Red Lines Cherian George,Sonny Liew,2021-09-21 A lively graphic narrative reports on censorship of political cartoons around the world, featuring

interviews with censored cartoonists from Pittsburgh to Beijing. Why do the powerful feel so threatened by political cartoons? Cartoons don't tell secrets or move markets. Yet, as Cherian George and Sonny Liew show us in *Red Lines*, cartoonists have been harassed, trolled, sued, fired, jailed, attacked, and assassinated for their insolence. The robustness of political cartooning--one of the most elemental forms of political speech--says something about the health of democracy. In a lively graphic narrative--illustrated by Liew, himself a prize-winning cartoonist--*Red Lines* crisscrosses the globe to feel the pulse of a vocation under attack. A Syrian cartoonist insults the president and has his hands broken by goons. An Indian cartoonist stands up to misogyny and receives rape threats. An Israeli artist finds his antiracist works censored by social media algorithms. And the New York Times, caught in the crossfire of the culture wars, decides to stop publishing editorial cartoons completely. *Red Lines* studies thin-skinned tyrants, the invisible hand of market censorship, and demands in the name of social justice to rein in the right to offend. It includes interviews with more than sixty cartoonists and insights from art historians, legal scholars, and political scientists--all presented in graphic form. This engaging account makes it clear that cartoon censorship doesn't just matter to cartoonists and their fans. When the red lines are misapplied, all citizens are potential victims.

Merchants of Virtue Divya Cherian, 2022-12-27 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. Winner of the 2022 Joseph W. Elder Prize in the Indian Social Sciences *Merchants of Virtue* explores the question of what it meant to be Hindu in precolonial South Asia. Divya Cherian presents a fine-grained study of everyday life and local politics in the kingdom of Marwar in eighteenth-century western India to uncover how merchants enforced their caste ideals of vegetarianism and bodily austerity as universal markers of Hindu identity. Using legal strategies and alliances with elites, these merchants successfully remade the category

of “Hindu,” setting it in contrast to “Untouchable” in a process that reconfigured Hinduism in caste terms. In a history pertinent to understanding India today, Cherian establishes the centrality of caste to the early-modern Hindu self and to its imagination of inadmissible others.

Our Crumbling Civilization and Collapsing Universe of 5 Percent Plammoottil Cherian, 2021-01-11 -It is the biggest question of all in the universe, when and from what universe came into being and how it expanded. It puzzled Einstein and many other cosmologists after him. Finally, they have discovered the particle, which they mysteriously named the God particle. As the mystery surrounds this particle, their quest will either end in finding God, the source of the particle or not. -In an age when biblical truth are considered fairytales by many a scientists, someone must be bold enough to tell the truth that in the beginning the universe was void and darkness prevailed in the entire cosmos until God separated darkness by his eternal light and used 5 percent of the dark matter to create the universe and everything within it. Dr. Cherian courageously links the Scriptures and the science behind the dark matter and the scientists who were divinely guided to name it the God particle. -Newton's and Einstein's dreams have been materialized and though not accepted by the vast majority of scientists openly, many are compromising that universe formed from a cosmic evolution, and life evolved abiogenetically and God interjected his presence into the process of evolution to claim his role-a most absurd stand. -While the latest scientific discoveries tackled the biggest mystery of the universe, scientific discoveries have corroborated the truth man (humanity) is nothing but specks of the dust (Ps. 103:14). -While God who created the universe sits enthroned above the circle of the earth and stretches out (expanse) the heavens like a canopy and spreads them out like a tent. (Isa. 40:22) is also holding the universe in his hands. -Dr. Cherian brings to light the neglected truth that science and theology are the perfect match of God's truth in the universe. -Most of the scientific discoveries deciphered during the last five hundred years are recorded in the Bible, including water in the exoplanets and the dark matter and dark energy that have been discovered recently. The author has succinctly explained with specific biblical references and explanations. -The author also reveals that from Plymouth Rock to Independence Hall and throughout the length and breadth of America, the profound Christian heritage is engrained in every inch of the land, and America cannot negate God from our land. -God's systematic order of creation was schemed as stages of unguided evolution. -All Christians of the nation must reinvent the declaration by the Supreme Court of the United States in 1892 that This a Christian Nation, and present-day lawmakers must adhere to that with freedom and liberty for all. -Like a skilled attorney, the author explains America is part of the Israel of God and a member of the Commonwealth of

Israel, as explained by Apostle Paul. The United States of America and the United Kingdom are two nations blessed by God, under the protection of the Almighty God, and we have a moral mandate to preserve our godly culture and civilization and lead other nations to follow before Armageddon, which is imminent.

Origins of the Universe, Life and Species Plammoottil Cherian, 2018-03-22 The relationship between science and theology has been a crisis for humanity since Darwin's publication of Origin of Species that affects the very core of scientific and Biblical truths with serious consequences. In this detailed and absorbing book Dr. Cherian provides astounding facts of science that were deciphered in the last 500 years, each of which is recorded in the Biblical Scriptures. Heeding back to the Biblical account of creation, Dr. Cherian takes the readers from the erroneous notion of the origin of the universe without a cause and abiogenesis as the source of life to the latest scientific discoveries that corroborate the Biblical evidence for divine creation of the universe, life and species that dispel Darwinian evolution. The Origins of the Universe, Life and Species sheds much light for a better understanding of the Scriptures that were hidden to many scientists, researchers and students to relate the scientific discoveries that reveal the Biblical truths for a better appreciation of the unknown God who reveals himself through the many scientists and their discoveries. Dr. Cherian, uses all

branches of science from astronomy to zoology connecting the dots between science and theology that stretches from the highest of heavens (outer space) to the deepest of ocean floor revealing the unknown God to be the KNOWN GOD.

Finishing the Race Human History, Life, and Race before Us Plammoottil V. Cherian, 2023-08-29 **FINISHING THE RACE** Stimulating, theological, and packed with fascinating historical details of Human Race from a Biblical perspective, author's lively tour of the entire Bible traces the origin of human race from one man whose progeny spread to the entire earth, filled the earth, established their nations with set boundaries. Author establishes the historical account of creation challenging the concept of Darwinian Evolution which claims man is an evolutionary product. Author stresses that there is only One God who created the universe--the cosmos, the planets, stars, life, and the multitude of living species of organisms with the command endowed in their DNA, when God said, to herbs, plants, and animals to multiply according to its kind, according to their kind, which is the basis for biological variation and speciation. Whereas God's command to human beings was Be fruitful and multiply; fill the earth and subdue it, meaning there is only one single race of humanity. Author has a profound Christian vision of humanity's temporal and eternal destiny, and thus, he relates in *Finishing the Race*: In an age when truth is relative, and vanishing conscience, the nations are the crossroads, confused about the true direction as nations are estranged from God. The present culture is as in the Days of Noah quoting Jesus and citing world events and conditions as signs of the end. An end time scenario of world and the second coming of Christ when a northern and a southern army will clash in fierce battle over Jerusalem, the Holy City of God, the capital of the Messianic Kingdom. Not claiming any superiority, like many of the past and famous scientists like Galilei Galileo, Blaise Pascal, Isaac Newton, Louis Pasteur, Robert Boyle etc. Cherian attempt to convince his readers God is in control of human and world affairs, and natural events. Heaven and hell are not mysterious realms of imagination but true physical entities invisible to human eyes and calls the nations to submit to God who only is the answer to national, and global unrest that we see now.

Air Pollution, Clean Energy and Climate Change Anilla Cherian, 2022-04-04 **AIR POLLUTION, CLEAN ENERGY AND CLIMATE CHANGE**

Anthropogenic climate change is a globally recognized threat multiplier. Yet, decades of intergovernmental negotiations have failed to curb toxic levels of fossil fuel energy-related air pollution which the World Health Organization (WHO) has identified as the world's largest, single environmental health risk. Lying in plain view are the troubling truths about the morbidity and ill-health burdens associated with anthropogenic climate change that are borne by

those who have done the least to contribute to per capita emissions of greenhouse gas emissions. Ignoring the nexus between air pollution, lack of access to clean energy and climate adversities represents a collective failure of the UN's ambitious, universally agreed upon 2030 Sustainable Development Agenda (SDA) which pledged 'to leave no one behind'. This book highlights the air pollution crisis that emanates from the heavy reliance on polluting forms of energy and the urbanization of poverty in developing countries. It provides a framework for understanding why the broader sustainable development community needs to address the more neglected intersection between adverse climatic impacts and energy-related air pollution which devastates the lives of the poorest and most vulnerable amongst us, especially young children, women and the elderly. It focuses on the importance of breaking down persistent global silos and goals on sustainable energy for all, and climate change reflected in the UNs 2030 SDA, and the 2015 Paris Agreement. Integrating clean air and climate mitigation measures that specifically include curbing short lived climate pollutants such as black carbon via innovative partnerships/modalities are seen as vital to clean energy and climate responsive action. This book argues that linked actions by non-nation state actors aimed at reducing air pollution and ameliorating short term climate pollutants in the most populous cities, particularly in countries like India where annual average particulate matter pollution levels consistently exceed WHO guidelines are essential in reducing grave health costs and disease burdens. Air Pollution, Clean Energy and Climate Change will be of particular interest to policy makers, researchers, environmental advocates, civil society stakeholders and practitioners who want to understand the urgency of addressing linkages between climate change, fossil fuel energy, air pollution and public health risks. The cover image is an oil painting by Anilla Cherian, which incorporates tree bark and twigs, and serves as a reminder of the daily energy sources used by millions who lack access to clean energy and are exposed to high levels of household air pollution. It is the second-part of a series, with the first one serving as the cover image to Energy and Global Climate Change (Cherian, 2015). Photograph of painting by Alison Sheehy Photography.

Democracy in America: Is it in Peril? Plammoottil V. Cherian, 2023-02-23 Democracy in the world is backsliding in many countries around the globe at the present time due to various reasons. Different nations may have their own particular reasons such as socioeconomic inequality, poverty, failure of checks and balances that may result in an abrupt military coup d'etat to change from democracy to tyranny. In nations where democracy failed, there were no tanks on the street. Constitution of the land remained, but elected leaders became autocrats, maintaining a veneer of democracy. America,

being a nation with nearly 80 percent of Christians, has been the strongest democracy in the world who championed it as the model for the rest of the world. However, democracy in America appears to be in peril because of political bickering, partisan gridlock, and promulgation of falsities, misinformation, and faux faith by one political party. By introducing the foundational principles of democracy from the philosophical arguments of Socrates, Plato, and Aristotle, the author shows how and why the cornerstone of democracy in America shows signs of crumbling. The book vividly explains: Politics without God will shatter the foundation of democracy. Present political system rejects the checks and balances laid by the founding fathers. The right wing has cultivated a spirit of untruth that spreads like a wildfire. Rejecting truth by political parties and leadership is a sign of strong delusion. There is a clear moral bankruptcy in the present political sphere of our nation. The brightness of democracy in America which Tocqueville praised has been tarnished. Hypocritic and dishonest leaders should not reign, lest the people be ensnared. American politicians must register their solemn oath in heaven to act in truth. No nation can be established in one day but can shatter in one day by a despot. America must realign with God to lead the nation in truth, justice, and freedom for all. Democracy turns to tyranny when a moral man becomes amoral. With biblical prophecies and instructions, the author shows that America faces a real threat to its democracy unless it resists tyrants with all their mind, soul, and strength, which is obedience to God who can anchor the nation on its solid foundation set by the Founding Fathers. Every citizen, political and judicial leaders of the nation, are the cupbearers and the watchmen of the nation.

Our Relay Race Joy Cherian, 1997 Our Relay Race is a compilation of selected articles and speeches the author has written during the past ten years. 1986 to 1996 was a very significant decade for the Indian American community. It was during these few years that this community of over one million began to involve itself seriously and actively in the political life of the U.S. This book describes how a small but active ethnic community influenced the American ethic of fairness to win equal opportunities in public life. The author describes his involvement with public life beginning with the establishment and development of a small community organization (Indian American Forum for Political Education). He then assisted in the building of the influential Asian American Voters Coalition which attracted the attention of the White House and Congress. This led him to a subcabinet-level presidential appointment as a Commissioner on the U.S. Equal Employment Opportunity Commission under the administrations of Presidents Reagan,

Bush, and Clinton (1987-1993). This book will serve as a reference for the eight-million-strong Asian American community focusing on the Indian American experience, and as a guide for emerging ethnic American communities with origins from Europe, Africa and the Americas.

Hate Spin Cherian George, 2016-09-23 How right-wing political entrepreneurs around the world use religious offense—both given and taken—to mobilize supporters and marginalize opponents. In the United States, elements of the religious right fuel fears of an existential Islamic threat, spreading anti-Muslim rhetoric into mainstream politics. In Indonesia, Muslim absolutists urge suppression of churches and minority sects, fostering a climate of rising intolerance. In India, Narendra Modi's radical supporters instigate communal riots and academic censorship in pursuit of their Hindu nationalist vision. Outbreaks of religious intolerance are usually assumed to be visceral and spontaneous. But in *Hate Spin*, Cherian George shows that they often involve sophisticated campaigns manufactured by political opportunists to mobilize supporters and marginalize opponents. Right-wing networks orchestrate the giving of offense and the taking of offense as instruments of identity politics, exploiting democratic space to promote agendas that undermine democratic values. George calls this strategy “hate spin”—a double-sided technique that combines hate speech (incitement through vilification) with manufactured offense-taking (the performing of righteous indignation). It is deployed in societies as diverse as Buddhist Myanmar and Orthodox Christian Russia. George looks at the world's three largest democracies, where intolerant groups within India's Hindu right, America's Christian right, and Indonesia's Muslim right are all accomplished users of hate spin. He also shows how the Internet and Google have opened up new opportunities for cross-border hate spin. George argues that governments must protect vulnerable communities by prohibiting calls to action that lead directly to discrimination and violence. But laws that try to protect believers' feelings against all provocative expression invariably backfire. They arm hate spin agents' offense-taking campaigns with legal ammunition. Anti-discrimination laws and a commitment to religious equality will protect communities more meaningfully than misguided attempts to insulate them from insult.

Energy and Global Climate Change Anilla Cherian, 2015-07-23 *Energy and Global Climate Change: Bridging the Sustainable Development Divide* focuses attention on two urgent global development challenges faced by the UN and its member states: access to sustainable energy for all, and global climate change. This book presents compelling evidence about an often neglected aspect of the energy-climate change-development nexus faced by millions of poor: problems caused by the use of inefficient and polluting energy sources, and the lack of access to sustainable energy services. Based

on a detailed examination of major UN global climate change and sustainable development negotiated outcomes over the course of several decades, this book argues in a powerful and insightful manner that intergovernmental negotiated outcomes aimed at solving the climate change and energy access challenges have been restricted by being placed in different negotiating silos. This “siloization” or compartmentalization has resulted in separate tracks of negotiated outcomes on two inextricably linked global development challenges; and, has thereby hindered prospects for integrated action. This book points out that the existence of these two silos is especially hard to ignore in light of the urgent UN-led quest for an integrated and universal post-2015 development agenda anticipated to be anchored by new sustainable development goals on energy access and climate change. By addressing the heavy reliance on inefficient and polluting energy services which result in indoor air pollution and short lived climate pollutants that tragically impact millions of poor people, this book highlights the unique importance of integrated action on the energy-poverty-climate change nexus in the UN’s post-2015 development era.

Freedom from the Press Cherian George, 2012-04-01 For several decades, the city-state of Singapore has been an international anomaly, combining an advanced, open economy with restrictions on civil liberties and press freedom. *Freedom from the Press* analyses the republic's media system, showing how it has been structured - like the rest of the political framework - to provide maximum freedom of manoeuvre for the People's Action Party (PAP) government. Cherian George assessed why the PAP's freedom from the press model has lasted longer than many other authoritarian systems. He suggests that one key factor has been the PAP's recognition that market forces could be harnessed as a way to tame journalism. Another counter-intuitive strategy is its self-restraint in the use of force, progressively turning to subtler means of control that are less prone to backfire. The PAP has also remained open to internal reform, even as it tries to insulate itself from political competition. Thus, although increasingly challenged by dissenting views disseminated through the internet, the PAP has so far managed to consolidate its soft-authoritarian, hegemonic form of electoral democracy. Given Singapore's unique place on the world map of press freedom and democracy, this book not only provides a constructive engagement with ongoing debates about the city-state but also makes a significant contribution to the comparative study of journalism and politics.
