Research on the Road Dan Podjed,Simona Bezjak,Gregor Burger,Jernej Tiran,Simon Koblar,Tatiana Bajuk Senčar,Marko Polič,Mikhail Sysoev,Jože Guna,Luka Mladenovič,Saša Babič,Matevž Pogačnik,Alenka Bezjak Mlakar,Emilija Stojmenova Duh, How do people drive on roads and behave in traffic? How can we change driving habits and encourage more environmentally responsible modes of transportation? These are the two main questions to which the volume tries to answer. It tackles the problems of driving, traffic, transportation, and mobility fully, rather than from a single perspective, which has tended to be the norm so far. The authors describe how we can weave together qualitative and quantitative approaches, how useful interviews are for understanding driving comfort, the power ethnography has to help us understand the lifestyle of drivers, which technological tools and approaches are the most useful for analyzing styles of driving, how to explore vehicles and traffic by analyzing language, how traffic might improve or worsen our way of life from a psychological point of view, and how we can encourage environmentally friendly behavior and practices on both the road and in life in general. / Kako se prevažamo po cestah in vedemo v prometu? Kako lahko spreminjamo voznivske navade in spodbujamo bolj okoljsko odgovorne načine prevoza? To sta dve izhodiščni vprašanji, na kateri odgovarja zbornik, v katerem se avtorice in avtorji problematike vožnje, prometa, transporta in mobilnosti lotevajo celotno, namesto z enega zornega kota, kot je bilo to doslej bolj pogosto. Avtorice in avtorji predstavijo, kako lahko pri raziskovanju prepletemo kvalitativne in kvantitativne pristope, kako uporabni so intervjuji pri razumevanju udobja med vožnjo, kakšno moč ima etnografija pri spoznavanju načina življenja voznikov, kateri tehnološki pripomočki in pristopi so najbolj uporabni za analizo načinov vožnje z avtomobilom, kako lahko raziskujemo vozila in promet z analizo jezika, kako promet s psihološkega vidika izboljša in poslabša naš način življenja ter kako lahko spodbujamo okolju prijazne navade in prakse, in to tako na cesti kot tudi nasploh v življenju.

  Transforming Healthcare with the Internet of Things A. Ugon,B. Séroussi,C. Lovis,2016-04-12 The current trend in health and social care systems is a shift from care provision to citizen-driven health. Only a few years ago, the high-tech devices used in healthcare were limited to health cards and personal portable devices. These have since evolved dramatically to include wearables, sensors and devices for measuring health values. The application of such technologies has, for the most part been welcomed by both patients and professionals. It is the fact that these devices can be connected to and communicate with other connected devices and systems which has been the game changer in healthcare technology, not least because it has empowered and will empower patients to take more control of their own healthcare management. This book presents the proceedings of the Special Topic Conference (STC) of the European Federation for Medical Informatics (EFMI), held in Paris, France, in April 2016. The special topic this year is 'Transforming Healthcare with the Internet of Things'. The papers are divided into four sections: transforming healthcare with the Internet of things; societal dimensions of the Internet of things; ontology and decision support; and clinical information systems and data reuse; with a further section for poster presentations. The book will be of interest to all those involved in the provision and delivery of technology-based healthcare.
