Love, Inc. Laurie Essig, 2019-02-05 The notion of “happily ever after” has been ingrained in many of us since childhood—meet someone, date, have the big white wedding, and enjoy your well-deserved future. But why do we buy into this idea? Is love really all we need? Author Laurie Essig invites us to flip this concept of romance on its head and see it for what it really is—an ideology that we desperately cling to as a way to cope with the fact that we believe we cannot control or affect the societal, economic, and political structures around us. From climate change to nuclear war, white nationalism to the worship of wealth and conspicuous consumption—as the future becomes seemingly less secure, Americans turn away from the public sphere and find shelter in the private. Essig argues that when we do this, we allow romance to blind us to the real work that needs to be done—building global movements that inspire a change in government policies to address economic and social inequality.

Economics: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2015-06-30 Organizations, governments, and

corporations are all concerned with distributing their goods and services to those who need them most, consequently benefiting in the process. Only by carefully considering the interrelated nature of social systems can organizations achieve the success they strive for. *Economics: Concepts, Methodologies, Tools, and Applications* explores the interactions between market agents and their impact on global prosperity. Incorporating both theoretical background and advanced concepts in the discipline, this multi-volume reference is intended for policymakers, economists, business leaders, governmental and non-governmental organizations, and students of economic theory.

Interdependencies in the Discovery and Adoption of Facebook Applications Philip Mayrhofer, 2012-12-13 Facebook Platform is a prominent example of an internet-based service for which third-party developers can offer small add-on programs, which are often referred to as applications. The distribution of success of applications is highly skewed. This market structure with few blockbuster applications and a long-tail of unpopular ones is common in the media, entertainment and software industries. Philip Mayrhofer compiled individual-level survey data as well as an original panel data set of Facebook applications in order to examine the market for Facebook applications in detail. Specifically he identifies interdependencies such as bandwagon effects between users and spillovers between applications and analyzes whether they contribute to the concentrated market structure.

How to Fall in Love with Anyone Mandy Len Catron, 2017-06-27 "A beautifully written and well-researched cultural criticism as well as an honest memoir" (Los Angeles Review of Books) from the author of the popular New York Times essay, "To Fall in Love with Anyone, Do This," explores the romantic myths we create and explains how they limit our ability to

achieve and sustain intimacy. What really makes love last? Does love ever work the way we say it does in movies and books and Facebook posts? Or does obsessing over those love stories hurt our real-life relationships? When her parents divorced after a twenty-eight year marriage and her own ten-year relationship ended, those were the questions that Mandy Len Catron wanted to answer. In a series of candid, vulnerable, and wise essays that takes a closer look at what it means to love someone, be loved, and how we present our love to the world, “Catron melds science and emotion beautifully into a thoughtful and thought-provoking meditation” (Bookpage). She delves back to 1944, when her grandparents met in a coal mining town in Appalachia, to her own dating life as a professor in Vancouver. She uses biologists’ research into dopamine triggers to ask whether the need to love is an innate human drive. She uses literary theory to show why we prefer certain kinds of love stories. She urges us to question the unwritten scripts we follow in relationships and looks into where those scripts come from. And she tells the story of how she decided to test an experiment that she’d read about—where the goal was to create intimacy between strangers using a list of thirty-six questions—and ended up in the surreal situation of having millions of people following her brand-new relationship. “Perfect fodder for the romantic and the cynic in all of us” (Booklist), *How to Fall in Love with Anyone* flips the script on love. “Clear-eyed and full of heart, it is mandatory reading for anyone coping with—or curious about—the challenges of contemporary courtship” (The Toronto Star).

Lean Startup Marketing: Agile Product Development, Business Model Design, Web Analytics, and Other Keys to Rapid Growth Sean Ellis, 2012-09-11 ABOUT THE BOOK Each new startup I help take to market offers many potential rewards, but there are

risks too. The most obvious reward is the financial upside of equity in a successful company. But there are less tangible benefits like the thrill of being part of a team realizing the potential of their vision. Probably the most important long-term reward is that each startup success enhances my reputation and opens doors to additional startups with strong potential - while improving the skills I need to maximize these opportunities. This allows me to continue doing the most enjoyable job of my life. But the risks are very real. A startup in a bad space with a bad product won't be much fun to market - and I'll probably fail. And when the company flops, it will damage my reputation. Enough damage to my reputation and I'll have to figure out a new pursuit. Of course most people recognize that it's impossible to have a perfect startup record, but the opportunity cost of committing to the wrong startup means I won't have the bandwidth to take on a potentially hot company. Given these rewards and risks, I increasingly find myself evaluating opportunities with a VC-like diligence. I've created an opportunity assessment worksheet that identifies key risks in the business. The standard format makes it easier to compare opportunities. One of the biggest risks of any business is the inability to raise capital, so early on, I set the requirement that I'll only work with companies that have recently raised a series A or large seed round. A very good VC can also help improve the odds, as they've achieved a better track record with their historical picks (and many would argue their added value). Beyond general business risks, I obviously need to be confident that it is a marketable business and one on which I can make a meaningful impact. The ideal category is what I refer to as a disruptor startup. These are businesses that enter an existing category with a breakthrough feature or very disruptive pricing model. My iterative, metrics driven marketing approach is

perfect for helping these types of businesses discover their ideal market, differentiate appropriately and identify viable customer acquisition drivers. EXCERPT FROM THE BOOK Demand Harvesting - The Easiest Driver For Startups I always begin a new startup marketing assignment by looking for any untapped existing demand. Demand harvesting is much easier than demand creation - and it has a faster sales cycle. You don't have to convince someone they need your category of product, you just need to be easier to find/buy and have a better value proposition than the other guys. The first question to ask is where would someone seek my product category? Twenty years ago the most obvious answer would have been the yellow pages, but today it is Google. A lot of information has been published on getting the most out of SEO or SEM and there are also many experts you can tap in this area. Beyond Google, I've found it is helpful to survey existing users for other places they would potentially look. It's great news when discover healthy demand for your product category. The next step is to analyze the solutions competing for that demand. The best situation is to discover heavy unmet demand and no competition. That is about as likely as winning the lottery, so don't count on it. More realistically, there will be a few companies with varying offers competing for that demand. In this case, you should hope for weak execution from these existing competitors. If you can be significantly more effective at extracting money from each prospect, you can afford a more prominent promotion at the initial point of connection and begin capturing market share. Believarexic J. J. Johnson,2015-10-06 Asking for help is only the first step Jennifer can't go on like this—binging, purging, starving, all while trying to appear like she's got it all together. But when she finally confesses her secret to her parents and is hospitalized at the Samuel Tuke Center, her journey is only beginning. As Jennifer progresses through her treatment, she learns to recognize her relationships with food, friends, and family—and how each relationship is healthy or unhealthy. She has to learn to trust herself and her own instincts, but that's easier than it sounds. She has to believe—after many years of being a believarexic. Using her trademark dark humor and powerful emotion, J. J. Johnson tells an inspiring story that is based on her own experience of being hospitalized for an eating disorder as a teenager. The innovative format—which tells Jennifer's story through blank verse and prose, with changes in tense and voice, and uses forms, workbooks, and journal entries—mirrors the protagonist's progress toward a healthy body and mind.

The Digital Dystopias of Black Mirror and Electric Dreams Steven Keslowitz,2019-12-24 This critical examination of two dystopian television series--Black Mirror and Electric Dreams--focuses on pop culture depictions of technology and its impact on human existence. Representations of a wide range of modern and futuristic technologies are explored, from early portrayals of artificial intelligence (Rossum's Universal Robots, 1921) to digital consciousness transference as envisioned in Black Mirror's San Junipero. These representations reflect societal anxieties about unfettered technological

development and how a world infused with invasive artificial intelligence might redefine life and death, power and control. The impact of social media platforms is considered in the contexts of modern-day communication and political manipulation.

Hedgehogs and Other Insectivores Steven Otfinoski, 2000 Questions and answers explore the world of insectivores, with an emphasis on hedgehogs.

Commander in Chief Geoffrey Perret, 2007 An award-winning presidential biographer and military historian explains that in choosing to fight un-winnable wars in Korea, Vietnam, and Iraq, Presidents Truman, Johnson, and George W. Bush collectively sought to establish a presidency so powerful that they have created a permanent threat to the Constitution.

The Monogamy Gap Eric Anderson, 2012-03-21 Whether straight or gay, most men start their relationships desiring monogamy. This is rooted in the pervasive notion that monogamy exists as a sign of true love. Yet despite this deeply held cultural ideal, cheating remains rampant. In this accessible book, Eric Anderson investigates why 78% of men he interviewed have cheated despite their desire not to. Combining 120 interviews with research from the fields of sociology, biology, and psychology, Anderson identifies cheating as a product of wanting emotional passion for one's partner, along with a steadily growing desire for emotionally-detached recreational sex with others. Anderson coins the term the monogamy gap to describe this phenomenon. Anderson suggests that monogamy is an irrational ideal because it fails to fulfil a lifetime of sexual desires. Cheating therefore becomes the rational response to an irrational situation. The Monogamy Gap draws on a range of concepts, theories, and disciplines to highlight the biological compulsion of our sexual urges, the social construction of the monogamous ideal, and the devastating chasm

that lies between them. Whether single or married, monogamous or open, straight or gay, readers will find *The Monogamy Gap* to be an enlightening, intellectually compelling, and provocative book.
