Dictionary of the Ben Cao Gang Mu, Volume 3 Zheng Jinsheng,Nalini Kirk,Paul D. Buell,2018-02-06

The Ben cao gang mu, compiled in the second half of the sixteenth century by a team led by the physician Li Shizhen (1518–1593) on the basis of previously published books and contemporary knowledge, is the largest encyclopedia of natural history in a long tradition of Chinese materia medica works. Its description of almost 1,900 pharmaceutically used natural and man-made substances marks the apex of the development of premodern Chinese pharmaceutical knowledge. The Ben cao gang mu dictionary offers access to this impressive work of 1,600,000 characters. This third book in a three-volume series offers detailed biographical data on all identifiable authors, patients, witnesses of therapies, transmitters of recipes, and further persons mentioned in the Ben cao gang mu and provides bibliographical data on all textual sources resorted to and quoted by Li Shizhen and his collaborators.

University Autonomy, the State and Social Change in China Su-Yan Pan,2009-03-01 This book explores the role of universities in responding to ongoing changes in China, and in shaping the relations between the university and the state during periods of social change. Tsinghua University is selected as a case study to inform this important issue. By tracing the changes and continuities Tsinghua has experienced since 1911, this book gives an in-depth analysis of how the university strives to maintain autonomy while taking a leading role in implementing China's policy of higher education. By drawing on a vast literature of higher education theories, the book offers original insights into the university-state relationship and provides a new understanding on the complexities China faces in the era when the country is becoming a key global actor.

Nuclear Magnetic Resonance Krystyna Kamienska-Trela,2015-05-20 Applications of nuclear magnetic resonance span a wide range of scientific disciplines, from physics to medicine. This series has provided an essential digest of the NMR literature for more than four decades and each volume provides unrivalled coverage of the literature on this topic. Continuous coverage on some topics such as theoretical and physical aspects of nuclear shielding is balance by the desire for coverage on newer topics like applications in biological systems and materials science. For those wanting to become rapidly acquainted with NMR or seasoned practitioners, this is an invaluable source of current methods and applications.

Translating Chinese Art and Modern Literature Yifeng Sun,Chris Song,2019-02-25 Translating Chinese Art and Modern Literature examines issues in cross-cultural dialogue in connection with translation and modern Chinese art and literature from interdisciplinary perspectives. This comprises the text-image dialogue in the context of Chinese modernity, and cross-cultural interaction between modern literature in Chinese and other literatures. This edited collection approaches these issues with discrete foci and approaches, and the ten chapters in this volume are to be divided into two distinct parts. The first part highlights the mutual effects between literary texts and visual images in the media of book, painting, and film, and the second part includes contributions by scholars of literary translation.

The Aesthetics of Qiyun and Genius Xiaoyan Hu,2021-08-10 This book discusses qiyun aesthetics in Chinese painting formulated by leading sixth to fourteenth-century intellectual elite. In light of Kant's account of artistic genius, it considers the role of the mind in creating a painting replete with qiyun, thereby both demystifying qiyun aesthetics and illuminating some limitations in Kant's aesthetics.

Media and Communication in the Chinese Diaspora Wanning Sun,John Sinclair,2015-09-16 The rise of China has brought about a dramatic increase in the rate of migration from mainland China. At the same time, the Chinese government has embarked on a full-scale push for the internationalisation of Chinese media and culture. Media and communication have therefore become crucial factors in shaping the increasingly fraught politics of transnational Chinese communities. This book explores the changing nature of these communities, and reveals their dynamic and complex relationship to the media in a range of countries worldwide. Overall, the book highlights a number of ways in which China's going global policy interacts with other factors in significantly reshaping the content and contours of the diasporic Chinese media landscape. In doing so, this book constitutes a major rethinking of Chinese transnationalism in the twenty-first century.

Touches of History ,2011-05-10 Touches of History represents a groundbreaking attempt to return to a study of "May Fourth" that is solidly grounded in historical fact. Favouring smaller stories over grand narratives, concentrating on unknown, marginal materials rather than familiar key documents, and highlighting "May Fourth"'s indebtedness to the cultural debates of the preceding late Qing period, Chen Pingyuan reconstructs part of the actual historical scenery, demonstrating the great variety of ideas expressed during those tumultuous decades.

1919 - The Year That Changed China Elisabeth Forster,2018-03-05 The year 1919 changed Chinese culture radically, but in a way that completely took contemporaries by surprise. At the beginning of the year, even well-informed intellectuals did not anticipate that, for instance, baihua (aprecursor of the modern Chinese language), communism, Hu Shi and Chen Duxiu would become important and famous - all of which was very obvious to them at the end of the year. Elisabeth Forster traces the precise mechanisms behind this transformation on the basis of a rich variety of sources, including newspapers, personal letters, student essays, advertisements, textbooks and diaries. She proposes a new model for cultural change, which puts intellectual marketing at its core. This book retells the story of the New Culture Movement in light of the diversified and decentered picture of Republican China developed in recent scholarship. It is a lively and ironic narrative about cultural change through academic infighting, rumors and conspiracy theories, newspaper stories and intellectuals (hell-)bent on selling agendas through powerful buzzwords.

Symptoms of an Unruly Age Rivi Handler-Spitz,2017-04-04 Symptoms of an Unruly Age compares the writings of Li Zhi (1527-1602) and his late-Ming compatriots to texts composed by their European contemporaries, including Montaigne, Shakespeare, and Cervantes. Emphasizing aesthetic patterns that transcend national boundaries, Rivi Handler-Spitz explores these works as culturally distinct responses to similar social and economic tensions affecting early modern cultures on both ends of Eurasia. The paradoxes, ironies, and self-contradictions that pervade these works are symptomatic of the hypocrisy, social posturing, and counterfeiting that afflicted both Chinese and European societies at the turn of the seventeenth century. Symptoms of an Unruly Age shows us that these texts, produced thousands of miles away from one another, each constitute cultural manifestations of early modernity.

Spymaster Frederic E. Wakeman,2003 The most feared man in China, Dai Li, was chief of Chiang Kai-shek's secret service during World War II. This sweeping biography of China's Himmler, based on recently opened intelligence archives, traces Dai's rise from obscurity as a rural hooligan and Green Gang blood-brother to commander of the paramilitary units of the Blue Shirts and of the dreaded Military Statistics Bureau: the world's largest spy and counterespionage organization of its time. In

addition to exposing the inner workings of the secret police, whose death squads, kidnappings, torture, and omnipresent surveillance terrorized critics of the Nationalist regime, Dai Li's personal story opens a unique window on the clandestine history of China's Republican period. This study uncovers the origins of the Cold War in the interactions of Chinese and American special services operatives who cooperated with Dai Li in the resistance to the Japanese invasion in the 1930s and who laid the groundwork for an ongoing alliance against the Communists during the revolution that followed in the 1940s. Frederic Wakeman Jr. illustrates how the anti-Communist activities Dai Li led altered the balance of power within the Chinese Communist Party, setting the stage for Mao Zedong's rise to supremacy. He reveals a complex and remarkable personality that masked a dark presence in modern China--one that still pervades the secret services on both sides of the Taiwan Strait. Wakeman masterfully illuminates a previously little-understood world as he discloses the details of Chinese secret service trade-craft. Anyone interested in the development of modern espionage will be intrigued by *Spymaster*, which spells out in detail the ways in which the Chinese used their own traditional methods, in addition to adapting foreign ways, to create a modern intelligence service.

Wuhan, 1938 Stephen R. MacKinnon, 2008-05-21 During the spring of 1938, a flood of Chinese refugees displaced by the Anti-Japanese War (1937-1945) converged on the central Yangzi valley tricity complex of Wuhan. For ten remarkable months, in a highly charged atmosphere of carnage, heroism, and desperation, Wuhan held out against the Japanese in what would become a turning point in the war—and one that attracted international attention. Stephen MacKinnon for the first time tells the full story of Wuhan's defense and fall, and how the siege's aftermath led to new directions in the history of modern Chinese culture, society, and politics.

4D Printing Fouad Sabry, 2021-11-11 What Is 4D Printing 3D printing, a type of additive manufacturing, is regarded as one of the most disruptive inventions in modern manufacturing. It has fundamentally altered the way components and equipments are made, as well as their design and development, in the industry. 3D printing enables manufacturers and researchers to create sophisticated shapes and structures that were previously thought to be impossible to create using traditional production methods. Over the previous three decades, 3D printing technology has seen constant breakthroughs and has changed dramatically. Despite its ability to generate sophisticated, bio-inspired, multi-material designs, 3D printing is not yet suitable for mass production. The addition of a fourth dimension to 3D printing technology is known as 4D Printing. With this new dimension, 3D printed things can change shape independently of environmental stimuli such as light, heat, electricity, magnetic field, and so on. Printed items alter shape dynamically dependent on the needs and demands of the circumstance by incorporating the dimension of time, with no electromechanical or moving parts. The ability of 3D printed things to change shape over time in reaction to specific stimuli is based on the material's ability to transform over time in response to specific stimuli, and it does not require human interaction to facilitate the process. The growing demand for flexible products in a variety of applications, such as self-folding packaging and adaptable wind turbines, has spurred the rise of 4D printing. How You Will Benefit (I) Insights, and validations about the following topics: Chapter 1: 4D Printing Chapter 2: Four-Dimensional Product Chapter 3: Responsive Architecture Chapter 4: Responsive Computer-Aided Design Chapter 5: 3D Printing Chapter 6: 3D Modeling Chapter 7: 3D Scanning Chapter 8: 3D Printing Marketplace Chapter 9: 3D Bioprinting Chapter 10: 3D Food Printing Chapter 11: 3D Manufacturing Format Chapter 12: 3D Printing Speed Chapter 13: 3D Systems (II) Answering the public top questions about 4D printing. (III) Real world examples for the usage of 4D printing in many fields. (IV) 17 appendices to explain, briefly, 266 emerging technology in each industry to have 360-degree full understanding of 4D printing' technologies. Who This Book Is For Professionals, undergraduate and graduate students, enthusiasts, hobbyists, and those who want to go beyond basic knowledge or information for any kind of 4D printing.

The Role of Henri Borel in Chinese Translation History Audrey Heijns, 2020-12-29 Against the historical background of Chinese translation in the West and the emergence of several prominent European translators of China, this book examines the role of a translator in terms of cross-cultural communication, the image of the foreign culture in the minds of the target audience, and the influence of their translations on the target culture. With the focus on the career and output of the Dutch translator Henri Borel (1869–1933), this study investigates different aspects of the role of translator. The investigation is carried out by analysing texts and probing the achievements and contributions of the translator, underpinned by documents from the National Archives and the Literature Museum in the Hague, the Netherlands. Based on the findings derived from this study, advice is offered to those now involved in the promotion and translation of Chinese culture and literature. It will make an important contribution to the burgeoning history of Chinese translation. This book will be of interest to anyone with an interest or background in the translation history of China, the history of sinology in the West, and the role of translators.
