Making World Development Work Grégoire Leclerc,Charles A. S. Hall,2007 The authors reexamine world development - usually the province of economists - as professionals trained in the natural sciences. They show how we have and might use tested scientific and technical procedures and concepts, as well as science itself, to achieve much better results than what has been characteristic of the past. Leclerc and Hall contend that to scholars with a scientific background, the process of development, and the economic logic behind it, often look almost surrealistic. The basic question at the foundation of this review is this: Why should something so important as world development, something capable of absorbing such vast sums of money and of human goodwill, something that impacts the people and the environment so much, continue to be organized and planned using economic techniques and theories that are both unconfirmed experimentally and proven to have led to development failures?--BOOK JACKET.

Outsourcing Software Development Offshore Tandy Gold,2004-11-15 In Offshore Software Development: Making It Work, hands-on managers of Offshore solutions help you answer these questions: What is Offshore and why is it an IT imperative? What do you need to do to successfully evaluate an Offshore solution? How do you avoid common pitfalls? How do you confront security and geopolitical risk? How do you handle issues related to displaced workers? The author applies her considerable experience in the analysis of such Offshore issues as the financial growth of the Offshore industry, keys to success in initiating a program, choosing and managing vendors, risk mitigation, and employee impacts. A detailed program checklist outlines the steps for successful Offshore execution, providing real-world exposure and guidance to a movement that has become a fixture in the IT realm. About the Author Tandy Gold is a 20-year veteran of the technology industry who is focused on entrepreneurial consulting and innovation. As part of her responsibilities in implementing the first Offshore initiative for a large financial institution, she created a monthly Offshore interest group. Comprised of Offshore program managers from Fortune 100 firms, together they represent more than 40 years of experience in Offshore.

Innovative Project Management with FIDIC Contracts Adriana Spassova,2023-12-05 This book provides comprehensive guidance for the implementation of the legal requirements of FIDIC contracts with a detailed application of modern project management principles. It demonstrates that the FIDIC suites for works and services contain many tools for good project management, which can complement the innovation needed today to guide sustainable development. The author's experience in construction management, construction law, and the application of FIDIC contracts as a FIDIC engineer, a procurement/claims consultant, and a FIDIC accredited/certified adjudicator and trainer underpins this unique and much-needed book linking FIDIC contract management with project management practices and concepts. It is structured around project management knowledge areas, and details not only the FIDIC works contracts (Red/Yellow/Silver 2017 Reprint 2022, Emerald 2019, Gold 2008, and Green Book 2021) but also the project management requirements of the contract between the Employer and Engineer (White Book 2017) and the FIDIC supply-chain contracts, and explains how these all interface in project governance. Linking the project management knowledge areas from the PMBOK® and its Construction Extension with the FIDIC Body of Knowledge (FBOK), the book provides recommendations for integration of best practice and innovations. It illustrates these processes with 54 flowcharts and 16 case studies, as well as a railway scenario demonstrating the application of the book's recommended procedures. This will be an invaluable source of practical guidance for employers, contractors, and engineers responsible for procuring and managing construction projects. It provides useful insight for technical, legal, and financial experts on the management of processes, contracts, and digital tools, with recommendations on how to tailor and use the FIDIC contracts for project success.

An Elegant Puzzle Will Larson,2019-05-20 A human-centric guide to solving complex problems in engineering management, from sizing teams to handling technical debt. There's a saying that people don't leave companies, they leave managers. Management is a key part of any organization, yet the discipline is often self-taught and unstructured. Getting to the good solutions for complex management challenges can make the difference between fulfillment and frustration for teams--and, ultimately, between the success and failure of companies. Will Larson's An Elegant Puzzle focuses on the particular challenges of engineering management--from sizing teams to handling technical debt to performing succession planning--and provides a path to the good solutions. Drawing from his

experience at Digg, Uber, and Stripe, Larson has developed a thoughtful approach to engineering management for leaders of all levels at companies of all sizes. An Elegant Puzzle balances structured principles and human-centric thinking to help any leader create more effective and rewarding organizations for engineers to thrive in.

Agribusiness Julian Roche,2019-08-06 Agribusiness offers a unique introduction to the business of agriculture: what agribusiness is, why it matters, what the role of technology is, how trade fits into the picture, what its key risks are, who is lending and investing and why, and what returns they are getting. It is both practical in orientation – focusing on the role of managers in the industry as well as that of lenders and investors – and international in scope – drawing on case studies and interviews with key figures all over the world. The text ranges across various agricultural commodities to stress that there is no ‘one size fits all’ solution and successful management, lending or investment in agribusiness requires understanding specifics. Readers are introduced to the economics of the supply and demand of food, the role of agricultural trade, agricultural marketing and farm management along with key business aspects including: Main drivers of agribusiness value; Principal risks of agribusinesses; Agribusiness as an investment class; and Agribusiness lending: why, who and how. This engaging textbook offers a complete guide to the international business of agriculture which is ideal for all students, scholars and practitioners. A selection of eResources is also available to supplement this text, and instructors will find PowerPoint slides, discussion questions, case studies and further teaching materials available to them.

A Constrained Space Exploration Technology Program National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Committee to Review NASA's Exploration Technology Development Program,2009-01-29 In January 2004, President George W. Bush announced the Vision for Space Exploration (VSE), which instructed NASA to Extend human presence across the solar system, starting with a human return to the Moon by the year 2020, in preparation for human exploration of Mars and other destinations, among other objectives. As acknowledged in the VSE, significant technology development will be necessary to accomplish the goals it articulates. NASA's Exploration Technology Development Program (ETDP) is designed to support, develop, and ultimately provide the necessary technologies to meet the goals of the VSE. This book, a review of the ETDP, is broadly supportive of the intent and goals of the VSE, and finds the ETDP is making progress towards the stated goals of technology development. However, the ETDP is operating within significant constraints which limit its ability to successfully accomplish those goals-the still dynamic nature of the Constellation Program requirements, the constraints imposed by a limited budget, the aggressive time scale of early technology deliverables, and the desire to fully employ the NASA workforce.
