Warren Chin

The Other Shore Gao Xingjian, 1999-06-15 Gao Xingjian is the leading Chinese dramatist of our time. He is also one of the most moving and literary writers for the contemporary stage. His plays have been performed all around the world, including China, Hong Kong, Taiwan, Japan, Australia, the Ivory Coast, the United States, France, Germany and other European countries. Born and educated in China, Gao studied French literature at the Beijing Foreign Languages Institute between 1957-1962. After the Cultural Revolution, he became a resident playwright at the Beijing People's Art Theatre. His works, including *Bus Stop*, *Absolute Signal*, and *Wilderness Man*, were trend-setting and have created many controversies and a wave of experimental drama in China. In 1987 he settled in Paris, France and continued to write in Chinese and in French. He was awarded the Chevalier de l'Ordre des Arts et des Lettres by the French Government in 1992. The present collection contains five of Gao Xingjian's most recent works: *The Other Shore* (1986), *Between Life and Death* (1991), *Dialogue and Rebuttal* (1992), *Nocturnal Wanderer* (1993), and *Weekend Quartet* (1995). One finds poetry, comedy as well as tragedy in the plays, which are graced by beautiful language and original imagery. Combining Zen philosophy and a modern worldview, they serve to illuminate the gritty realities of life, death, sex, loneliness, and exile, all essential concerns in Gao's understanding of the existence of modern man. The plays are also manifestations of the dramatist's idea of the tripartite actor, a process by which the actor neutralizes himself and achieves a disinterested observation of his self in performance.

Process Control Engineering A.Ramachandro. Rao, 2022-01-27 *Process Control Engineering* is a textbook for chemical, mechanical and electrical

engineering students, providing the theoretic fundamentals of control systems, and highlighting modern control theory and practical aspects of industrial processes. The introductory nature of the text should appeal to undergraduate students, while later chapters on linear systems, optimal control, adaptive control and intelligent control are directed toward advanced students and practising engineers. The textbook has been extensively tested in both undergraduate and graduate courses at the University of Alberta.

The Ashgate Research Companion to Insurgency and Counter Insurgency Warren Chin, 2010-12-28 This collection provides a comprehensive overview of the historical evolution of the art and practice of insurgency and counter insurgency, providing the reader with a wide survey of 'classic' campaigns. It gives an informed and balanced overview of insurgency and counter insurgency in the past, present and future.
