Digital Content Creation in Schools Karen S. Ivers, Ann E. Barron, 2014-12-17 Discover how digital content creation supports 21st-century learning, providing new insights into organizing, synthesizing, and evaluating information. This practical guide will make it easy for you to engage your students through this powerful communications medium. Digital content creation supports the Common Core State Standards (CCSS) and 21st-century learning skills by helping students use their knowledge to analyze, create, solve problems, communicate, collaborate, and innovate. This update of the popular Multimedia Projects in Education, Fourth Edition emphasizes digital content creation and the use of the CCSS as benchmarks to help you create cutting-edge classroom instruction. The book begins by presenting research on student learning through multimedia and digital content creation. This introduction is followed by outlines of each stage of the practical, easy-to-use Decide, Design, Develop, and Evaluate (DDD-E) model, which is designed specifically for classroom use. Content also includes discussion of multiple intelligences, constructivist learning, and cooperative grouping; blackline masters to guide you and your students through the DDD-E process; and assessment and management strategies. In addition, you'll find sample activities using an array of development tools, information on mobile and web apps, and numerous other resources to support digital projects in your classroom. The book, which is most applicable to students in grades 4 through 12, will also serve as an ideal resource for media specialists who work with teachers and students.

Linked Albert-laszlo Barabasi, Jennifer Frangos, 2014-06-24 In the 1980's, James Gleick's Chaos introduced the world to complexity. Now, Albert-László Barabási's Linked reveals the next major scientific leap: the study of networks. We've long suspected that we live in a small world, where everything is connected to everything else. Indeed, networks are pervasive--from the human brain to the Internet to the economy to our group of friends. These linkages, it turns out, aren't random. All networks, to the great surprise of scientists, have an underlying order and follow simple laws. Understanding the structure and behavior of these networks will help us do some amazing things, from designing the optimal organization of a firm to stopping a disease outbreak before it spreads catastrophically. In Linked, Barabási, a physicist whose work has revolutionized the study of networks, traces the development of this rapidly unfolding science and introduces us to the scientists carrying out this pioneering work. These new cartographers are mapping networks in a wide range of scientific disciplines, proving that social networks, corporations, and cells are more similar than they are different, and providing important new insights into the interconnected world around us. This knowledge, says Barabási, can shed light on the robustness of the Internet, the spread of fads and viruses, even the future of democracy. Engaging and authoritative, Linked provides an exciting preview of the next century in science, guaranteed to be transformed by these amazing discoveries. From Linked: This book has a simple message: think networks. It is about how networks emerge, what they look like, and how they evolve. It aims to develop a web-based view of nature, society, and technology, providing a unified framework to better understand issues ranging from the vulnerability of the Internet to the spread of diseases. Networks are present everywhere. All we need is an eye for them... We will see the challenges doctors face when they attempt to cure a disease by focusing on a single molecule or gene, disregarding the complex interconnected nature of the living matter. We will see that hackers are not alone in attacking networks: we all play Goliath, firing shots at a fragile ecological network that, without further support, could soon replicate our worst nightmares by turning us into an isolated group of species... Linked is meant to be an eye-opening trip that challenges you to walk across disciplines by stepping out of the box of reductionism. It is an invitation to explore link by link the next scientific revolution: the new science of networks.

You Think You Hear Matt O'Keefe,2010-04-01 Lou Farren loves two things in life: rock and roll and his friend Cree, a beautiful drummer in a pop band who has no idea how he feels. Adrift in a post-college world of boring computer jobs, Lou agrees to be the roadie for the Day Action Band, a brilliant but unknown ensemble made up of Cree, bassist Joey, and Lou's best friend, Tim, on guitar. Opening for the Radicals, a British group with a single climbing the charts, the band travels coast to coast, moving closer and closer to fame. As Lou drives the Day Action Band's van, sells their T-shirts, and mediates their arguments, he learns what it's like to stand just outside the spotlight. He watches Tim charm women from the stage, sees Joey achieve the coolness he's always wanted, and tries unsuccessfully to look away when Cree falls into a tour romance with the lead singer of the Radicals. Every night Lou sits at a table in the back of the club, envying his friends and facing the idea that his life might be significant only for its relationship to theirs. When the band comes close to breaking up, Lou is forced to confront what he really wants for them, and for himself. Reminiscent of Nick Hornby's *High Fidelity*, Matt O'Keefe's hilarious and poignant debut is the story of a young man coming to grips with the distance between his dreams and his reality. *You Think You Hear* is about unrequited love, a romance with pop music, and the search for moments in life as satisfying as a perfect song.

China Dolls Michelle Yu,Blossom Kan,2007-02-06 Sports reporter Michelle Yu and lawyer Blossom Kan introduce a vibrant, irresistible novel set in New York City. Based on personal experience, *China Dolls* is the story of three best friends from childhood—each an unforgettable Asian woman—tackling their late twenties over drinks, laughs, and dim sum: M. J. Wyn, the hip, tomboyish sportswriter trying to achieve her dreams of becoming an on-air broadcaster. Ambitious and driven, M.J. has always struggled to fit into different worlds: her high school boyfriend's blue-blooded country club sphere, her family's traditional Chinese culture, and the very white, very male world of sports. Alex Kwan, the confident, tough, no-nonsense attorney constantly fighting the stereotype of the submissive, docile Asian woman. After a heartbreaking romance, Alex has gone from a fearless daredevil to a woman terrified of taking risks—in her career, in her life, and with love. Lin Cho, the risk-taking, daring stockbroker who has spent her whole life trying not to make the mistakes her mother did. But then Lin falls head over heels with the office playboy, a guy she knows she should steer clear of but can't seem to stay away from. Exploring life at the intersection of two worlds—one of Asian grandmothers and red envelopes, and another of career challenges and dating disasters—*China Dolls* is an exhilarating debut from two sensational new talents.

Everyone Has an Everest Sandy Andrews,2003 *Everyone Has An Everest* is a story of inspiration! If you are looking to be revitalized and renewed, you must read this book. In it the author tells of her 12 year battle with Parkinson's disease. She explains how the disease took her health, her job, her car, her life's savings and her insurance. Ms. Andrews is also an educator with 31 years of experience. The book graphically describes her experiences as an inner city elementary school principal and how she changed a school who had five principals in five years. How she dealt with the debilitating disease and never missed

a day of school. It will be useful to Parkinson patients and care givers because it gives specific information on how to obtain social security disability status, how to obtain food stamps, how to get Medicaid, how to deal with depression, Parkinson's Advocates and lobbying legislators. And most importantly, it describes the operation that gave her a second chance at life.

In the Courtyard of the Kabbalist Ruchama King Feuerman, 2014-03-25 National Jewish Book Award Finalist “A sophisticated and engaging” novel set in contemporary Jerusalem “that treats an endlessly tangled topic—relations between Palestinian Arabs and Jews—with intelligence and originality,” from an author hailed as the Jewish Jane Austen and Graham Green (The Wall Street Journal). An eczema-riddled Lower East Side haberdasher, Isaac Markowitz, moves to Israel to repair his broken heart and becomes, much to his own surprise, the assistant to a famous old rabbi who daily dispenses wisdom (and soup) to the troubled souls who wash up in his courtyard. It is there that he meets the flame-haired Tamar, a newly religious young American hipster on a mission to live a spiritual life with a spiritual man. Into both of their lives comes Mustafa, a devout Muslim, deformed at birth, a janitor who works on the Temple Mount, holy to both Muslims and Jews. When Mustafa finds an ancient shard of pottery that may date back to the first temple, he brings it to Isaac in friendship. That gesture sets in motion a series of events that lands Isaac in the company of Israel’s worst criminal riff raff, puts Mustafa in mortal danger, and leaves Tamar struggling to save them both. As these characters—immigrants and natives; Muslim and Jewish; prophets and lost souls—move through their world, they are never sure if they will fall prey to the cruel tricks of luck or be sheltered by a higher power.
