Deutsche Forschungsgemeinschaft (DFG)

Funding Ranking 2006 Deutsche Forschungsgemeinschaft (DFG),2007-06-27 Following on from previous publications in 1997, 2000 and 2003, the Deutsche Forschungsgemeinschaft (German Research Foundation) presents its fourth Funding Ranking, an overview of the distribution of awards to universities and non-university research institutions in Germany. The scope of the report has increased considerably compared to previous editions. Alongside the report's central indicator - DFG awards per individual research institution - the document also covers a wide range of additional indicators regarding publicly financed research in one of the world's leading industrial countries. For the first time, the report also includes information on R&D funding for selected federal programmes, for thematic priorities within the European Union's Sixth Framework Programme, and for collaborative industrial research funded by the German Federation of Industrial Cooperative Research Associations Otto von Guericke. The third party funding indicators, which each depict individual aspects of publicly financed research, represent in total approximately 80 percent of all public third party funding for university research.

Regulated Chemicals Directory 1994 ChemADVISOR Inc. Staff,2012-12-06 The Regulated Chemicals DirectoryTM is meant to be a convenient source of information for everyone who needs to keep up-to-date regarding the regulations and recommendations that pertain to chemical substances. The RCDTM is designed to be the first reference book to consult when beginning compliance efforts. Every regulatory or advisory list used in the RCDTM is keyed to its source, to help readers who need more detailed information on regulations, recommendations, or guidelines readily locate source documents. Some organizations now center their compliance efforts on computerized information stored in cross-referenced databases. A unique feature of the RCDTM is the availability of an electronic version suitable for use on IBM-compatible personal computers, download onto mainframes and CD-ROM players. Both the print and electronic versions are updated with the same timeliness. For more information on the electronic versions of the Regulated Chemicals DirectoryTM, contact Chapman & Hall directly (One Penn Plaza, New York, NY 10119, fax-212-564-1505). Many companies working on product development need information on what may be regulated in the future. The RCDTM provides selected information on pending regulations and in-progress testing lists, which can provide a starting place for tracking future regulatory considerations. Information for the RCDTM is continually gathered and updated. Suggestions from readers for information that should be added to the RCDTM or for other ways to improve the book are welcomed by Chapman & Hall. - Patricia L. Dsida, Pres. Protein Allostery in Drug Discovery Jian Zhang,Ruth Nussinov,2019-11-09 The book focuses on protein allostery in drug discovery. Allosteric regulation, 'the second secret of life', fine-tunes virtually most biological processes and controls physiological activities. Allostery can both cause human diseases and contribute to development of new therapeutics. Allosteric drugs exhibit unparalleled advantages compared to conventional orthosteric drugs, rendering the development of allosteric modulators as an appealing strategy to improve selectivity and pharmacodynamic properties in drug leads. The Series delineates the immense significance of protein allostery—as demonstrated by recent advances in the repertoires of the concept, its mechanistic mechanisms, and networks, characteristics of allosteric proteins, modulators, and sites, development of computational and experimental methods to predict allosteric sites, small-molecule allosteric modulators of protein kinases and G-protein coupled receptors, engineering allostery, and the underlying role of allostery in precise medicine. Comprehensive understanding of protein allostery is expected to guide the rational design of allosteric drugs for the treatment of human diseases. The book would be useful for scientists and students in the field of protein science and Pharmacology etc.

Funding Atlas 2012 Deutsche Forschungsgemeinschaft (DFG),2013-05-20 The Funding Atlas is a reporting system (previously referred to as the Funding Ranking) employed by the German Research Foundation (DFG) to provide information in the form of indicators of key developments in publicly funded research in Germany every three years. This English version of the Funding Atlas 2012 presents selected findings from the more comprehensive German edition. At the core of the report are indicators that provide information on which subject areas have received funding at higher education and other research institutions in the period 2008-2010. This report also includes, as a supplement not found in the German edition, the decisions on the Excellence Initiative, which were taken shortly after the German edition of the Funding Atlas 2012 was published. The report also addresses the subject of internationality by presenting selected indicators that show how attractive Germany's research institutions are for visiting scientists. In summary, the DFG Funding Atlas furnishes reliable indicators of the effectiveness and competitiveness of publicly funded research in Germany. It documents how research locations are developing their profiles and their attractiveness for international scientists.

Blood and Homeland Marius Turda,Paul J. Weindling,2006-11-10 The history of eugenics and racial nationalism in Central and Southeast Europe is a neglected topic of analysis in contemporary scholarship. The 20 essays in this volume, written by distinguished scholars of eugenics and fascism alongside a new generation of scholars, excavate the hitherto unknown eugenics movements in Central and Southeast Europe, including Austria and Germany. Eugenics and racial nationalism are topics that have constantly been marginalized and rated as incompatible with local national traditions in Central and Southeast Europe. These topics receive a new treatment here. On the one hand, the historiographic perspective connects developments in the history of anthropology and eugenics with political ideologies such as racial nationalism and anti-Semitism; on the other hand, it contests the 'Sonderweg' approach adopted by scholars dealing with these issues.
