

Evolution of Social Ties around New Food Practices Gilles Sere de Lanauze, 2021-12-29 We live in a world of major disruption, where the individual and the collective stand in opposition against the backdrop of globalization, digital revolution, community development, growing concerns around health and the planet, and now an unprecedented global health crisis. This book explores how these phenomena influence the social ties that surround food and the way we eat together. Extensive research is presented on institutional recommendations concerning eating together, the role of online communities in supporting weight loss, the perceived consequences of diets, the social phenomena involved in vegetarianism, market segmentation in the case of ritual and religious practices, and the rising tendency to buy local and to value local identity. As the Covid-19 crisis adds to the complexity of these issues, its impact is also taken into account. For both interested readers and the many players involved in the agri-food industry, these reflections shed light on the current developments in eating together.

The Human as a Robot or a Biological Organism Marcienne Martin, 2022-09-29 Questioning the meaning and nature of the universe and the living world calls upon all existing fields of research. If the answers to these metaphysical questions have not been provided in a strict sense, their deciphering is constantly updated with the various discoveries that are gradually transforming humankind's view of the surrounding environment. We are referring here to human consciousness, integrated into the world of reality and experienced as such, and not to consciousness whose normative filter, born of various beliefs, subtracts the most recent scientific advances. The relationship between the binary system and the quaternary system is at the origin of this book, which focuses on the questions: is any unit of living organisms only the result of a given programming? What then of the human being? Are they a robot participating in the living world or a consciousness inscribed in a biological habitat?

GAIA LEGACY Rico Paganini, 2021-08-20 Rico Paganini, one of the leading megalithic, geomantic and spiritual researchers has visited all the Earths major power points. In this book we travel along with him. And we are able to share in his stirring experiences, in sensitive discoveries and the wondrous insights that he was able to gain. He has not compiled them for himself, but for us all. Perhaps he could only manage his adventures travels, bear the travails and overcome some resistance because the spiritual world was on his side accompanied him, encouraged him and led him with direct guidance. These received messages are also an essential and moving part of this book, and are a special feature is astonishing. As is the telling of the tale of the spiritual and material creation, and the fact that Mother Earth is alive and is conscious; our ancestors had not yet forgotten this. He also leads us through the destruction of the environment, climate changes and the increasing natural catastrophes. What have we done? At the same time, he presents us with solution paths, gives us courage and hope in this dramatic turning point; it is not yet too late! Hence, GAIA LEGACY is much more than a travel report and insight into the power points. It is one can say without exaggeration an incomparable book full of awakening and strength, just as the fifteenth power source

Health Research Practices in a Digital Context Laurent Morillon, 2020-09-30 The current generalized digitization of society is influencing the health environment, healthcare organizations as well as actors. In this context, human and social sciences deconstruct, nuance and sometimes even challenge certain preconceived ideas and/or dominant discourses. In this book, researchers of four nationalities and three different disciplines have agreed to open the black box of their work. They display their scientific practices from the perspective of epistemology, ethics and methodology. They present and analyze their values and postulates but, also, what may have influenced the project, the definition of the object and objectives, as well as their approaches. In a contextual way, the first part presents some changes in environments and infocommunicational practices related to digital health. The second part opens space to reflect on ethics and deontology. Finally, postulating that scientific fact is not an essence but the result of a process, the last part

discusses the methods implemented, which may be different from those initially envisaged. This book is dedicated to the researchers and postgraduate students in the human and social sciences as well as the health practitioners likely to collaborate with them.

Translation as a Set of Frames Ali Almanna, Chonglong Gu, 2021-07-14 Envisioned as a much needed celebration of the massive strides made in translation and interpreting studies, this eclectic volume takes stock of the latest cutting-edge research that exemplifies how translation and interpreting might interact with such topics as power, ideological discourse, representation, hegemony and identity. In this exciting volume, we have articles from different language combinations (e.g. Arabic, English, Hungarian and Chinese) and from a wide range of sociopolitical, cultural, and institutional contexts and geographical locales (China, Iran, Malaysia, Russia and Nigeria). Those chapters also draw on a diverse range of theoretical perspectives and methodological approaches (e.g. critical discourse analysis, Bourdieu's sociological theories, corpus linguistics, narrative theory and structuration theory), focusing on translation and interpreting relating to various settings and specialised genres (traditional media, digital media, subtitling, manga, etc.). As such, this volume serves as a dynamic forum for intercultural and interlingual communication and an exciting arena for interdisciplinary dialogues, thus enabling us to look beyond the traditionally more static, mechanical and linguistics-oriented views of translation and interpreting. This book appeals to scholars and students interested in translation and interpreting studies and issues of power, ideology, identity in interlingual and intercultural communication.

Anti-Proverbs in Five Languages Anna T. Litovkina, Hrisztalina Hrisztova-Gotthardt, Péter Barta, Katalin Vargha, Wolfgang Mieder, 2022-01-11 This book is the first comparative study of English, German, French, Russian and Hungarian anti-proverbs based on well-known proverbs. Proverbs are by no means fossilized texts but are adaptable to different times and changed values. While anti-proverbs can be considered as variants of older proverbs, they can also become new proverbs reflecting a more modern worldview. Anti-proverbs are therefore a lingo-cultural phenomenon that deserves the attention of cultural and literary historians, folklorists, linguists, and general readers interested in language and wordplay.

Bringing Up Bébé Pamela Druckerman, 2014-09-30 “On questions of how to live, the French never disappoint. . . . Maybe it all starts with childhood. That is the conclusion that readers may draw from *Bringing Up Bébé*.” —The Wall Street Journal “I’ve been a parent now for more than eight years, and—confession—I’ve never actually made it all the way through a parenting book. But I found *Bringing Up Bébé* to be irresistible.” —Slate The runaway New York Times bestseller that shows American parents the secrets behind France's amazingly well-behaved children, from the author of *There Are No Grown-ups*. When American journalist Pamela Druckerman had a baby in Paris, she didn't aspire to become a “French parent.” But she noticed that French children slept through the night by two or three months old. They ate braised leeks. They played by themselves while their parents sipped coffee. And yet French kids were still boisterous, curious, and creative. Why? How? With a notebook stashed in her diaper bag, Druckerman set out to investigate—and wound up sparking a national debate on parenting. Researched over three years and written in her warm, funny voice, *Bringing Up Bébé* is deeply wise, charmingly told, and destined to become a classic resource for American parents.

Jobs in the Sun Charles Davey, 2006 For English speakers, the dream of working in a sunnier environment is easier to realise than for anyone else. Not only is English spoken in many parts of the world, and is often the first or second language of business in those countries, but there is great demand for native English speakers to teach English. Complementing this demand for English speakers is the huge increase in the availability of cheap flights to warmer destinations - as a result, it's now far more practical to consider working abroad than ever before. For people considering a gap year before or after university, or for those seeking to take a career-break year that combines both travel and work experience, *Jobs in the Sun* examines the issues involved in working abroad, from taxation and visa issues to residency and job opportunities. Profiled countries include: the USA, Canada, South Africa, Australia, New Zealand, Spain, Portugal, France and Greece. Additional chapters cover summer vacation work and voluntary job opportunities, and the book concludes with useful addresses and other travel information.

Build, Borrow, Or Buy Laurence Capron, Will Mitchell, 2012 How should you grow your organization? Its one of the most challenging questions an executive team faces and the wrong answer can break your firm. So where do you start? By asking the right questions, argue INSEADs Laurence Capron and coauthor Will Mitchell, of Duke University's Fuqua School of Business and the Rotman School of Management at the University of Toronto. Drawing on more than two decades of research and teaching, Capron and Mitchell have found that a firm's aptitude for determining the best resource pathways for its growth has a defining impact on its success.
