HISTORY OF THREE KINGDOMS Li Shi, The Twenty-Four Histories (Chinese: 二十四史) are the Chinese official historical books covering a period from 3000 BC to the Ming dynasty in the 17th century. The Han dynasty official Sima Qian established many of the conventions of the genre. Starting with the Tang dynasty, each dynasty established an official office to write the history of its predecessor using official court records. As fixed and edited in the Qing dynasty, the whole set contains 3213 volumes and about 40 million words. It is considered one of the most important sources on Chinese history and culture. The title Twenty-Four Histories dates from 1775 which was the 40th year in the reign of the Qianlong Emperor. This was when the last volume, the History of Min gwas reworked and a complete set of the histories produced. The Twenty Four Histories include: •Early Four Historiographies (四史) •Records of the Grand Historian (史记, Shǐ Jì), compiled by Sima Qian 司马迁 in 91 BC •Book of Han (汉书, Hànn Shū), compiled by Ban Gu 班固 in 82 •Records of the Three Kingdoms (三国志, Sānguó Zhì), compiled by Chen Shou 陈寿 in 289 •Book of Later Han (后汉书, Hòuhàn Shū), compiled by Fan Ye 范曄 in 445[2] •Book of Song (simplified Chinese: 宋史; traditional Chinese: 宋史; pinyin: Sòng Shū)—Southern Dynasties, compiled by Shen Yue 沈约 in 488 •Book of Qi (simplified Chinese: 齐史; traditional Chinese: 齊史; pinyin: Qí Shū)—Southern

China, 1895-1912 Douglas R. Reynolds, 1995 Offering recent scholarship in Chinese historiography, this text focuses on radical, even revolutionary, changes of the period 1895-1912. Contemporary Geometry Hongxi Wu, 1991-08-31 Early one morning in April of 1987, the Chinese mathematician J. -Q. Zhong died unexpectedly of a heart attack in New York. He was then near

the end of a one-year visit in the United States. When news of his death reached his Chinese-American friends, it was immediately decided by one and all that something should be done to preserve his memory. The present volume is an outgrowth of this sentiment. His friends in China have also established a Zhong Jia-Qing Memorial Fund, which has since twice awarded the Zhong Jia-Qing prizes for Chinese mathematics graduate students. It is hoped that at least part of the reasons for the esteem and affection in which he was held by all who knew him would come through in the succeeding pages of this volume. The three survey chapters by Li and Treibergs, Lu, and Siu (Chapters 1-3) all center around the areas of mathematics in which Zhong made noteworthy contributions. In addition to putting Zhong's mathematical contributions in perspective, these articles should be useful also to a large segment of the mathematical community; together they give a coherent picture of a sizable portion of contemporary geometry. The survey of Lu differs from the other two in that it gives a firsthand account of the work done in the People's Republic of China in several complex variables in the last four decades.

New Insights into the Treatment of Aneurysms with Flow Diverters: Novel Indications and Therapeutic Advances Yu Zhou, Jan-Hendrik Buhk, Jiamin Liu, 2023-10-10 With the publications of the International subarachnoid aneurysm trial (ISAT), endovascular treatment has become one of the most important treatments of intracranial aneurysms, and was used more and more in clinic settings. However, intracranial complex aneurysms (such as giant aneurysms, wide-necked aneurysms, fusiform aneurysms and dissecting aneurysms) still impose a huge challenge for clinicians. Flow diverter (FD) is a novel device for the treatment of aneurysms based on the understanding of hemodynamic mechanism of aneurysm occlusion. It could divert the blood flow from the aneurysm neck, and promote aneurysm occlusion without inserting coils into the aneurysms. In addition,

the FDs had the advantage of simplifying the procedure and relieving the mass effect.

Exploring Causal Risk Factors for Metabolic and Endocrine Disorders Youxin Wang,Xiao Wang,Haifeng Hou,Di Liu,2024-02-15 Metabolic and endocrine disorders are the main burden of noncommunicable chronic diseases, and they serve as important risk factors for cardiovascular diseases or multiple cancers. To date, a large number of correlates have been identified, but few of them were modifiable and causal. In general, causal relationships can be conceptualized not only in a probabilistic sense involving statistical terms and procedures, but also in the complexity of biological phenomena. The limited

understanding of many underlying mechanisms hinders a deterministic conceptualization of disease causation. The identification of modifiable risk factors that have a causal effect on the incidence of these diseases and their complications is critical to the primary or secondary prevention of metabolic and endocrine diseases.

Wife of Rich Family: CEO's Nemesis Shi

BuGuangYin,2020-03-15 Cheng Nuo sat on the swing, stroking her belly. There was already a baby there. She wondered how she could tell him the good news. Footsteps sounded in the courtyard. She knew that he had returned. She happily looked over, only to see two people hugging each other intimately. Cheng Nuo, it's time for us to end this. He said coldly, The person I love is back. Pack your things and leave. She tried her best to control herself from crying, shivering, and being agitated ... Life was fair. He had his sister Lin, and she had met her Mr. Mo.
