*Settlement, Society and Cognition in Human Evolution* Fiona Coward,Robert Hosfield,Matt Pope,Francis Wenban-Smith,2015-01-26 This volume provides a landscape narrative of early hominin evolution, linking conventional material and geographic aspects of the early archaeological record with wider and more elusive social, cognitive and symbolic landscapes. It seeks to move beyond a limiting notion of early hominin culture and behaviour as dictated solely by the environment to present the early hominin world as the outcome of a dynamic dialogue between the physical environment and its perception and habitation by active agents. This international group of contributors presents theoretically informed yet empirically based perspectives on hominin and human landscapes.  
*Tone in Yongning~Na* Alexis Michaud,2017-04-26 Yongning Na, also known as Mosuo, is a Sino-Tibetan language spoken in Southwest China. This book provides a description and analysis of its tone system, progressing from lexical tones towards morphotonology. Tonal changes permeate numerous aspects of the morphosyntax of Yongning Na; they are not the product of a small set of phonological rules, but of a host of rules that are restricted to specific morphosyntactic contexts. Rich morphotonological systems have been reported in this area of Sino-Tibetan, but book-length descriptions remain few. This study of an endangered language contributes to a better understanding of the diversity of prosodic systems in East Asia. The analysis is based on original fieldwork data (made available online), collected over the course of ten years, commencing in 2006.
