The 3rd International Conference on Digital Economy and Computer Applications (DECA 2023) will be held on September 22–24, 2023 in Shanghai, China. Digital economy is the main economic form after agricultural economy and industrial economy. An Overview and Management of Multiple Chronic Conditions Sevgi Akarsu,2020-11-26
“Multiple chronic conditions,” also known as multimorbidity, is a special situation frequently encountered by global healthcare professionals, especially internists/primary care physicians, neurologists, respiratory/pulmonologists, pain specialists, and oncologists, who spend more than three-quarters of their time in the treatment of chronic diseases and direct patient care. Thus, the increasing need for multidisciplinary approaches in the management of multiple chronic medical problems, rather than focusing on individual diseases, should be borne in mind by global healthcare professionals, public health professionals, healthcare providers, health policymakers, and pharmaceutical industries. This book is an up-to-date source of information for physicians, residents, and advanced medical students seeking a broader understanding of managing chronic disease clusters.

Early-stage Lung Cancer Xiangpeng Zheng,Ming Li,Guozhen Zhang,2018-01-30 This book discusses major issues and advances in the diagnosis and treatment of incidentally detected early-stage lung cancer (ESLC). In Part I, pathology and radiology experts comprehensively review the state-of-the-art advances in individual research fields, and offer an update on the cross-sectional anatomy of the lung and post-processing techniques for CT imaging. Part II focuses on the imaging features, differential diagnosis and radiologic-pathologic correlations of ESLCs in the categories pGaN,

mGGN and solid nodules in compliance with the Guidelines on Lung Cancer Screening from the National Comprehensive Cancer Network (NCCN). Part III briefly introduces therapeutic management strategies for ESLCs, including surgical and non-surgical approaches, for instance stereotactic ablative radiation therapy (SABR) and radiofrequency ablation (RFA). Lastly, the authors have meticulously prepared 50 clinical cases of pathologically proven benign and malignant pulmonary nodules with in-depth discussion and experts' comments to further readers' understanding of practical imaging and management strategies of ESLCs.

Towards an Understanding of Tinnitus Heterogeneity Christopher Cederroth, Arnaud Norena, Berthold Langguth, Winfried Schlee, Sven Vanneste, Tobias Kleinung, Jose Antonio Lopez-Escamez, Pim van Dijk, Martin Meyer, Grant Searchfield, Peyman Adjaminan, Rilana Cima, Deborah Hall, Birgit Mazurek, Heidi Olze, Raj Sheekhawat, Nathan Weisz, Silvano Gallus, Jianxin Bao, Antonello Maruotti, Rüdiger Pryss, Manfred Reichert, Thomas Probst, Bård Støve, Myra Spiliopoulou, 2019-07-19

Tinnitus is the perception of a sound when no external sound is present. The severity of tinnitus varies but it can be debilitating for many patients. With more than 100 million people with chronic tinnitus worldwide, tinnitus is a disorder of high prevalence. The increased knowledge in the neuroscience of tinnitus has led to the emergence of promising treatment approaches, but no uniformly effective treatment for tinnitus has been identified. The large patient heterogeneity is considered to be the major obstacle for the development of effective treatment strategies against tinnitus. This eBook provides an inter- and multi-disciplinary collection of tinnitus research with the aim to better

understand tinnitus heterogeneity and improve therapeutic outcomes.

The Story of Han Xiangzi Erzeng Yang,2011-07-01 In this seventeenth-century Chinese novel, Han Xiangzi, best known as one of the Eight Immortals, seeks and achieves immortality and then devotes himself to converting his materialistic, politically ambitious Confucian uncle—Han Yu, a real historical figure—to Daoism. Written in lively vernacular prose interspersed with poems and songs, the novel takes its readers across China, to the heavens, and into the underworld. Readers listen to debates among Confucians, Daoists, and Buddhists and witness trials of faith and the performance of magical feats. In the mode of the famous religious novel *Journey to the West*, *The Story of Han Xiangzi* uses colorful characters, twists of plot, witty dialogue, and action suitable for a superhero comic book to convey its religious message—that worldly life is ephemeral and that true contentment can be found only through Daoist cultivation. This is the first translation into any Western language of Han Xiangzi *quanzhuan* (literally, *The Complete Story of Han Xiangzi*). On one level, the novel is a delightful adventure; on another, it is serious theology. Although *The Story of Han Xiangzi*'s irreverent attitude toward the Confucian establishment prevented its acceptance by literary critics in imperial China, it has remained popular among Chinese readers for four centuries. Philip Clart's introduction outlines the Han Xiangzi story cycle, presents Yang Erzeng in his social context, assesses the literary merits and religious significance of the text, and explores the theory and practice of inner alchemy. This unabridged translation will appeal to students of Chinese literature and to general readers who enjoy international fiction, as well as to readers with an interest in Daoism.

Metrics for Sustainable Business Scott R. Herriott, 2016-02-19 Metrics for Sustainable Business is the first book to give students a comprehensive understanding of sustainability in organizations from an accounting perspective. The book walks student through the steps for doing a sustainability assessment, and aims to develop them into financial analysts who understand sustainability reports, and are able to create or audit them. While most books focus on environmental issues, Herriott trains his gaze on the corporate and institutional perspective, covering measurement systems, how to evaluate and improve a standard, and conducting a life cycle assessment. Walking students through the programs of disclosure, the varying standards for corporate ratings, and organizational certification, allows them to grasp the tools for conducting a sustainability assessment and auditing reports. Chapters on accounting for greenhouse gas emissions, water use, and waste introduce students to the technical details in sustainability accounting, while a chapter on the philosophies of sustainability offers an answer to the question, Why are they asking us to report that? Richly demonstrated with practical examples and informative visuals, this book will serve students of sustainability, accounting, and integrated reporting.

Prehistoric Societies on the Northern Frontiers of China Gideon Shelach, 2016-04-08 The northern borders of China - known as the Northern zone - were a key area of interaction between sedentary and nomadic people during the late second and early first millennium BCE. During this period the region's unique economy, socio-political systems, local cultures and identities took shape. 'Prehistoric Societies on the Northern Frontiers of China' analyses the archaeological record to examine the changes that took place in Northern China in the first millennium. Drawing on field work in the Chifeng area of Inner Mongolia, the book explores dramatic changes in the construction of identities alongside more gradual changes in subsistence strategies and political organization. The book is unique in integrating the archaeological data and historical records of this period with anthropological theory to examine the role of identity construction and the use of symbol in the shaping of East Asian society.

The Archaeology of China Li Liu, Xingcan Chen, 2012-04-30 Past, present and future The archaeological materials recovered from the Anyang excavations ... in the period between 1928 and 1937 ... have laid a new foundation for the study of ancient China (Li, C. 1977: ix). When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928, the historicity of the Shang dynasty was confirmed beyond dispute for the first time (Li, C. 1977: ix-xi). This excavation thus marked the beginning of a modern Chinese archaeology endowed with great potential to reveal much of China's ancient history.. Half a century later, Chinese archaeology had made many unprecedented discoveries which surprised the world, leading Glyn Daniel to believe that a new awareness of the importance of China will be a key development in archaeology in the decades ahead (Daniel 1981: 211). This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that the Golden Age of Chinese archaeology is arriving (Su, B. 1994: 139--140). In recent decades, archaeology has continuously prospered, becoming one of the most rapidly developing fields in social science in China--
