The Handbook of Lexical Functional Grammar Mary Dalrymple,2023-12-14 Lexical Functional Grammar (LFG) is a nontransformational theory of linguistic structure, first developed in the 1970s by Joan Bresnan and Ronald M. Kaplan, which assumes that language is best described and modeled by parallel structures representing different facets of linguistic organization and information, related by means of functional correspondences. This volume has five parts. Part I, Overview and Introduction, provides an introduction to core syntactic concepts and representations. Part II, Grammatical Phenomena, reviews LFG work on a range of grammatical phenomena or constructions. Part III, Grammatical modules and interfaces, provides an overview of LFG work on semantics, argument structure, prosody, information structure, and morphology. Part IV, Linguistic disciplines, reviews LFG work in the disciplines of historical linguistics, learnability, psycholinguistics, and second language learning. Part V, Formal and computational issues and applications, provides an overview of computational and formal properties of the theory, implementations, and computational work on parsing, translation, grammar induction, and treebanks. Part VI, Language families and regions, reviews LFG work on languages spoken in particular geographical areas or in particular language families. The final section, Comparing LFG with other linguistic theories, discusses LFG work in relation to other theoretical approaches.

Electronic Consumer Contracts in the Conflict of Laws Zheng Sophia Tang,2015-10-22 The second edition of this highly recommended work addresses the interaction between conflict of laws, dispute resolution, electronic commerce and consumer contracts. In addition it identifies specific difficulties that conflicts lawyers and consumer lawyers encounter in electronic commerce and proposes original approaches to balance the conflict of interest between consumers' access to justice and business efficiency. The European Union has played a leading role in this area of law and its initiatives are fully explored. It pays particular attention to the most recent development in collective redress and alternative/online dispute resolution. By adopting multiple research methods, including a comparative study of the EU and US approach; historical analysis of protective conflict of laws; doctrinal analysis of legal provisions and economic analysis of law, it provides the most comprehensive examination of frameworks in cross-border consumer contracts.

Argumentation in Multi-Agent Systems Peter McBurney,Simon Parsons,Iyad Rahwan,2012-09-28 This book constitutes the thoroughly reviewed post-proceedings of the 8th International Workshop on Argumentation in Multi-Agent Systems, ArgMas 2011, held in Taipei, Taiwan in May 2011 in association with the 10th International Conference on Autonomous Agents and Multi-Agent Systems (AAMAS 2011). The 8 revised full papers taken from ArgMAS 2011. Also included are 5 invited papers based on presentations on argumentation at the AAMAS 2011 main conference. All together the 13 papers included in the book give a representative overview on current research on argumentation in multi-agent systems. The papers are listed alphabetically by first author within three thematic topics: foundations and theory; argumentation and dialogue; and applications.

60+ Questions to Ask Your Agent Before You List! Lesley E. Moll,2014-02-17 Make sure you know what questions to ask before you place your largest financial asset in the hands of a virtual stranger. This e-book provides an experienced Real Estate Broker's take on what homeowners really need to know before they choose their Agent. It includes questions to ask, why you should ask them and what answers to look for in an easy to read format. Your home is likely your most valuable financial asset. Yet, most people selling their homes only ask two questions of their Real Estate Agent: 1. What price will it sell for? 2. What commission do you charge? While important, there are many other questions that homeowners should have the answers to before placing their largest financial asset in the hands of a virtual stranger. All Agents are not created equal. This book provides an experienced Real Estate Broker's take on what homeowners really need to know before they choose their Agent. It includes questions to ask, why you should ask them and what answers to look for in an easy to read format. This book is a must-read before you interview any Agent to sell your property.

Grid and Cooperative Computing Minglu Li,Xian-He Sun,Qianni Deng,Jun Ni,2004-04-20 Grid and cooperative computing has emerged as a new frontier of information tech- logy. It aims to share and coordinate distributed and heterogeneous network resources forbetterperformanceandfunctionalitythatcanotherwisenotbeachieved.Thisvolume contains the papers presented at the 2nd International Workshop on Grid and Coope- tive Computing, GCC 2003, which was held in Shanghai, P.R. China, during December 7–10, 2003. GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers, developers, practitioners, and usersinGridcomputing,Webservicesandcooperativecomputing,includingtheoryand applications. For this workshop, we received over 550 paper submissions from 22 countries and regions. All the papers were peer-reviewed in depth and qualitatively graded on their relevance, originality, signi?cance, presentation, and the overall appropriateness of their acceptance. Any concerns raised were discussed by the program committee. The or- nizing committee selected 176 papers for conference presentation (full papers) and 173 submissions for poster presentation (short papers).The papers included herein represent the forefront of research from China, USA, UK, Canada, Switzerland, Japan, Aust- lia, India, Korea, Singapore, Brazil, Norway, Greece, Iran, Turkey, Oman, Pakistan and other countries. More than 600 attendees participated in the technical section and the exhibition of the workshop.

The Semantic Web – ISWC 2004 Sheila A. McIlraith,Dimitris Plexousakis,Frank van Harmelen,2004-10-19 The 3rd International Semantic Web Conference (ISWC 2004) was held Nov- ber 7-11, 2004 in Hiroshima, Japan. If it is true what the proverb says: "Once by accident, twice by habit, three times by tradition," then this third ISWC did indeed ?rmly establish a tradition. After the overwhelming interest in last year's conference at Sanibel Island, Florida, this year's conference showed that the Semantic Web is not just a one-day wonder, but has established itself ?rmly on the research agenda. At a time when special interest meetings with a Sem- tic Web theme are springing up at major conferences in numerous areas (ACL, VLDB, ECAI, AAAI, ECML, WWW, to name but a few), the

ISWC series has established itself as the primary venue for Semantic Web research. Response to the call for papers for the conference continued to be strong. We solicited submissions to three tracks of the conference: the research track, the industrial track, and the poster track. The research track, the premier venue for basic research on the Semantic Web, received 205 submissions, of which 48 were accepted for publication. Each submission was evaluated by three p- gram committee members whose reviews were coordinated by members of the senior program committee. Final decisions were made by the program co-chairs in consultation with the conference chair and the senior program committee. The industrial track, soliciting papers describing industrial research on the - mantic Web, received 22 submissions, of which 7 were accepted for publication.

The Verbal Domain Roberta D'Alessandro,Irene Franco,Ángel J. Gallego,2017 This volume features cutting-edge research from leading authorities on the nature and structure of the verbal domain and the complexity of the Verb Phrase (VP). The book is divided into three parts, representing the areas in which contemporary debate on the verbal domain is most active. The first part focuses on the V head, and includes four chapters discussing the setup of verbal roots, their syntax, and their interaction with other functional heads such as Voice and v. Chapters in the second part discuss the need to postulate a Voice head in the structure of a clause, and whether Voice is different from v. Voice was originally intended as the head hosting the external argument in its specifier, as well as transitivity. This section explores its relationship with syntactic voice, i.e. the alternation between actives and passives. Part three is dedicated to event structure, inner aspect, and Aktionsart. It tackles issues such as the one-to-one relation between argument structure and event structure, and whether there can be minimal structural units at the basis of the derivation of any sort of XP, including the VP.

Asia-Europe Industrial Connectivity in Times of Crisis Lucía Morales,Sam Dzever,Robert Taylor,2023-01-12 The main objective of this book is to offer an overview and a critical assessment of current connectivity issues in Asia and Europe, seen from an industrial perspective. Critical insights into the contemporary debate on connectivity during times of crisis, which has led to significant economic and social disruptions, are offered throughout the book. European and Asian countries seek to "bounce forward" and not "bounce back" as they navigate the complex economic recovery process. Innovation and investment emerge as critical players to help an economic recovery that shifts towards a more resilient and environmentally friendly approach, to ensure that the world economies stay connected. The global health crisis has revealed that, more than ever before, ubiquitous connectivity, underpinned by pioneering innovation, is a must. As such, governments worldwide need to ensure that businesses and societies emerge stronger and more resilient from existing and emerging crises by laying solid foundations that help to circumnavigate future disruptions of a global magnitude.

'And' Barry Schein,2017-07-21 A bold argument that "and" always means "&," the truth-functional sentential connective. In this book, Barry Schein argues that "and" is always the sentential logical connective with the same, one, meaning. "And" always means "&," across the varied constructions in which it is tokened in natural language. Schein examines the constructions that challenge his thesis, and shows that the objections disappear when these constructions are translated into Eventish, a neo-Davidsonian event semantics, and, enlarged with Cinerama Semantics, a vocabulary for spatial orientation and navigation. Besides rescuing "and" from ambiguity, Eventish and Cinerama Semantics solve general puzzles of grammar and meaning unrelated to conjunction, revealing the book's central thesis in the process: aspects of meaning mistakenly attributed to "and" are discovered to reflect neighboring structures previously unseen and unacknowledged. Schein argues that Eventish and Cinerama

Semantics offer a fundamental revision to clause structure and what aspects of meaning are represented therein. Eventish is distinguished by four features: supermonadicity, which enlarges verbal decomposition so that every argument relates to its own event; descriptive event anaphora, which replaces simple event variables with silent descriptive pronouns; adverbialization, which interposes adverbials derived from the descriptive content of every DP; and AdrPs, which replace all NPs with Address Phrases that locate what nominals denote within scenes or frames of reference. With 'And,' Schein rehabilitates an old rule of transformational, generative grammar, answering the challenges to it exhaustively and meticulously.
