marylee C. Taylor, and Steven A. Tuch.

The Flatey Enigma Viktor Arnar Ingólfsson, 2012 In the spring of 1960 three men accidentally discover a decaying body on a deserted island, later identified as the body of a Danish codicologist

who had been missing for several months. An investigation ensues and the case is mysteriously linked to the contents of a medieval manuscript known as the Book of Flatey. Before long another body is found in Flatey, but this time an eagle has been carved into the victim's back in blood, in the ancient Viking tradition.

Filoviruses Jens Kuhn,2008-05-29 This is the first comprehensive review of the world literature on filovirus research and provides the most extensive bibliography of the subject yet published. There is special emphasis on foreign literature that has never been summarized. Every aspect of filovirus research, including their history, epidemiology, clinical picture, pathology, molecular biology, and political aspects are reviewed in detail.

Outsiders at Home Nazita Lajevardi,2020-05-28 Discrimination against Muslim Americans has soared over the last two decades with hostility growing especially acute since 2016 - in no small part due to targeted attacks by policymakers and media. *Outsiders at Home* offers the first systematic, empirically driven examination of status of Muslim Americans in US democracy, evaluating the topic

from a variety of perspectives. To what extent do Muslim Americans face discrimination by legislators, the media, and the general public? What trends do we see over time, and how have conditions shifted? What, if anything, can be done to reverse course? How do Muslim Americans view their position, and what are the psychic and sociopolitical tolls? Answering each of these questions, Nazita Lajevardi shows that the rampant, mostly negative discussion of Muslims in media and national discourse has yielded devastating political and social consequences.

The Race Card Tali Mendelberg, 2017-10-09 Did George Bush's use of the Willie Horton story during the 1988 presidential campaign communicate most effectively when no one noticed its racial meaning? Do politicians routinely evoke racial stereotypes, fears, and resentments without voters' awareness? This controversial, rigorously researched book argues that they do. Tali Mendelberg examines how and when politicians play the race card and then manage to plausibly deny doing so. In the age of equality, politicians cannot prime race with impunity due to a norm of racial equality that prohibits racist speech. Yet incentives to appeal to white voters remain strong. As a result, politicians

often resort to more subtle uses of race to win elections. Mendelberg documents the development of this implicit communication across time and measures its impact on society. Drawing on a wide variety of research—including simulated television news experiments, national surveys, a comprehensive content analysis of campaign coverage, and historical inquiry--she analyzes the causes, dynamics, and consequences of racially loaded political communication. She also identifies similarities and differences among communication about race, gender, and sexual orientation in the United States and between communication about race in the United States and ethnicity in Europe, thereby contributing to a more general theory of politics. Mendelberg's conclusion is that politicians—including many current state governors--continue to play the race card, using terms like welfare and crime to manipulate white voters' sentiments without overtly violating egalitarian norms. But she offers some good news: implicitly racial messages lose their appeal, even among their target audience, when their content is exposed.
