Soper, 2014-10-04 A Do-It-Yourself Guide To

Troubleshooting and Repairing Your EASY, comprehensive technology troubleshooter! PCs, smartphones, tablets, networks, cameras, home theater and more—all in one book! We all use technology—and we all have problems with it. Don't get frustrated... and don't waste money on costly repair or support calls! Solve the problems yourself, with the one guide that makes it easy: *The PC and Gadget Help Desk*. Using clear pictures, handy "symptom tables," and easy-to-use flowcharts, Mark Edward Soper walks you step-by-step through identifying, solving, and preventing hundreds of today's most aggravating tech problems. Soper covers all your major platforms: iPhones, iPads, Android devices, Windows systems, and more. He even helps you fix the weird problems that happen when you use them together! Regain lost Internet access and fix broken Wi-Fi connections Solve problems with viewing and sharing media or other files Track down power problems wherever they arise Troubleshoot printing problems and print from smartphones or tablets Fix missing video or audio on your HDTV or home theater system Get syncing working right on your Apple or Android device Improve your PC's 3D gaming performance Identify and replace flaky memory chips Prevent overheating that can damage your equipment Solve common problems with digital cameras and DV camcorders Troubleshoot iOS or Android antennas, updates, screens, and connectivity Get FaceTime working right on your iPhone or iPad Troubleshoot eReaders and display your eBooks on additional devices Sensibly decide whether to upgrade, repair, or replace Mark Edward Soper has spent 30 years as an instructor and corporate trainer, helping thousands of people work more happily with personal

technology. He is the author of *PC Help Desk in a Book*, and is the co-author of Leo Laporte's *PC Help Desk*, as well as more than 25 other books on Windows, digital imaging, networking, the Internet, IT certification, and computer troubleshooting. Soper is a CompTIA A+ Certified computer technician and Microsoft Certified Professional. **BONUS ONLINE VIDEOS:** Includes access to free, studio-quality how-to videos that make troubleshooting and repair even easier!

The PC and Gadget Help Desk Mark Edward

Soper,2014-08-27 Offers extensive guidance for troubleshooting and repairing a wide variety of electronic devices on diverse platforms, including PCs, smartphones, tablets, networks, cameras, home theaters, and ereaders.

The Dragon Carousel Novella Genelza,2012-11-01

Written and illustrated by an eleven-year-old, this book takes you along for a ride in the life of Lily Chen, a young Chinese American girl growing up in San Francisco, California. When Lily's life turns upside down, will she be able to find the strength to overcome her obstacles?

Web Information Retrieval Stefano Ceri,Alessandro

Bozzon,Marco Brambilla,Emanuele Della Valle,Piero Fraternali,Silvia Quarteroni,2013-08-30 With the proliferation of huge amounts of (heterogeneous) data on the Web, the importance of information retrieval (IR) has grown considerably over the last few years. Big players in the computer industry, such as Google, Microsoft and Yahoo!, are the primary contributors of technology for fast access to Web-based information; and searching capabilities are now integrated into most information systems, ranging from business management software and customer relationship systems to social networks and mobile phone applications. Ceri and his co-authors aim at taking their readers from the foundations of modern information retrieval to the most advanced challenges of

Web IR. To this end, their book is divided into three parts. The first part addresses the principles of IR and provides a systematic and compact description of basic information retrieval techniques (including binary, vector space and probabilistic models as well as natural language search processing) before focusing on its application to the Web. Part two addresses the foundational aspects of Web IR by discussing the general architecture of search engines (with a focus on the crawling and indexing processes), describing link analysis methods (specifically Page Rank and HITS), addressing recommendation and diversification, and finally presenting advertising in search (the main source of revenues for search engines). The third and final part describes advanced aspects of Web search, each chapter providing a self-contained, up-to-date survey on current Web research directions. Topics in this part include meta-search and multi-domain search, semantic search, search in the context of multimedia data, and crowd search. The book is ideally suited to courses on information retrieval, as it covers all Web-independent foundational aspects. Its presentation is self-contained and does not require prior background knowledge. It can also be used in the context of classic courses on data management, allowing the instructor to cover both structured and unstructured data in various formats. Its classroom use is facilitated by a set of slides, which can be downloaded from www.search-computing.org.

Search Computing Stefano Ceri,Marco

Brambilla,2010-04 Containing detailed papers on search computing, this book includes some visionary contributions on the latest trends and explores the background and related technologies. The papers are written by leading scientists and contain the latest results in the field.

Data Management in Pervasive Systems Francesco Colace, Massimo De Santo, Vincenzo Moscato, Antonio Picariello, Fabio A. Schreiber, Letizia Tanca, 2015-10-17 This book contributes to illustrating the methodological and technological issues of data management in Pervasive Systems by using the DataBenc project as the running case study for a variety of research contributions: sensor data management, user-originated data operation and reasoning, multimedia data management, data analytics and reasoning for event detection and decision making, context modelling and control, automatic data and service tailoring for personalization and recommendation. The book is organized into the following main parts: i) multimedia information management; ii) sensor data streams and storage; iii) social networks as information sources; iv) context awareness and personalization. The case study is used throughout the book as a reference example.

Relevant Query Answering over Streaming and Distributed Data Shima Zahmatkesh, Emanuele Della Valle, 2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data. In recent years, Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention. Answering in a timely fashion, i.e., reactively, is one of the most important performance indicators, especially when the distributed data is evolving. The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time. A limited refresh budget guarantees the reactivity of the system. Focusing on stream processing and Semantic Web, it appeals to scientists and graduate students in the field.

Semantic Web Services Dieter Fensel, Federico

Michele Facca, Elena Simperl, Ioan Toma, 2011-04-28 A paradigm shift is taking place in computer science: one generation ago, we learned to abstract from hardware to software, now we are abstracting from software to serviceware implemented through service-oriented computing. Yet ensuring interoperability in open, heterogeneous, and dynamically changing environments, such as the Internet, remains a major challenge for actual machine-to-machine integration. Usually significant problems in aligning data, processes, and protocols appear as soon as a specific piece of functionality is used within a different application context. The Semantic Web Services (SWS) approach is about describing services with metadata on the basis of domain ontologies as a means to enable their automatic location, execution, combination, and use. Fensel and his coauthors provide a comprehensive overview of SWS in line with actual industrial practice. They introduce the main sociotechnological components that ground the SWS vision (like Web Science, Service Science, and service-oriented architectures) and several approaches that realize it, e.g. the Web Service Modeling Framework, OWL-S, and RESTful services. The real-world relevance is emphasized through a series of case studies from large-scale R&D projects and a business-oriented proposition from the SWS technology provider Seekda. Each chapter of the book is structured according to a predefined template, covering both theoretical and practical aspects, and including walk-through examples and hands-on exercises. Additional learning material is available on the book website www.swsbook.org. With its additional features, the book is ideally suited as the basis for courses or self-study in this field, and it may also serve as a reference for researchers looking for a state-of-the-art overview of formalisms,

methods, tools, and applications related to SWS.

PC Help Desk in a Book Mark Edward Soper, 2002
More than ever, pc users are looking to revitalise their existing computers, performing cost-effective upgrades, and squeezing out a little more performance from a slow Internet connection instead of purchasing new computers. Using a unique, medical dictionary approach, this book walks users through the symptoms to diagnose and treat the problem. Problem-solving flow charts use symptoms to diagnose and repair problems, just like medical guides that help self-diagnose health problems. Broad coverage of common PC maladies found in the hardware, operating system, cabling, and BIOS. The reader need not be an expert to find and correct PC ailments. Graphical, two-colour interior makes heavy use of charts, photos, and illustrations to help treat a good PC that has developed problems. Mark Edward Soper has taught computer troubleshooting and other technical subjects to thousands of students from Maine to Hawaii since 1992. He is a longtime contributor to *Upgrading and Repairing PCs*, working on the 11 th , 12 th and 13 th Editions. He has contributed chapters to *Upgrading and Repairing Networks* Second Edition, *Special Edition Using Microsoft Windows Millennium Edition*, and *Special Edition Using Microsoft Windows XP* (both Home and Pro editions). Mark co-authored both the first and second editions of *Upgrading and Repairing PCs*, *Technician's Portable Reference*, *Upgrading and Repairing PCs: Field Guide*, and co-wrote *Upgrading and Repairing PCs: A+ Study Certification Guide*, Second Edition.

The Semantic Web: ESWC 2012 Satellite Events

Elena Simperl, Barry Norton, Dunja Mladenec, Emanuele Della Valle, Irini Fundulaki, Alexandre Passant, Raphaël Troncy, 2015 This book constitutes the thoroughly refereed

post-proceedings of the satellite events of the 9th International Conference on the Semantic Web, ESWC 2012, held in Heraklion, Crete, Greece, in May 2012. This volume contains 49 full papers and 13 short papers describing the posters and demonstrations. (SUGGESTION/ HELP needed).

Semantic Web Services Challenge Charles J.

Petrie, Tiziana Margaria, Holger Lausen, Michal Zaremba, 2008-11-27 This is an edited volume that develops a common understanding of the various technologies intended to facilitate the automation of mediation, choreography and discovery for Web Services using semantic annotations. The volume explores trade-offs among existing approaches, and reveals strengths and weaknesses of proposed approaches, as well as which aspects of the problem are not yet covered. The book is designed for a professional audience composed of practitioners and researchers in industry. Professionals can use it to evaluate SWS technology for their potential practical use. The book is also suitable for advanced-level students in computer science.

Semantic Web Enabled Software Engineering J.Z. Pan, Y.

Zhao, 2014-07-16 Over the last decade, ontology has become an important modeling component in software engineering. *Semantic Web Enabled Software Engineering* presents some critical findings on opening a new direction of the research of Software Engineering, by exploiting Semantic Web technologies. Most of these findings are from selected papers from the Semantic Web Enabled Software Engineering (SWESE) series of workshops starting from 2005. Edited by two leading researchers, this advanced text presents a unifying and contemporary perspective on the field. The book integrates in one volume a unified perspective on concepts and theories of connecting Software Engineering and Semantic Web. It presents state-

of-the-art techniques on how to use Semantic Web technologies in Software Engineering and introduces techniques on how to design ontologies for Software Engineering.

Emerging Web Services Technology Cesare Pautasso, Christoph Bussler, 2007-07-20 This book contains a collection of selected and revised papers originally presented at the Workshop on Emerging Web Service Technology (WEWST) held in conjunction with the 4th European Conference on Web Services (ECOWS'06) in Zurich, Switzerland, December 2006. It details the latest innovations, developments and results in Web Services research. In addition, the book records the evolution of important ideas emerging in the Web Services field.

Leo Laporte's PC Help Desk Leo Laporte, Mark Edward Soper, 2006 Nurse your PC back to health with a little help from Leo Laporte. Leo Laporte's PC Help Desk in a Book uses a unique, medical dictionary approach, complete with symptoms, diagnosis, and treatment for all of your common and not-so-common PC maladies. Flow-charts will help you correctly diagnose and treat such problems as: Windows installation woes Storage device tragedies Printer problems Pesky audio, video and general multimedia mayhem Keyboard and mouse afflictions Home networking headaches Core PC hardware issues Application failures Viruses, spyware and spam infections Don't waste time digging through paperwork only to find a tech-support line that is going to cost you an arm and a leg to cure your PC's ailments. Make your own house calls instead with Leo Laporte's PC Help Desk in a Book.

Web 2.0 & Semantic Web Vladan Devedic, Dragan Gašević, 2009-11-23 According to the W3C Semantic Web Activity [1]: The Semantic Web provides a common framework that allows data to be shared and reused across

application, enterprise, and community boundaries. This statement clearly explains that the Semantic Web is about data sharing. Currently, the Web uses hyperlinks to connect Web pages. The Semantic Web goes beyond that and focuses on data and envisions the creation of the web of data. On the Semantic Web, anyone can say anything about any resource on the Web. This is fully based on the concept of semantic - notations, where each resource on the Web can have an assigned meaning. This is done through the use of ontologies as a formal and explicit representation of domain concepts and their relationships [2]. Ontologies are formally based on description logics. This enables agents and applications to reason over the data when searching the Web, which has not previously been possible. Web 2.0 has gradually evolved from letting the Web users play a more active role. Unlike the initial version of the Web, where the users mainly “consumed” content, users are now offered easy-to-use services for content production and publication. Mashups, blogs, wikis, feeds, interface remixes, and social networking/tagging systems are examples of these well-known services. The success and wide adoption of Web 2.0 was in its reliance on social interactions as an inevitable characteristic of the use and life of the Web. In particular, Web 2.
