Mao's China and the Cold War Jian Chen, 2010-03-15 This comprehensive study of China's Cold War experience reveals the crucial role Beijing played in shaping the orientation of the global Cold War and the confrontation between the United States and the Soviet Union. The success of China's Communist revolution in 1949 set the stage, Chen says. The Korean War, the Taiwan Strait crises, and the Vietnam War--all of which involved China as a central actor--represented the only major hot conflicts during the Cold War period, making East Asia the main battlefield of the Cold War, while creating conditions to prevent the two superpowers from engaging in a direct military showdown. Beijing's split with Moscow and rapprochement with Washington fundamentally transformed the international balance of power, argues Chen, eventually leading to the end of the Cold War with the collapse of the Soviet Empire and the decline of international communism. Based on sources that include recently declassified Chinese documents, the book offers pathbreaking insights into the course and outcome of the Cold War.

Zhou Enlai Jian Chen, 2024 Zhou Enlai, China's first premier, is overshadowed by Mao, but Zhou's influence in his own time and since has been vast. Chen Jian shows Zhou using his political and bureaucratic skills and centralism to mitigate the damage caused by Mao's radicalism and argues that Zhou created conditions for the post-Mao reforms that have made China a superpower.

The Routledge Handbook of the Global Sixties Chen Jian, Martin Klimke, Masha Kirasirova, Mary Nolan, Marilyn Young, Joanna Waley-Cohen, 2018-02-06 'This extraordinary collection is a game-changer. Featuring the cutting-edge work of over forty scholars from across the globe, The Routledge Handbook of the Global Sixties is breathtaking in its range, incisive in analyses, and revolutionary in method and evidence. Here, fifty years after that iconic 1968, Western Europe and North America are finally de-centered, if not provincialized, and we have the basis for a complete remapping, a thorough reinterpretation of the Sixties.' —Jean Allman, J.H. Hexter Professor in the Humanities; Director, Center for the Humanities, Washington University in St. Louis 'This is a landmark achievement. It represents the most comprehensive effort to date to map out the myriad constitutive elements of the Global Sixties as a field of knowledge and inquiry. Richly illustrated and meticulously curated, this collection purposefully provincializes the United States and Western Europe while shifting the loci of interpretation to Africa, the Middle East, Asia, and Latin America. It will become both a benchmark reference text for instructors and a gateway to future historical research.' —Eric Zolov, Associate Professor of History; Director, Latin American & Caribbean Studies, Stony Brook University 'This important and wide-ranging volume de-centers West-focused histories of the 1960s. It opens up fresh and vital ground for research and teaching on Third, Second, and First World transnationalism(s), and the many complex connections, tensions, and histories involved.' —John Chalcraft, Professor of Middle East History and Politics, Department of Government, London School of Economics and Political Science 'This book globalizes the study of the 1960s better than any other publication. The authors stretch the standard narrative to include regions and actors long neglected. This new geography of the 1960s changes how we understand the broader transformations surrounding protest, war, race, feminism, and other themes. The global 1960s described by the

authors is more inclusive and relevant for our current day. This book will influence all future research and teaching about the postwar world.’
—Jeremi Suri, Mack Brown Distinguished Chair for Leadership in Global Affairs; Professor of Public Affairs and History, The University of Texas at Austin
As the fiftieth anniversary of 1968 approaches, this book reassesses the global causes, themes, forms, and legacies of that tumultuous period. While existing scholarship continues to largely concentrate on the US and Western Europe, this volume will focus on Asia, Africa, the Middle East, and Eastern Europe. International scholars from diverse disciplinary backgrounds explore the global sixties through the prism of topics that range from the economy, decolonization, and higher education, to forms of protest, transnational relations, and the politics of memory.

Trans Exploits Jian Neo Chen, 2019-11-06
In Trans Exploits Jian Neo Chen explores the cultural practices created by trans and gender-nonconforming artists and activists of color. They argue for a radical rethinking of the policies and technologies of racial gendering and assimilative social programming that have divided LGBT communities and communities of color along the lines of gender, sexuality, class, immigration status, and ability. Focusing on performance, film/video, literature, digital media, and other forms of cultural expression and activism that track the displaced emergences of trans people of color, Chen highlights the complex and varied responses by trans communities to their social dispossession. Through these responses, trans of color cultural workers such as performance artist Yozmit, writer Janet Mock, and organizer Jennicet Gutiérrez challenge dominating perceptions and institutions that kill, confine, police, and discipline trans people.

Family Business in China, Volume 1 Ling Chen, Jian An Zhu, Hanqing Fang, 2020-11-30
Unlike other economies, family businesses in China are greatly affected by the derived Confucian culture, excessive marketization, as well as the seemingly endless institutional supervision by a transitional Chinese government. China has a strong historical legacy, devoted to patriarchal values and strong family-centered traditions. This volume explores the social foundations and historical legacies of families, business families, and family businesses in China. It begins with an overview of a household, family, and clan in ancient China before an examination of the economic, social, and cultural functions that the family system served in Ancient China as well as the four unique features that distinguish the family system in ancient China from those in western societies. It later discusses the evolution of the family system and the rise of family business before the establishment of the People’s Republic of China in 1949. Finally, it evaluates the family system before and after the “Open-up and Reform” in 1978. This interdisciplinary work, incorporating sociological, anthropological, and institutional contexts pertaining to China, offers researchers the first advanced perspective of the development of family firms in China.

Knowing Miss Chen Jerrine R. Weigand, 2007-02-14
Knowing Miss Chen by Jerrine R Weigand is a tale of two worlds; a memoir filled with fascinating and challenging experiences of a foreign couple invited by the government of Qinghai Province, China, to work on their new policy Opening to the West. It is also the life story of Chen Yu Hua, their young interpreter. This is about living and learning a strange and fascinating culture. It touches Chinese history, religion, politics, the Great Cultural Revolution, the changing times as China struggles with failing state owned enterprises and the challenges of developing a Market Economy. But mostly it is about people, the Chen family, and every day life working in China. Miss Chen grew up in Chairman Mao's China during the Cultural Revolution of the 1960s. Hers is not the average tale of a school girl; the personal stories Miss Chen reveals to the author provide insight and understanding of a tumultuous period in Chinese history. Chen Yu Hua experienced, first hand, both the authority of the Red Guard and the tragedy of Tiananmen Square. Weigand tries to dispel the myths and misconceptions held by many Westerners about Chinese people and their culture. She and her husband came to appreciate the wonderful humor of the Chinese, their curiosity and desire to understand Westerners, and in turn their need to be understood. *Knowing Miss Chen* will enlighten, entertain and sadden, leaving readers feeling rewarded for their experience. Reviews Jerrine Weigand has written about modern China through the eyes of an average Canadian visiting a whole new world but Chen Yu Hua is not the average obedient Chinese daughter dominated by ancient traditions. Whoever reads this story will have

a greater understanding of modern China and its people. -Florence Whyard, CM, Longtime journalist, editor and biographer in Yukon and Northwest Territories. I read your book twice with much laughing and tearing. It is very educational, informative and amusing. I am amazed how clearly you describe in detail Chen Yu Hua's past and how accurate you present the emotional settings. I like your analysis of the Chinese way of thinking and habits. It helped me understand myself even better. I think this is a wonderful book. Both interesting for Westerners and Chinese. I would encourage you to translate it into Chinese where you will have many readers. -Xiu-Mei (Sue May) Zhang, MD, Dr. TCM, Whitehorse, Yukon.

Solid State Fermentation for Foods and Beverages Jian Chen, Yang Zhu, 2013-11-23 Although one of the oldest microbial technologies used in food processing, solid-state fermentation (SSF) had, until recently, fallen out of favor. However, based on a series of established mathematical models, new design concepts for SSF bioreactors and process control strategies have been proposed, allowing SSF technology to reach new levels. Solid State Fermentation for Foods and Beverages covers these new technologies and their application to food and beverage production. The book systematically describes the production of solid-state fermented food and beverage in terms of the history and development of SSF technology and SSF foods, bio-reactor design, fermentation process, various substrate origins and sustainable development. It emphasizes Oriental traditional foods produced by SSF such as sufu, vinegar, soy sauce, Chinese distilled spirit, and rice wine. The authors address such engineering issues as mass and heat transfer and energy equation calculation of solid-state fermentation, dynamic modeling of solid-state fermentation, and process control of solid-state fermentation. Covering the latest developments and achievements in the field of SSF, the book provides a detailed introduction to various solid-state fermented foods and beverages, including product category, characteristics, functionalities, safety issues, and consumer perception. It explores real advantages of SSF processes and how their application at real scale for high quality production that is more and less costly.

The Great Transformation Odd Arne Westad, Jian Chen, 2024-10-29 The first thorough account of a formative and little understood chapter in Chinese history. Historians Odd Arne Westad and Chen Jian chronicle how an impoverished and terrorized China experienced radical political changes in the long 1970s and how ordinary people broke free from the beliefs that had shaped their lives during Mao's Cultural Revolution. These political changes, and the unprecedented and sustained economic growth that followed, transformed China and the world. From the corridors of CCP headquarters to collective enterprises in Guangdong and the arrival of the US table tennis team, Westad and Chen reconstruct a panorama of

catastrophe and progress in China. In this rigorously told account they describe China's gradual opening to the world--the interplay of power in an era of aged and ailing leadership, the people's rebellion against the earlier government system, and the roles of unlikely characters: overseas Chinese capitalists, American engineers, Japanese professors, and German designers. It is the story of revolutionary change, in directions that almost no foreigners and very few Chinese could have imagined when it all started.

Provides a comprehensive view from leading researchers with respect to the past, present, and future of the design of embedded and cyber-physical systems; Discusses challenges and (potential) solutions from theoreticians and practitioners on modeling, design, analysis, and optimization for embedded and cyber-physical systems; Includes coverage of model verification, communication, software runtime systems, operating systems and real-time computing.

Dilemmas of Victory Jeremy Brown,2010-03-15 This illuminating work examines the social, cultural, political, and economic dimensions of the Communist takeover of China. Instead of dwelling on elite politics and policy-making processes, *Dilemmas of Victory* seeks to understand how the 1949-1953 period was experienced by various groups, including industrialists, filmmakers, ethnic minorities, educators, rural midwives, philanthropists, stand-up comics, and scientists. A stellar group of authors that includes Frederic Wakeman, Elizabeth Perry, Sherman Cochran, Perry Link, Joseph Esherick, and Chen Jian shows that the Communists sometimes achieved a remarkably smooth takeover, yet at other times appeared shockingly incompetent. Shanghai and Beijing experienced it in ways that differed dramatically from Xinjiang, Tibet, and Dalian. Out of necessity, the new regime often showed restraint and flexibility, courting the influential and educated. Furthermore, many policies of the old Nationalist regime were quietly embraced by the new Communist rulers. Based on previously unseen archival documents as well as oral histories, these lively, readable essays provide the fullest picture to date of the early years of the People's Republic, which were far more pluralistic, diverse, and hopeful than the Maoist decades that followed.

Reading Chinese Script Jian Wang,Hsuan-Chih Chen,Ralph Radach,Albrecht Inhoff,1999-02 This volume uses unique properties of Chinese script to focus on morphological analyses during the character and word recognition process, though some of the reported work also pertains to the use of phonological information. In addition, this volume contains work on syntactic and pragmatic processes during sentence reading and three chapters that examine on-line processes. A comprehensive appraisal of cognitive processes during the reading of Chinese script that includes studies conducted by leading researchers from within and outside the mainland, this volume will be of interest to all those studying reading and visual symbol processing.

VLSI Design for Video Coding Youn-Long Steve Lin,Chao-Yang Kao,Hung-Chih Kuo,Jian-Wen Chen,2009-12-29 High definition video requires substantial compression in order to be transmitted or stored economically. Advances in video coding standards from MPEG-1, MPEG-2, MPEG-4 to H.264/AVC have provided ever increasing coding efficiency, at the expense of great computational complexity which can only be delivered through massively parallel processing. This book will present VLSI architectural design and chip implementation for high definition H.264/AVC video

encoding, using a state-of-the-art video application, with complete VLSI prototype, via FPGA/ASIC. It will serve as an invaluable reference for anyone interested in VLSI design and high-level (EDA) synthesis for video.
