Xie, Xinjian Yan, 2011-02-21 This set of six volumes provides a systematic and standardized description of 23,033 chemical components isolated from 6,926 medicinal plants, collected from 5,535 books/articles published in Chinese and international journals. A chemical structure with stereo-chemistry bonds is provided for each chemical component, in addition to conventional information, such as Chinese and English names, physical and chemical properties. It includes a name list of medicinal plants from which the chemical component was isolated. Furthermore, abundant pharmacological data for nearly 8,000 chemical components are presented, including experimental method, experimental animal, cell type, quantitative data, as well as control compound data. The seven indexes allow for complete cross-indexing. Regardless whether one searches for the molecular formula of a compound, the pharmacological activity of a compound, or the English name of a plant, the information in the book can be retrieved in multiple ways.

*Case Studies from the Medical Records of Leading Chinese Acupuncture Experts* Bing

Zhu, Hongcai Wang, 2011-06-15 The ability to apply complex theory to practice is a vital skill for acupuncturists. Case studies and medical records are an extremely useful resource for understanding how to differentiate between different syndromes, and provide invaluable precedents for deciding upon appropriate methods of diagnosis and treatment. This book presents a collection of real case studies of patients who have been treated by prominent acupuncture practitioners in China. The case studies are divided into five sub-categories of disease, and include information on the patient's medical history, presenting complaint, symptoms, tongue and pulse examination, diagnosis, treatment, and prescription as well as the Western diagnosis. More than 170 different case studies are included in the book, covering 73 different types of syndromes and disease. A useful appendix with the Chinese and English names for these syndromes is also included. Compiled by leading experts at the China Beijing International Acupuncture Training Center (CBIATC), under the editorial direction of leading Chinese clinicians Zhu Bing and Wang Hongcai, this book is a useful reference for acupuncture practitioners and students at all levels.

The Daode jing Commentary of Cheng Xuanying , 2021-09-22 This book presents for

the first time in English a complete translation of the Expository Commentary to the Daode jing, written by the Daoist monk Cheng Xuanying in the 7th century CE. This commentary is a quintessential text of Tang dynasty Daoist philosophy and of Chongxuanxue or Twofold Mystery teachings. Cheng Xuanying proposes a reading of the ancient Daode jing that aligns the text with Daoist practices and beliefs and integrates Buddhist concepts and techniques into the exegesis of the Daode jing. Building on the philosophical tradition of Xuanxue authors like Wang Bi, Cheng read the Daode jing in light of Daoist religion. Cheng presents Laozi, the presumed author of the Daode jing, as a bodhisattva-like sage and savior, who wrote the Daode jing to compassionately guide human beings to salvation. Salvation is interpreted as a metaphysical form of immortality, reached by overcoming the dichotomy of being and non-being, and thus also life and death. Cheng's philosophical outlook ties together the ancient text of the Daode jing and contemporary developments in Daoist thought which occurred under the influence of an

intense interaction with Buddhist ideas. The commentary is a vivid testimony of the integration of Buddhist thought into an exegesis of the ancient classic of the Daode jing, and thereby also into Chinese philosophy. Friederike Assandri frames this new translation with an extensive introduction, providing crucial context for a new reading of the Daode jing. It includes a biography of Cheng Xuanying, a discussion of the historical and political context of Daoism in early medieval China in the capital Chang'an, and a discussion of Cheng's philosophy in relation to the interaction of Daoism and Buddhism. This commentary is essential reading for students and scholars interested in the history of Chinese philosophy, Daoist thought, and the reception of Buddhism in China.

ECKM2014-Proceedings of the 15th European conference on Knowledge Management Carla Vivas,2014-10-01 The world economy in which we are living poses challenges that lead to a realization that 'more of the same' will be difficult to sustain. This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations.

Renal Fibrosis: Mechanisms and Therapies Bi-Cheng Liu,Hui-Yao Lan,Lin-Li Lv,2019-08-09 This book systemically presents the latest research on renal fibrosis, covering all the major topics in the field, including the possible mechanisms, biomarkers, and strategies for prevention and treatment of chronic kidney disease (CKD). Due to its high prevalence, CKD represents a huge global economic and social burden. Irrespective of the initial causes, CKD progresses to end stage kidney disease (ESKD) due to renal fibrosis, which is characterized by glomerulosclerosis, tubule atrophy and atresia, and the excessive accumulation of extracellular matrix (ECM) in the kidney. Unfortunately, an

estimated 1%-2% of the adult population living with CKD will need renal replacement therapy at some point as a result of ESKD. As such, strategies for preventing or slowing CKD progression to ESKD are of utmost importance, and studies aiming to understand the mechanisms of renal fibrosis have been the focus of intensive research. Recently, novel insights into the pathophysiological processes have furthered our understanding of the pathogenesis of renal fibrosis, and more importantly, promoted studies on the early diagnosis and treatment of CKD. This book draws lessons from the extensive, state-of-the-art research in this field, elaborating the new theories and new techniques to offer readers a detailed and comprehensive understanding of renal fibrosis and as well as inspiration for future research directions.

**Chinese & Related North American Herbs** Thomas S. C. Li, 2016-04-19 Hailed as a seminal work and considered the most complete compendium of Chinese herbs available, the first edition of *Chinese and Related North American Herbs: Phytopharmacology and Therapeutic Values* brought new and hard to find information into a single, well-referenced resource. With the addition of 130 herbs and 100 new references, the second edition provides a basic understanding of the science behind Chinese herbal preparations. Using the same format that made the first edition so popular, author Thomas Li provides a seamless integration of topics drawn from a diverse array of sources. The first table presents major constituents and therapeutic values of more than 1800 species. The data are arranged alphabetically by the Latin name followed by common Chinese and English names. Tables 2 and 3 present data on a total of 700 North American herbs belonging to the same species or genus as Chinese herbs, and a comparison of active ingredients and claimed therapeutic values. Appendices 1, 2, and 3 cross-reference Chinese and scientific names, and major active ingredients and their sources in the Chinese and North American herbs cited in the tables. Research in Chinese medicinal herbs has been conducted for decades in China, Japan, and Korea and recently in the West. Unfortunately, language barriers and the unreliability of sources and herbal material have hampered progress. Carefully crafted and designed to provide easy access to key data, this book supplies information compiled from authentic and highly regarded sources scattered throughout the Chinese and Western literature. This information can then be used to develop proper procedures for eliminating adulteration, contamination, and toxic side effects in Chinese herbs, and also to determine appropriate regulations for their use.

**The Book of Changes: A Modern Adaptation and Interpretation** Paul G. Fendos, 2018-04-10 'The Book of Changes: A Modern Adaptation and Interpretation' attempts to breathe new life into the Book of Changes by making it relevant to the present time and day. It does so by using archaeological evidence to trace the origins of the Book of Changes, starting with numeric trigrams and hexagrams, making its way up to early divination manuals, and ending with the oldest extant version of the Books of Changes—usually referred to as the 'received version.' It also explains the development of the Book of Changes from a divination manual into a philosophical text dealing with change. However, its main focus is on delineating sixty-four patterns of change in the Book of Changes, patterns based on novel metaphorical interpretations of the line texts in the Book of Changes that serve as the foundation for a new handbook on change. Each metaphorical interpretation consists of 1) a hexagram and the Chinese character associated with it, 2) a 'description' of the hexagram, 3) the Chinese characters for the line texts, 4) translations of the line texts, 5) a general interpretation of the line texts

based on those translations, 6) and some explanatory notes that attempt to clarify each interpretation. Translations and the interpretations based on those translations reference Traditional and Modernist understandings of the line text materials, ancient texts/dictionaries/lexicons from the period when the Book of Changes was compiled, and the ideas of the author as he works to create a new Chinese 'philosophy of change,' complete with examples of how it can be adapted in modern-day life. The clear and concise general introduction to the Book of Changes that is incorporated into this work, the many interpretations of the line texts contained in it, and a popular philosophical content make this book a welcome addition to the field and will attract interested scholars and teachers, engage business people or those looking to better understand Chinese culture, and appeal to those focused on spirituality and holistic living.
