David W. Bebbington

Midland Schools ,1932

Evangelicalism in Modern Britain David W. Bebbington,2003-09-02 This major textbook is a newly researched historical study of Evangelical religion in its British cultural setting from its inception in the time of John Wesley to charismatic renewal today. The Church of England, the Church of Scotland and the variety of Nonconformist denominations and sects in England, Scotland and Wales are discussed, but the book concentrates on the broad patterns of change affecting all the churches. It shows the great impact of the Evangelical movement on nineteenth-century Britain, accounts for its resurgence since the Second World War and argues that developments in the ideas and attitudes of the movement were shaped most by changes in British culture. The contemporary interest in the phenomenon of Fundamentalism, especially in the United States, makes the book especially timely.

The Adventure Bible Handbook Zondervan Publishing,1996-03 This CD Rom allows children to travel through Bible pictures, stories, verses, and video clips to rescue Froggo from the grasp of Max, an evil computer virus.

Violence, Utopia and the Kingdom of God George Aichele,Tina Pippin,2002-01-31 This controversial book explores the presence of the fantastic in Biblical and related texts, and the influence of Biblical traditions on contemporary fantasy writing, cinema, music and art. The contributors apply a variety of critical concepts and methods from the field of fantasy studies, including the theories of Tolkien, Todorov, Rosemary Jackson and Jack Zipes, to Biblical texts and challenge theological suppositions regarding the texts which take refuge in science or historiography. Violence, Utopia and the Kingdom of God presents a provocative and arresting new analysis of Biblical texts which draws on the most recent critical approaches to provide a unique study of the Biblical narrative.

History and Torah Jacob Neusner,1965

The Crisis of the Self in the Age of Information Raymond Barglow,1994 This text draws on the experiences, hopes and dreams of computer users to explore the personal, psychological and philosophical implications for a post-industrial, information-technology-led society.

Technology as Magic Richard Stivers,Peter Stirk,2001-08-01 What gives the mass media, particularly advertising and television, their extraordinary power over our lives, so that even the most jaded and sophisticated among us are troubled and fascinated by their allure? The secret, according to Richard Stivers, in this brilliant new book, lies in the curious relationship between technology and magic. Stivers argues the two are now related to one another in such a way that each has taken on important characteristics of the other. His contention is that our expectations for technology have become magical to the point that they have generated a multitude of imitation technologies that function as magical practices. These imitation technologies flourish in the fields of psychology, management administration, and the mass media, and their paramount purpose in human adjustment and control. Advertising and television programs, in particular, contain the key magical rituals of our civilization.In a fascinating analysis of television programming, Stivers shows how various genres--news, sports, game shows, soap operas, sitcoms, etc.--have their distinct mythological symbols. Through dramatized information, they symbolically connect consumer goods and services to desired outcomes--the utopian goals of success, happiness, and health--thus enveloping technology, both real and imitation, in a magical cocoon.

The Myth of Digital Democracy Matthew Hindman,2009 Matthew Hindman reveals here that, contrary to popular belief, the Internet has done little to broaden political discourse in the United States, but rather that it empowers a small set of elites - some new, but most familiar.
