The Mighty Wave He Jin, The translators, Tan Jing Quee, Loh Miaw Gong and Hong Lysa have helped revive this almost lost Singapore novel - *Ju Lang*, was its original title - to add it to the country's literary heritage. The novel's central feature is the anti-colonial movement against the British in the Singapore of the early 1950s. It follows a group of middle class students who started campaigning in 1954 for exemption from national service imposed by their British rulers and ends with the triumph of their party in the 1959 elections.

Beloved Sa Mi J. Hong,2018-07-20 Love is all that is certain... As a fifteen-year-old coming of age during the Japanese colonial period in Korea (1910-1945), Sa Mi revels in her status as her parents' youngest and most beloved daughter as she seeks to stave off her recent ascent into womanhood. Fate's mighty hand, however, strikes down, leaving Sa Mi to grasp at love and memory as her life makes an abrupt and inevitable turn. *Beloved Sa Mi* is Book One of the series *A River Han*. This historical family drama follows Sa Mi as she navigates her life and raises her growing family amidst the threat of the Japanese and a society upended. Throughout her trials, her mother's words regarding the certainty of love and love alone, echo within Sa Mi as she finds herself constrained in her roles as a wife to a man who cannot control his vice, and as a mother to a growing arsenal of strangers. At the end of the colonial period, Sa Mi's children are forced to reckon with a new world order, a social status that is no longer relevant, and an ideological conflict that threatens to split their country and families apart. *Beloved Sa Mi* provides a glimmer into the folly, frailty, and fortitude of the human heart.

Year of the Shanghai Shark Mo Zhi Hong,2008-06-01 Hai Long is a teenager living in the Chinese city of Dalian. It's the year of the SARS epidemic in China. This is a modern China that's eye-catchingly contemporary. Hai Long and his mates drink Coca-Cola and eat American fast food. They watch American NBA basketball on television and argue whether Michael Jordan is the greatest player ever. They go to English language lessons and hilariously mock Karl, their hopelessly naïve Canadian teacher, who drinks too much beer and is just dying to get away to Thai beaches to hang out with German babes. This is also the year in which Hai Long leaves school to learn the unlikely trade of his uncle. 'Uncle' has many books, but he's actually a highly successful professional pick-pocket who specialises in robbing dazed foreigners - Koreans and Japanese as well as Europeans - and makes special trips to Beijing for the purpose. As we meet a series of colourful characters in Hai Long's life and hang out with him and his mates, we also watch the teenager being trained in the ways of the pick-pocket. This is a sophisticated story of China's new generation severing ties with their cultural past, and rich with a fascinating array of colourful characters who frequent their inner-city apartment block - from Gambler Dang, a high stakes Ma Jiang player, to Fish, a peasant from the countryside and an unlikely friend, and finally Uncle, whose shadowy occupation exerts an irresistible pull on Hai Long's life . . . An accessible yet deceptively clever novel from an electric new voice.

The Little Red Cliff Yeo Hong Eng,2014-08 The Little Red Cliff portrays life in the 1950s and 1960s in Tanah Merah Kechil (Little Red Cliff) in a corner of Bedok District along the eastern coast of Singapore. Author Yeo Hong Eng chronicles the story of his family, the Yeo family, as they struggled to make a living during the lean years after the Japanese Occupation. He describes in detail how his parents developed the land for farming and exploited other available resources, such as sand mining during rainy seasons, until they were forced to leave the land in 1963. He also explains how they processed coconuts into cooking oil and bamboo into food, materials for building trellises, farming accessories, and basic toys. Whether they were working in animal husbandry or in vegetable cultivation, his grandmother and parents used the age-old methods passed down from their parents

and grandparents to work with the land and their animals. What's more, they made sure to take time from their work to celebrate important festivals, entertainment, and the joys and sorrows of everyday life. They attended wayangs (street plays), flew kites, and made their own playthings-shuttles, spinners, sling shots, and musical instruments-with whatever raw materials they had on hand. In *The Little Red Cliff*, Yeo Hong Eng shares a description of family life in Singapore in the mid-twentieth century-its lows and highs, its struggles and joys.

Soft Material-Enabled Electronics for Medicine, Healthcare, and Human-Machine Interfaces Jae-Woong Jeong,Woon-Hong Yeo,2020-03-13 Soft material-enabled electronics offer distinct advantage, over conventional rigid and bulky devices, for numerous wearable and implantable applications. Soft materials allow for seamless integration with skin and tissues due to enhanced mechanical flexibility and stretchability. Wearable devices, such as sensors, offer continuous, real-time monitoring of biosignals and movements, which can be applied in rehabilitation and diagnostics, among other applications. Soft implantable electronics offer similar functionalities, but with improved compatibility with human tissues. Biodegradable soft implantable electronics are also being developed for transient monitoring, such as in the weeks following surgery. To further advance soft electronics, materials, integration strategies, and fabrication techniques are being developed. This paper reviews recent progress in these areas, toward the development of soft material-enabled electronics for medicine, healthcare, and human-machine interfaces.

Flexible, Wearable, and Stretchable Electronics Katsuyuki Sakuma,2020-11-19 Remarkable progress has been achieved within recent years in developing flexible, wearable, and stretchable (FWS) electronics. These electronics will play an increasingly significant role in the future of electronics and will open new product paradigms that conventional semiconductors are not capable of. This is because flexible electronics will allow us to build flexible circuits and devices on a substrate that can be bent, stretched, or folded without losing functionality. This revolutionary change will impact how we interact with the world around us. Future electronic devices will use flexible electronics as part of ambient intelligence and ubiquitous computing for many different applications such as consumer electronics, medical, healthcare, and security devices. Thus, these devices have the potential to create a huge market all over the world. Flexible, Wearable, and Stretchable Electronics, provide a comprehensive technological review of the state-of-the-art developments in FWS electronics. This book offers the reader a taste of what is possible with FWS electronics and describes how these electronics can provide unique solutions for a wide variety of applications. Furthermore, the book introduces and explains new applications of flexible technology that has opened up the future of FWS electronics.
