She Explores Gale Straub, 2019-03-26 For every woman who has ever been called outdoorsy comes a collection of stories that inspires unforgettable adventure. Beautiful, empowering, and exhilarating, *She Explores* is a spirited celebration of female bravery and courage, and an inspirational companion for any woman who wants to travel the world on her own terms. Combining breathtaking travel photography with compelling personal narratives, *She Explores* shares the stories of 40 diverse women on unforgettable journeys in nature: women who live out of vans, trucks, and vintage trailers, hiking the wild, cooking meals over campfires, and sleeping under the stars. Women biking through the countryside, embarking on an unknown road trip, or backpacking through the outdoors with their young children in tow. Complementing the narratives are practical tips and advice for women planning their own trips, including: • Preparing for a solo hike • Must-haves for a road-trip kitchen • Planning ahead for unknown territory • Telling your own story A visually stunning and emotionally satisfying collection for any woman craving new landscapes and adventure.

Space, Place and Poetry in English and German, 1960-1975 Nicola Thomas, 2018-07-13 *Space, Place and Poetry in English and German, 1960-1975* examines the work of Paul Celan, J. H. Prynne, Derek Mahon, Sarah Kirsch, Edwin Morgan and Ernst Jandl, bringing together postwar English- and German-language poetry and criticism on the theme of space, place and landscape. Nicola Thomas highlights hitherto underexplored connections between a wide range of poets working across the two language areas, demonstrating that space and place are vital critical categories for understanding poetry of this period. Thomas's analysis reveals weaknesses in existing critical taxonomies, arguing for the use of 'late modernist' as a category with cross-cultural relevance, and promotes methodological exchange between the Anglophone and German traditions of landscape,

space and place oriented poetic criticism, to the benefit of both.

Headstrong Rachel Swaby, 2015-04-07 Fifty-two inspiring and insightful profiles of history's brightest female scientists. "Rachel Swaby's no-nonsense and needed Headstrong dynamically profiles historically overlooked female visionaries in science, technology, engineering, and math."—Elle In 2013, the New York Times published an obituary for Yvonne Brill. It began: "She made a mean beef stroganoff, followed her husband from job to job, and took eight years off from work to raise three children." It wasn't until the second paragraph that readers discovered why the Times had devoted several hundred words to her life: Brill was a brilliant rocket scientist who invented a propulsion system to keep communications satellites in orbit, and had recently been awarded the National Medal of Technology and Innovation. Among the questions the obituary—and consequent outcry—prompted were, Who are the role models for today's female scientists, and where can we find the stories that cast them in their true light? Headstrong delivers a powerful, global, and engaging response. Covering Nobel Prize winners and major innovators, as well as lesser-known but hugely significant scientists who influence our every day, Rachel Swaby's vibrant profiles span centuries of

courageous thinkers and illustrate how each one's ideas developed, from their first moment of scientific engagement through the research and discovery for which they're best known. This fascinating tour reveals 52 women at their best—while encouraging and inspiring a new generation of girls to put on their lab coats.
