Distinction Between Daring and Craziness Abhinav Jain, 2014-12-20 This book contains a fictional story with a suspense thriller. All necessary spices are added. It is a bread and butter story for those who want extra twist point in climax.

Heroic Wives Rituals, Stories and the Virtues of Jain Wifehood M. Whitney Kelting, 2009-10-22 Although in Hinduism it is mainly used to refer to widow immolation, the term 'sati' means 'true woman' - a female hero. Whitney Kelting has learned that in Jainism satis appear as subjects of devotional hymns. This seems paradoxical, given that Jain spirituality is to disengage oneself from worldly existence and Jain devotionism is usually directed toward those souls who have reached perfect detachment. In fact, however, there is a vast corpus of popular texts, many of them written by prominent scholar-monks between the 16th and 18th centuries, illustrating the distinctly worldly virtues of devoted Jain wives. In this fieldwork-based study, Kelting explores the ways in which Jain women use sati narratives and rituals to understand wifehood as a choice, which these women's ongoing ritual practices continually shape. She focuses on eight well-known Jain sati narratives, recorded in both formal ritual contexts and in informal retellings, and also as read aloud from printed versions. She finds that one of the principal functions of Jain sati narratives is to contribute to a discourse of wifehood, which addresses the concerns of Jain laywomen within the Jain value system and provides a fertile context in which Jain women can explore their questions of virtue and piety.

Singing to the Jinas Mary Whitney Kelting, 2001 While Western Jain scholarship has focused on those texts and practices favoring male participation, the Jain community itself relies heavily on lay women's participation for religious education, the performance of key rituals, and the locus of religious knowledge. In this fieldwork-based study, Whitney Kelting attempts to reconcile these women's understanding of Jainism with the religion as presented in the existing scholarship. Jain women, she shows, both accept and rewrite the idealized roles received from religious texts, practices, and social expectation, according to which female religiosity is a symbol of Jain perfection. This volume describes these women's interpretations of their religion, not as folklore or popular religion, but as a theology that recreates Jainism in a form which honors their own participation.

It's in you too, my darling girl, and in me, and in every living creature, be it ever so small. Even the dirt I'm sweeping up now is stardust. Middle of Diamond India Shashank Mani,2023-09-15 Middle of Diamond India proposes a revolutionary idea - that India has long ignored its largest and most talented segment, citizens in the Tier 2 and Tier 3 districts, its Middle. The book reveals the hidden stories of

those in its Middle who have been ignored owing to their location and language. By examining India's revolutionary past, its culture, its citizens, its innovators, and its spirit, the book illuminates this Diamond shaped India. Replete with characters, anecdotes, insights, research and accounts of an annual pilgrimage on a special train-Jagriti Yatra, and an enterprise ecosystem established in Deoria district, the book outlines a new vision of India focussed on its rising Middle. It proposes a Banyan Revolution over the coming twenty-five years of Amrit Kaal, using the tool of enterprise or Udyamita that can ignite a national renaissance. The book argues that by recognizing and awakening the entrepreneurial vitality of those in small towns and districts, we can create meaning for millions of citizens and define a new modernity for India.

Use of AI, Robotics and Modelling tools to fight Covid-19 Arpit Jain, Abhinav Sharma, Jianwu Wang, Mangey Ram, 2022-09-01 The COVID-19 pandemic has hit the global at a colossal scale. With worldwide reported cases of 5.34 million it has led to severe impact on humanity. Being a highly contagious disease, it has given global health services their most severe challenge. Various countries are fighting to minimize the losses due to

the outbreak, however a common trait is enforcing lockdown, which has become the main defence mechanism. Researchers are working around the clock to find a breakthrough in the diagnostics and treatment of the pandemic. AI technology is useful for fast drug development and treatment. In the starting phase of COVID-19 pandemic, the medical fraternity in China diagnosed the virus using computed tomography (CT) and X-ray images due to the limitation of testing kits. Deep learning neural network model have also been used for COVID-19 diagnosis. AI assisted intelligent humanoid robots can be used to reduce the human contact and spread of COVID-19. In Italy robots have been used for measuring blood pressure, oxygen saturation and temperature of patients. Robots have also found applications in disinfecting and sterilizing of public places, COVID-19 testing, food and medicine delivery as well as entertaining patients in hospitals and quarantine centers, thereby reducing the workload of doctors and nurses. Prediction of the spread of virus and providing the guidelines or prevention measures is another AI application in COVID-19. Kaggle and GitHub are the two websites where the real-time data of COVID-19 is aggregated. This includes confirmed cases, active cases, cured cases and deaths in each country. This data set can be used for predicting the active cases across different regions of the world so that appropriate amount of health infrastructure can be made available to these places.
