Consumer Tribes Bernard Cova, Robert Kozinets, Avi Shankar, 2012-06-25 Marketing and consumer research has traditionally conceptualized consumers as individuals- who exercise choice in the marketplace as individuals not as a class or a group. However an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social, and that who we are is an inherently social phenomenon. It is the tribus, the many little groups we belong to, that are fundamental to our experience of life. Tribal Marketing shows that it is not individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships. The social 'links' (social relationships) are more important than the things (brands etc.) The aim of this book is therefore to offer a systematic overview of the area that has been defined as "cultures of consumption"- consumption microcultures, brand cultures, brand tribes, and brand communities. It is though these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour. It will be essential to everyone who needs to understand the new paradigm in consumer research, brand management and communications management.

Life in the times of Lockdown Alka Dixit, 2020-04-05 The fact that life is uncertain can be judged from the advent of COVID-19 and how it shook the foundation of our lifestyle in a few months. The result was social distancing and lockdown in several countries. But what cannot be anticipated is the kind of stress that your mind goes through at such a time. LIFE IN THE TIMES OF LOCKDOWN book will help you analyze what you can do to stay happy, even in the tough lockdown situation.

Why Read Moby-Dick? Nathaniel Philbrick, 2013-09-24 A "brilliant and provocative" (The New Yorker) celebration of Melville's masterpiece—from the bestselling author of *In the Heart of the Sea*, *Valiant*, and *In the Hurricane's Eye* One of the greatest American novels finds its perfect contemporary champion in *Why Read Moby-Dick?*, Nathaniel Philbrick's enlightening and entertaining tour through Melville's classic. As he did in his National Book Award-winning bestseller *In the Heart of the Sea*, Philbrick brings a sailor's eye and an adventurer's passion to unfolding the story behind an epic American journey. He skillfully navigates Melville's world and illuminates the book's humor and unforgettable characters—finding the thread that binds Ishmael and Ahab to our own time and, indeed, to all times. An ideal match between author and subject, *Why Read Moby-Dick?* will start conversations, inspire arguments, and make a powerful case that this classic tale waits to be discovered anew. "Gracefully written [with an] infectious enthusiasm..."—New York Times Book Review

Brain Art Anton Nijholt, 2019-05-25 This is the first book on brain-computer interfaces (BCI) that aims to explain how these BCI interfaces can be used for artistic goals. Devices that measure changes in brain activity in various regions of our brain are available and they make it possible to investigate how brain activity is related

to experiencing and creating art. Brain activity can also be monitored in order to find out about the affective state of a performer or bystander and use this knowledge to create or adapt an interactive multi-sensorial (audio, visual, tactile) piece of art. Making use of the measured affective state is just one of the possible ways to use BCI for artistic expression. We can also stimulate brain activity. It can be evoked externally by exposing our brain to external events, whether they are visual, auditory, or tactile. Knowing about the stimuli and the effect on the brain makes it possible to translate such external stimuli to decisions and commands that help to design, implement, or adapt an artistic performance, or interactive installation. Stimulating brain activity can also be done internally. Brain activity can be voluntarily manipulated and changes can be translated into computer commands to realize an artistic vision. The chapters in this book have been written by researchers in human-computer interaction, brain-computer interaction, neuroscience, psychology and social sciences, often in cooperation with artists using BCI in their work. It is the perfect book for those seeking to learn about brain-computer interfaces used for artistic applications.

Reality at Dawn Ram Chandra, 1968 Reality at Dawn Is one of the greatest yogic texts of the modern era. Written in the 1940s by Ram Chandra of Shahjahanpur , known as Babuji, it lights the path for seekers to explore Realisation and further onwards to the Centre of existence itself. Babuji writes in simple language, unravelling the most profound principles and wisdom, and it is from this deep wisdom that the practices of Heartfulness emerged. Babuji has laid out the practical steps to reach the highest spiritual state available to human beings. He has also made this possibility available to all, no matter their current level of attainment, culture, education or background. In doing so, he has demystified spirituality and given it to the people.

Angel Investing David S. Rose, 2014-04-28 Achieve annual returns of 25% or more with a well-designed angel portfolio Written by David S. Rose, the founder of Gust—the global platform that powers the world of organized professional angel investing—Angel Investing is a comprehensive, entertaining guide that walks readers through every step of the way to becoming a successful angel investor. It is illustrated with stories from among the 90+ companies in which David has invested during a 25 year career as one of the world's most active business angels and includes instructions on how to get started, how to find and evaluate opportunities, and how to pursue and structure investments to maximize your returns. From building your reputation as a smart investor, to negotiating fair deals, adding value to your portfolio companies and helping them implement smart exit strategies, David provides both the fundamental strategies and the specific tools you need to take full advantage of this rapidly growing asset class. He details the advantages of joining an angel group, explains how seed and venture funds can help leverage an investor's resources, and reveals how recent regulatory changes and new online platforms are making startup investing accessible to millions of Americans. Making money is no longer about sitting back and reading stock listings, David says. It is now about being part owner of an exciting startup that can be fun and financially rewarding. Angel Investing teaches investors how to carefully select and manage investments, establish a long term view, and approach angel investing as a serious part of an alternative asset portfolio while also enjoying being an integral part of an exciting new venture.

Functional Metagenomics: Tools and Applications Trevor C. Charles, Mark R. Liles, Angela Sessitsch, 2017-10-09 In this book, the latest tools available for functional metagenomics research are described. This research enables scientists to directly access the genomes from diverse microbial genomes at one time and study these "metagenomes". Using the modern tools of genome sequencing and cloning, researchers have now been able to harness this astounding metagenomic diversity to understand and exploit the diverse functions of microorganisms. Leading

scientists from around the world demonstrate how these approaches have been applied in many different settings, including aquatic and terrestrial habitats, microbiomes, and many more environments. This is a highly informative and carefully presented book, providing microbiologists with a summary of the latest functional metagenomics literature on all specific habitats.

Proceedings of Fatigue, Durability and Fracture Mechanics S. Seetharamu, K. Bhanu Sankara Rao, Raghunath Wasudev Khare, 2017-11-01 This book presents the proceedings of Fatigue Durability India 2016, which was held on September 28-30 at J N Tata Auditorium, Indian Institute of Science, Bangalore. This 2nd International Conference & Exhibition brought international industrial experts and academics together on a single platform to facilitate the exchange of ideas and advances in the field of fatigue, durability and fracture mechanics and its applications. This book comprises articles on a broad spectrum of topics from design, engineering, testing and computational evaluation of components and systems for fatigue, durability, and fracture mechanics. The topics covered include interdisciplinary discussions on working aspects related to materials testing, evaluation of damage, nondestructive testing (NDT), failure analysis, finite element modeling (FEM) analysis, fatigue and fracture, processing, performance, and reliability. The contents of this book will appeal not only to academic researchers, but also to design engineers, failure analysts, maintenance engineers, certification personnel, and R&D professionals involved in a wide variety of industries.

techniques, this should be a surmountable task.

Selected Works Ralph Waldo Emerson, 2003 The first book of its kind to pair the writings of Emerson and Fuller, this text plays a major role in illuminating the contributions of both men and women to American Transcendentalism. In addition to a generous selection of Emerson's essays, the complete text of Margaret Fuller's *Woman in the Nineteenth Century*, and a selection of Fuller's dispatches from Europe, the volume contains copious contextualizing footnotes and an excellent introduction. Readers also explore the struggles of both writers to change their views in response to political changes of the times.

Infrastructure Space Andreas Ruby, Ilka Ruby, 2017 Is infrastructure but the plumbing and wiring of the human environment, or is it the true lifeblood of the spaces we inhabit? Infrastructural systems facilitate the flow of anything from people and goods to resources and information. While engineered to perform specific tasks, such networks also determine the structure of buildings, cities, and metropolitan regions, if not of entire nations and the planet itself. Taking this critical leverage in consideration, this book calls for expanding and renegotiating the roles of infrastructure not only as a technical, but also as a political, economic, social, and even aesthetic matter of concern for all, claimed not only as the means for achieving more resilient forms of development, but moreover as a right to a sustainable way of life. Twenty-five essays by architects, engineers, urban theorists and policy-makers address infrastructure as ?thing?, ?networked system? and ?agency? respectively in three chapters, which are periodically interspersed by a visual atlas of examples, that playfully celebrate infrastructure through the lens of its spatial qualities.
