Venture Capital and the Corporate Governance of Chinese Listed Companies Lin Zhang,2011-10-20 State-controlled listed companies have always dominated Chinese stock markets. As a result of the rampant scandals related to them, there have been voluminous academic efforts to explore their corporate governance, underpinned by agency costs. However, these studies have yet to examine the phenomenon from the perspective of venture capital and adaptive efficiency. During the last ten years, despite China's remarkable progress in the development of its venture capital market, its domestic venture capital has been marginalized by American competitors. Given the different performance between them, the author contends that the corporate governance system of Chinese state-controlled listed companies has hampered the performance of the institutional factors which are responsible for the prosperity of American venture capital in Chinese venture capital markets. With the practice of American venture capital as the mirror, he empirically demonstrates that Chinese domestic venture capital lacks the four factors related to the success of their American counterparts: large and independent funding, application of incentive mechanisms, efficient exit channels, and a high risk tolerance level. More importantly, these defects as a whole are closely linked to the corporate governance of state-controlled listed companies. Considering the potential negative consequences on economic and social development, the author identifies policy reforms underway to harmonize agency costs and adaptive efficiency.

Joint Ventures in the People's Republic of China Margaret M. Pearson,1992-09-21 When Chinese leaders announced in late 1978 that China would open to the outside world, they embarked on a strategy for attracting private foreign capital to spur economic development. At the same time, they were concerned about possible negative repercussions of this policy. Margaret Pearson examines government efforts to control the terms of foreign investment between 1979 and 1988 and, more broadly, the abilities of socialist states in general to establish the terms of their own participation in the world economy. Drawing on interviews with Chinese and foreigners involved in joint ventures, Pearson focuses on the years from 1979 through 1988, but she also comments on the fate of the open policy following the economic retrenchment and political upheavals of the late 1980s. Since the policy of 'opening' was launched in Beijing in 1979 some Chinese leaders have favoured foreign investment, while others have feared that it would carry ideas and institutions that would corrupt Chinese socialism. This study of Chinese policies toward foreign-invested enterprises (FIFs) during the 1980s broadly charts significant changes in the impact of these competing views on policy. . . . Pearson's overview and analysis provide thought-provoking perspectives. . . . Pearson furnishes excellent evidence that throughout the 1980s the pressure for reform was so great that the conservatives had to retreat repeatedly, despite their concerns about the decline of collectivist values and the Maoist dream.--Stanley Lubman, The China Quarterly

Economic Development in Modern China Before 1949 Guan Quan,2023-07-31 As the first volume of a two-volume set on Chinese economic history, this book investigates Chinese economic development between 1912 and 1949 and unravels the overall level during that time. From the perspective of development economics, the two-volume set studies the economic history and development of China since 1912, with a focus on the quantitative analysis of economic activities. Comprised of two core parts, this first volume, centering on the period of the Republic of China, first describes the historical process and characteristics of the economy at different stages and then looks into the momentum and inner logic that underpin the economic development. The former part covers issues of agriculture, industry, population, and labour force, urbanization, price changes, people's consumption and living standard,

regional difference, etc. The latter part includes discussions on natural and human resources, capital formation and technological progress, the role of government and finance, international trade, and foreign capital. This title will be an interesting read for scholars and students working on Chinese economic history, the Chinese economy, and modern Chinese society.

International Joint Ventures in China Y. Yan, 1999-10-10 Corporate governance, namely the relationship between the ownership and control of firms, takes on new dimensions in the case of international joint ventures operating in the special context of China. The present study contributes a new examination of this relationship, firstly through its conceptual refinement, and secondly through original empirical research. It develops the concept of ownership as suited to joint ventures, in which account is taken of non-capital resourcing by foreign and Chinese partners.

The Geopolitics of Chinese Internets Jack Linchuan Qiu, Peter K. Yu, Elisa Oreglia, 2024-02-22 Featuring leading scholars on 'Chinese internets' - in the plural - from around the world, this interdisciplinary book explores the changing digital landscape in China and provides insight into contemporary Chinese techno-geopolitics. Policymakers, commentators and the mass media have widely viewed 'Chinese tech' as a unitary and statist monolith. This predominant view, however, is not only incomplete but has become increasingly obsolete. Using a pluralist and multilayered approach to analysing Chinese techno-geopolitics, this volume addresses the following important questions: Who are the key players in 'Chinese internets' today? What role do government agencies, state-owned enterprises, private companies and individual netizens play? How do 'Chinese internets' operate at the global, regional, national or local levels? How are external world or regional events influencing or being influenced by geopolitical patterns within China? The Geopolitics of Chinese Internets will be a key resource for policymakers, scholars, researchers and practitioners interested in Chinese techno-geopolitics and the changing digital landscape in China. This book was originally published as a special issue of Information, Communication & Society.

Industrialization and China's Rural Modernization Dong Fureng, 2016-07-27 This book analyses China's historical experience of industrialization. It adopts a critical stance towards China's development strategy and proposes an alternative approach, outlining its main features. Due to the great importance and special problems of China's rural modernization, special attention is devoted to analysis of the rural sector. Many of China's rural socio-economic problems are similar to those encountered in other developing countries. It is intended that the book will increase understanding of China's socio-economic development as well as contributing to wider debates in the theory of economic development.

Economic Developments in Contemporary China Ian Jeffries, 2010-07-23 China's role in global affairs today continues to rise. This book provides an authoritative, comprehensive and detailed overview of contemporary economic developments in China. Key topics include agriculture; the market gradually replacing central planning; the global financial crisis; the reform of state-owned industrial enterprises; the non-state sectors; the 'open-door' policy (including the WTO, exchange rate policy, and inward and outward direct foreign investment); and China's economic performance in general. The book continues - and adds to - the overview of developments up to May 2006 which were covered in the author's *China: A Guide to Economic and Political Developments* (2006), and is the companion volume to *Political Developments in Contemporary China: A Guide* (2010) - both published by Routledge.

China's Technological Leapfrogging and Economic Catch-up Keun Lee, 2021-12-14 After the miraculous economic growth known as the Beijing Consensus, China is now facing a slowdown. The attention has moved to the issue of the middle income trap. This book deals with this interesting issue in the context of China. It also discusses China's limitations and future prospects, especially after the rise of a new cold war between China and the US, namely the question of whether China would fall into another trap called the Thucydides trap, or conflict with the existing hegemon as a rising power. In sum, this book plays around three key terms, namely, the Beijing Consensus, the Middle Income Trap, and the Thucydides trap, and applies a Schumpeterian approach to these concepts. It also conducts a comparative analysis that examines China from an economic catch-up perspective. An economic catch-up starts from learning and imitating a forerunner, but finishing the race successfully requires taking a different path along the road. This act is also known as leapfrogging, which implies a latecomer doing something different from, and often ahead of, a forerunner. Technological leapfrogging may lead to technological catch-up, which means reducing the technological gap, and then finally to economic catch-up in living standards (per capita income) and economic size (GDP: economic power). This linkage from technological leapfrogging and catch-up to economic catch-up corresponds exactly with a similar linkage from the Beijing Consensus to escaping (or not) the middle income and the Thucydides traps. One conclusion from this book is that China's successful rise as a global industrial power has been due to its strategy of technological leapfrogging, which has enabled China to move beyond the middle income trap and possibly the Thucydides trap, although at a slower speed.

Management Issues in China: Volume 2 John Child, Yuan Lu, 2018-11-15 As the 1990s progressed, China began to emerge as an economic giant. The chapters in this book, first published in 1996, illustrate many aspects of

China's path to internationalization. They also raise important questions for further study. What becomes clear is that to succeed in China's business environment, foreign business strategists need to become better informed of the type of challenges that China presents.

China and the Global Business Revolution P. Nolan, 2001-07-26 China has used industrial policies to try to build large corporations that can challenge those based in more advanced countries. By the late 1990s the operational mechanism of China's large firms had seen large advances. Simultaneously, a revolution has taken place in global business systems, and China's large firms are even further behind the global leaders than when they began their reforms. The WTO will require China to operate rapidly on the 'global playing field' in competition with the world's leading corporations, and this increased gap presents a deep challenge for China's business and political leaders. Peter Nolan presents here the first in-depth case studies of China's large corporations under economic reform, combined with systematic benchmarking of these firms against the world's leading corporations. The book is an unrivalled resource of information on Chinese businesses, and also leads the reader to consider the impact of China's response to its current challenges not only on China itself, but on the wider global economy.

Mao's Road to Power Stuart Schram, Timothy Cheek, Roderick MacFarquhar, 2015-07-16 This eighth volume covers the period 1942 to 1945 when Mao asserted his status as the incarnation and symbol of the Chinese Revolution and the sinification of Marxism-Leninism.

The Revival of Private Enterprise in China Shunfeng Song, 2016-02-24 The re-emergence of private enterprises is one of the most important factors in China's recent economic development. They will play a key role in maintaining China's high growth rate and honouring its commitments to the WTO. Despite this they face obstacles to growth, including borrowing restrictions, high taxes, ineffective legal protection and lack of technical and information support. The authors in this book discuss these obstacles and propose measures for improving private enterprise development. They consider how private enterprises can help China mitigate its macroeconomic problems, such as unemployment, income inequality, financial disintermediation and cyclical boom and bust. Finally they examine the lessons to be learnt from other countries in promoting privatization.
