The Pragmatics of Humour in Interactive Contexts Esther Linares Bernabéu, 2023-05-15 Recent years have seen a burgeoning interest in interactional humour from social and pragmatic perspectives, with fascinating results. Released more than a decade later than Norrick and Chiaro (2009) *Humor in Interaction*, *The Pragmatics of Humour in Interactive Contexts* gathers some of the most recent work on humour in interaction, with contributions taking (meta)pragmatic approaches to the analysis of various genres of interactive humour in both online and offline settings. This volume illustrates that a range of methodologies and perspectives can be applied to the study of such a complex phenomenon. These include analyses with a cognitive orientation and with multimodal approaches, work based on Relevance Theory, the General Theory of Verbal Humour, and Conversation Analysis, among others. In addition, all the authors represented here are recognised experts on the subject, and in most cases, are leading specialists in their respective fields. The book can be of use not only to scholars who study the linguistics of humour in interaction but also to students who wish to pursue research in the area.

Pravda Ha Ha Rory MacLean, 2019-11-01 Shortlisted for the Stanford Dolman Travel Book of the Year Award 'A gem of a book, informative, companionable, sometimes funny, and wholly original. MacLean must surely be the outstanding, and most indefatigable, traveller-writer of our time' John le Carré In 1989 the Berlin Wall fell. In that euphoric year Rory MacLean travelled from Berlin to Moscow, exploring lands that were – for most Brits and Americans – part of the forgotten half of Europe. Thirty years on, MacLean traces his original journey backwards, across countries confronting old ghosts and new fears: from revanchist Russia, through Ukraine's bloodlands, into illiberal

Hungary, and then Poland, Germany and the UK. Along the way he shoulders an AK-47 to go hunting with Moscow's chicken Tsar, plays video games in St Petersburg with a cyber-hacker who cracked the US election, drops by the Che Guevara High School of Political Leadership in a non-existent nowhereland and meets the Warsaw doctor who tried to stop a march of 70,000 nationalists. Finally, on the shores of Lake Geneva, he waits patiently to chat with Mikhail Gorbachev. As Europe sleepwalks into a perilous new age, MacLean explores how opportunists – both within and outside of Russia, from Putin to Home Counties populists – have made a joke of truth, exploiting refugees and the dispossessed, and examines the veracity of historical narrative from reportage to fiction and fake news. He asks what happened to the optimism of 1989 and, in the shadow of Brexit, chronicles the collapse of the European dream.

Language and Creativity Ronald Carter, 2015-09-16 *Language and Creativity* has become established as a pivotal text for courses in English Language, Linguistics and Literacy. Creativity in language has conventionally been regarded as the preserve of institutionalised discourses such as literature and advertising, and individual gifted minds. In this ground-breaking book, bestselling author Ronald Carter explores the idea that creativity, far from being simply a property of exceptional people, is an exceptional property of all people. Drawing on a range of real examples of everyday conversations and speech, from flatmates in a student house and families on holiday to psychotherapy sessions and chat-lines, the book argues that creativity is an all-pervasive feature of everyday language. Using close analysis of naturally occurring language, taken from a unique 5 million word corpus, *Language and Creativity* reveals that speakers commonly make meanings in a variety of creative ways, in a wide range of social contexts and for a diverse set of reasons. This Routledge Linguistics Classic is here reissued with a new preface from the author, covering a range of key topics from e-language and internet discourse to English language teaching and world Englishes. *Language and Creativity* continues to build on the previous theories of creativity, offering a radical contribution to linguistic, literary and cultural theory. A must for anyone interested in the creativity of our everyday speech.

Mediating Discourse Online Sally Sieloff Magnan, 2008 Information and communication technology is transforming our notion of literacy. In the study of second language learning, there is an acute need to understand how learners collaborate in mediating discourse online. This edited volume offers essays and research studies that lead us to question the borders between speech and writing, to redefine narrative, to speculate on the consequences of many-to-many communication, and to ponder the ethics of researching online interaction. Using diverse technologies (bulletin boards, course management systems, chats, instant messaging, online gaming) and situated in different cultural environments, the studies explore intercultural notions of identity, voice, and collaboration. Although the studies come from varying theoretical perspectives, they point, as a whole, to insights to be gained from an ecological approach to studying how people make discourse online. The volume will especially benefit researchers in the digital arena and instructors who must consider how online interaction affects language learning and use.

Speech Prosody in Speech Synthesis: Modeling and generation of prosody for high quality and flexible speech synthesis Keikichi Hirose, Jianhua Tao, 2015-02-25 The volume addresses issues concerning prosody generation in speech synthesis, including prosody modeling, how we can convey para- and non-linguistic information in speech synthesis, and prosody control in speech synthesis (including prosody conversions). A high level of quality has already been achieved in speech synthesis by using selection-based methods with segments of human speech. Although the method enables synthetic speech with various voice qualities and speaking styles, it requires large speech corpora with targeted quality and style. Accordingly, speech conversion techniques are now of growing interest among researchers. HMM/GMM-based methods are widely used, but entail several major problems when viewed from the prosody perspective; prosodic features cover a wider time span than segmental features and their frame-by-frame processing is not always appropriate. The book offers a good overview of state-of-the-art studies on prosody in speech synthesis.

Argumentation in Actual Practice Frans H. van Eemeren, Bart Garssen, 2019-09-23 *Argumentation in Actual Practice* contains a collection of topical studies about argumentative discourse in context written by argumentation scholars from a diversity of academic backgrounds. Some contributions provide general perspectives, other contributions deal with specific issues, particular types of argumentative discourse or individual argumentative speech events. The contexts in which argumentation is examined vary from politics and the media to medical, juridical, educational, commercial or military contexts, a specific academic discipline, a special issue or pertain to all kinds of contextualised argumentative discourse. The issues discussed include the interpretation and analysis of argumentation, strategic manoeuvring, argument schemes, the stock issues, the fallacies, the principle of charity and the persuasiveness of argumentative discourse. A common feature is that they are all empirically-oriented and that virtually all of them are strongly concerned with an adequate understanding of contextualised argumentative discourse and the factors that may increase or decrease its reasonableness and effectiveness.

Sustainable Cultural Management Łukasz Wróblewski, Ana Gaio, Ellen Rosewall, 2019-12-06 The connections between culture and sustainability have been in the public agenda since the 20th century. However, whilst global sustainability programmes at international institutional levels are yet to recognise the role of culture in their sustainability policies, the bid (albeit failed) in the early 2000s to formally add "culture" to the trilogy of sustainability pillars (economic, social, and environmental) mobilised a new discourse for the reframing of cultural policy narrative, which in turn urged a reassessment of methods of cultural management reflecting the same concerns among the sector's grassroots. The idea of sustainability and culture working together and their envisioned role in future-proofing society and human development captured the imagination of cultural

commentators, policy makers and practitioners alike, keen to fulfil these principles “out there”—in cultural organizations and events mega and small, in cities and regions, local and global. The papers in this Special Issue reflect this appeal. This publication covers a wide selection of issues related to sustainable cultural management, which means that it can be recommended to a varied audience. First of all, it can be recommended to managers experienced in cultural management, where success is measured more by the degree of mission accomplishment and the social benefits achieved rather than by profit. Another group comprises the employees of cultural organizations who want to improve their knowledge of sustainable cultural management. This Special Issue can also be recommended to artists, researchers, students, state and local government employees, founders and patrons of art, and all those who want to understand the importance of sustainable cultural management.

Making Time for Digital Lives Anne Kaun, 2020-09-09 It is said that the ontology of data resists slowness and also that the digital revolution promised a levelling of the playing field. Both theories are examined in this timely collection of chapters looking at time in the digital world. Since data has assumed such a paramount place in the modern neoliberal world, contemporary concepts of time have undergone radical transformation. By critically assessing the emerging initiatives of slowing down in the digital age, this book investigates the role of the digital in ultimately reinforcing neo-liberal temporalities. It shows that both speed-up and slow down imperatives often function as a form of biopolitical social control necessary to contemporary global capitalism. Problematic paradoxes emerge where a successful slow down and digital detox ultimately are only successful if the individual returns to the world as a more productive, labouring neoliberal subject. Is there another way? The chapters in this collection, broken up into three parts, ask that question.

Handbook of Research on Inequities in Online Education During Global Crises Kyei-Blankson, Lydia,Blankson, Joseph,Ntuli, Esther,2021-05-07 In response to the COVID-19 pandemic, many educational institutions implemented social distancing interventions such as initiating closure, developing plans for employees to work remotely, and transitioning teaching and learning from face-to-face classrooms to online environments. The abrupt switch to online teaching and learning, for the most part, has been a massive change for administration, faculty, and students at traditional brick-and-mortar universities and colleges as concerns regarding the pedagogical soundness of this mode of delivery remain among some stakeholders. Not only that, but the switch has also revealed the inequities in the system when it comes to the types of students universities serve. It is important as institutions move forward with online instruction that consideration be made about all students and what policies and strategies need to be put into place to help support and meet the needs of all constituents now or when unprecedented situations arise. The only way this can be done is by documenting the experiences through the eyes of faculty who were at the frontline of providing instruction and advising services to students. The Handbook of Research on Inequities in Online Education During Global Crises brings to light the struggles faculty and students faced as they were required to switch to online education during the global COVID-19 health crisis. This crisis has revealed inequities in the educational system as well as the specific effects of inequities when it comes to learning online, and the chapters in this book provide information to help institutions be better prepared for online education or remote learning in the future. While highlighting topics such as new educational trends, remote instruction, diversity in education, and teaching and learning in a pandemic, this book is ideal for in-service and preservice teachers, administrators, teacher educators, practitioners, stakeholders, researchers, academicians, and students interested in the inequalities within the educational systems and the new policies and strategies put in place with online education to combat these issues and support the needs of all diverse student populations.
