**Systems Approaches to Nuclear Fusion Reactors** Frederick B. Marcus, 2023-01-01 This book offers an overall review, applying systems engineering and architecture approaches, of the design, optimization, operation and results of leading fusion experiments. These approaches provide a unified means of evaluating reactor design. Methodologies are developed for more coherent construction or evaluation of fusion devices, associated experiments and operating procedures. The main focus is on tokamaks, with almost all machines and their important results being integrated into a systems design space. Case studies focus on DIII-D, TCV, JET, WEST, the fusion reactor prototype ITER and the EU DEMO concept. Stellarator, Mirror and Laser inertial confinement experiments are similarly analysed, including reactor implications of breakeven at NIF. The book examines the engineering and physics design and optimization process for each machine, analysing their performance and major results achieved, thus establishing a basis for the improvement of future machines. The reader will gain a broad historical and up-to-date perspective of the status of nuclear fusion research from both an engineering and physics point of view. Explanations are given of the computational tools needed to design and operate successful experiments and reactor-relevant machines. This book is aimed at both graduate students and practitioners of nuclear fusion science and engineering, as well as those specializing in other fields demanding large and integrated experimental equipment. Systems engineers will obtain valuable insights into fusion applications. References are given to associated complex mathematical derivations, which are beyond the scope of this book. The general reader interested in nuclear fusion will find here an accessible summary of the current state of nuclear fusion.

Describing Cincinnatus recorded life and times, Hillyard traces the legends major interpretations from its origin amidst early Roman culture through contemporary times. In its impact on some of the worlds leading thinkers and leaders, such as Livy, George Washington, Henry Knox, Harry Truman, and others, the Cincinnatus legend is described in the many interesting forms it has taken over two millennia. Carried throughout the narrative is the timeless nature of the Cincinnatus ideal the central issues of the role of citizen and leader in society.

**Southern Cross** Reinhard Zimmermann, D. P. Visser, 1996 This book provides a history of some of the main institutions of South African private law and in so doing explores the process through which integration of the English common law and the continental civil law came about in that jurisdiction. Here is a book

aimed at both European and South African audiences. For European lawyers it provides a stimulating insight into the way the process of harmonization of private law has occurred in South Africa and may occur within the European Union. By analysing the historical evolution of the most important institutions of the law of obligations and the law of property the book demonstrates how the two legal traditions have been accommodated within one system. The starting point for each essay is the pure Roman-Dutch law as it was transplanted to the Cape of Good Hope in the years following 1652 (and as it has been examined in considerable detail in another volume edited by Robert Feenstra and Reinhard Zimmerman, published in 1992). The analysis focuses on how the Roman-Dutch law has been preserved, changed, modified or replaced in the course of the nineteenth century when the Cape became a British colony; and on what happened after the creation of the union of South Africa in 1910. Each essay therefore attempts, in the field of law with which it is dealing, to answer questions such as: what was the level of interaction between the civil law and the common law? What were the mechanisms that brought about the particular form of competition, coexistence or fusion that exists in that area of law? Is the process complete or is it still continuing? Is it possible to observe the emergence, from these two routes, of a genuinely South African private law? How is the result to be evaluated? In establishing reception patterns at the level of specific areas of law, they go beyond generalization about the compatibility of the two traditions and present evidence of a possible symbiosis of English and Continental law. For South African readers the principal value of the book is that it offers essays by the most prominent South African private lawyers reflecting on the history of their subjects. It therefore constitutes the first stage in the writing of a history of substantive private law in South Africa. So far the focus has mainly been on the so called external history of South African law, and such texts as there are on the development of the institutions of private law are often in Afrikaans and mainly to be found in unpublished theses. Thus this book fulfils a real need for those teaching South African private law and legal history. Although the volume investigates a specific aspect of the making of modern South African law it is imperative not to lose sight of the fact that private law in that country, as every way else did not develop in a vacuum, but as part of a wider political and social process. For this reason the book opens with an essay which contextualizes the contributions that follow, giving a view of the setting in which the development of South Africa took place: colonial domination, cultural imperialism, and racial and nationalistic ideologies. Two further introductory essays pay specific attention to the impact of the procedural framework on the substantive private law and to the architects of the mixed system.

The simple techniques of lazy project management can help us to work more effectively and improve our work-life balance.

Burning the Veil Neil McMaster, 2012-05-15 Burning the Veil draws upon sources from newly-opened archives, exploring the emancipation of Muslim women from the veil, seclusion and perceived male oppression during the Algerian War of decolonization. The claimed French liberation was contradicted by the violence inflicted on women through rape, torture, and destruction of villages. This book examines the roots of this contradiction in the theory of revolutionary warfare, and the attempt to defeat the National Liberation Front by penetrating the Muslim family, seen as a bastion of resistance. Striking parallels with contemporary Afghanistan and Iraq, French emancipation produced a backlash that led to deterioration in the social and political position of Muslim women. This analysis of how and why attempts to Westernize Muslim women ended in catastrophe has contemporary relevance and will be

important to students and academics engaged in the study of French and colonial history, feminism, and contemporary Islam.

*Visual Hegemonies* Peter Ludes, 2005 The books in this series reconstruct and explain the shifting balances, the complementarity and contradictions, between the potentials of improved intercultural and transcultural visual communication and its strategic exploitation through visual hegemonies. The series will also enhance the cooperation of the computer sciences, humanities, and social sciences and the development of software for modeling key visuals from various genres, media, and cultural zones. This first volume - *Visual Hegemonies: An Outline* - exemplifies this international research endeavor in a general trans-disciplinary outline as well as case studies from the perspectives of musicology, psychology, and the social sciences.

Scrumban - Essays on Kanban Systems for Lean Software Development Corey Ladas, 2009-01-01 Corey Ladas' groundbreaking paper ScrumBan has captured the imagination of the software development world. Scrum and agile methodologies have helped software development teams organize and become more efficient. Lean methods like kanban can extend these benefits. Kanban also provides a powerful mechanism to identify process improvement opportunities. This book covers some of the metrics and day-to-day management techniques that make continuous improvement an achievable outcome in the real world. ScrumBan the book provides a series of essays that give practitioners the background needed to create more robust practices combining the best of agile and lean.

**Hidden Letters** Philip Slier, Deborah Slier, 2008 In 1997, when demolishing an old house in Amsterdam, two bundles of letters were found. They were written by a teenager who had been sent by the Nazis to a labor camp in Holland, where he dug ditches from dawn to dusk. These letters are not what you would expect from a teenager. He was courageous and upbeat, and, worried more about his parents than himself. The letters are filled with hope that things will improve ....

*Domain-driven Design* Eric Evans, 2004 Domain-Driven Design incorporates numerous examples in Java-case studies taken from actual projects that illustrate the application of domain-driven design to real-world software development.

Being Agile Mario E. Moreira, 2013-11-19 Being Agile is your roadmap to successfully transforming your organization to an Agile culture. Veteran agile coach Mario Moreira teaches new adopters how to implement a robust Agile framework to derive from it the maximum business benefit in terms of customer value, revenue, and employee engagement. Agile is a ubiquitous watchword in the corporate world, but only a minority of companies understand and practice what they pay lip service to. Too many content themselves with half-baked approximations such as Fragile (fragile Agile), ScrumBut (Scrum but not the practices), and Scrum Fall (mini-waterfalls in the sprints). Moreira shows maturing early adopters how to bridge the chasm between going through the motions of doing Agile and genuinely being Agile. After a high-level synopsis of Agile's values and principles, methodologies (including Scrum, Kanban, DSDM, Leam, VFQ, and XP), and roles, Moreira plunges into the nitty-gritty of how to apply the ready, implement, coach, and hone (RICH) deployment model to all phases of a project in such a way as to embody and inculcate agile values and principles at the team level and promote agile transformation across your organization's culture.

**Secrets of a Buccaneer-Scholar** James Bach, 2012-12-11 Like so many young people, James Bach, the son of the famous author Richard Bach (Jonathan Livingston Seagull) struggled in school. While he excelled in subjects that interested him, he barely passed the courses that didn't. By the time he was sixteen

he had dropped out. He taught himself computer programming and software design and started working as a manager at Apple Computers only four years later - and he never looked back. With *The Secrets of a Buccaneer Scholar*, James shows us how he developed his own education on his own terms, how that unorthodox education brought him success, and how the reader can do it too. In his uniquely pithy and anecdotal style James uses the metaphor of a buccaneer to describe anyone whose love of learning and pursuit of knowledge is not bound by institutions or authorities. James outlines the eleven elements of his self-education method and shows how every reader - simply investing time and passion into educating themselves about the things that really interest them - can develop a method for acquiring knowledge and expertise that fits their temperaments and showcases their unique abilities and skills. Particularly well-suited for an audience grappling with the challenges posed by the internet, but also appropriate for parents looking to help and school their children or employees hoping to jumpstart their careers, *The Secrets of a Buccaneer Scholar* is a groundbreaking and uplifting work that empowers and inspires its readers.

Strategic Supremacy Richard A. D'Aveni, Robert E. Gunther, Joni Cole, 2001 *HYPER-COMPETITION*, 'the modern-day analogue to The Art of War' (Fortune), gave managers no holds barred strategies to create chaos, seize control of their industries, and rout rivals. Now, Richard D'Aveni shows how managers in large and mid-size global companies can defend themselves from these hyper-competitive attacks, squash revolutionary upstarts, and fashion a favourable world for themselves. Throughout history, great powers have built and reshaped their territory, absorbed or deflected revolutions (most of which fail anyway), and managed their relations with one overriding aim: strategic supremacy. Here, D'Aveni demonstrates how global corporations can do likewise in a hyper-competitive world. They must reconceptualize traditional portfolios into powerful competitive arsenals he calls 'spheres of interest' (like Disney and Microsoft); douse disruptions using counter-revolutionary tactics (Anheuser-Busch bought the microbrew industry); contain competitors of equal size (like NBC did ABC); and master the art of competitive configuration (like Proctor & Gamble and Johnson & Johnson).
