The Mystery of the Katyn Massacre Grover Furr, 2018-08 In April 1943, German authorities claimed that they had found the bodies of more than 4,000 Polish prisoners of war buried near Katyn, in the Western Soviet Union. The Polish exile government in London agreed with the Germans. In January, 1944, Soviet authorities issued a report claiming that the Germans had murdered the Polish POWs. In 1990-92 Soviet, then Russian authorities agreed that the Soviets were indeed the guilty party. But by 2010 serious evidence had been discovered that cast doubt on Soviet guilt. There has never been an objective, thorough study of this mystery - until now. All mainstream accounts blame the USSR - Stalin - for the deaths, while all the evidence points in the opposite direction. Grover Furr has identified, obtained, and studied all the evidence, and has also studied all the supposedly authoritative scholarly accounts of Katyn, with skill and - what is most important - with objectivity. In this book he lays out the evidence and

solves this mystery for once and for all.

African Military History and Politics Y. Alex-Assensoh, 2002-01-11 Africa's former colonial masters, including Great Britain; France, Portugal and Spain, trained members and leaders of the various colonial Armed Forces to be politically non-partisan. Yet, the modern-day Armed Forces on the continent, made up of the Army, Police, Air Force and Navy, have become so politicized that many countries in Africa are today ruled or have already been ruled by military dictators through coups d'etat, occasionally for good reasons as the book points out. This book traces the historical-cum-political evolution of these events, and what bodes for Africa, where the unending military incursions into partisan politics are concerned.

Androids, Humanoids, and Other Science Fiction Monsters Per Schelde, 1994-07 Unlike science fiction literature, science fiction film has until now been largely neglected as a genre worthy of study and scholarship. *Androids, Humanoids, and Other Folklore Monsters* explores science fiction (sf) film as the modern incarnation of folklore, emblematic of the struggle between nature and culture-but with a new twist.

Posthumanism Pramod K. Nayar, 2014 This timely book examines the rise of posthumanism as both a material condition and a developing philosophical-ethical project in the age of cloning, gene engineering, organ transplants and implants. Nayar first maps the political and philosophical critiques of traditional humanism, revealing its exclusionary and 'speciesist' politics that position the human as a distinctive and dominant life form. He then contextualizes the posthumanist vision which, drawing

upon biomedical, engineering and techno-scientific studies, concludes that human consciousness is shaped by its co-evolution with other life forms, and our human form inescapably influenced by tools and technology. Finally the book explores posthumanism's roots in disability studies, animal studies and bioethics to underscore the constructed nature of 'normalcy' in bodies, and the singularity of species and life itself. As this book powerfully demonstrates, posthumanism marks a radical reassessment of the human as constituted by symbiosis, assimilation, difference and dependence upon and with other species. Mapping the terrain of these far-reaching debates, Posthumanism will be an invaluable companion to students of cultural studies and modern and contemporary literature.
