## **Biodiversity and Education for Sustainable**

**Development** Paula Castro,Ulisses M. Azeiteiro,Paula Bacelar-Nicolau,Walter Leal Filho,Anabela Marisa Azul,2016-05-26 This book gathers interdisciplinary reflections from researchers, educators, and other experts on the subject of biodiversity closer to education and learning. The book also highlights its role as an added value to strategic principles for healthy ecosystems and sustainable human development. It promotes critical thinking and foster practices and attitudes for Education for Sustainable Development reconciling education with principles of human behaviour and nature. Readers especially find this book a timely resource in light of the Strategic Plan for Biodiversity 2011–2020, the Aichi Targets, and the new EU biodiversity strategy “Our life insurance, our natural capital: an EU biodiversity strategy to 2020”. Along with the challenge of ecosystems and public health, biodiversity conservation is essential for humanity’s continued security and sustainability, as it touches on all aspects of people’s lives.

**The Cartel** Don Winslow,2017-09-26 The New York Times bestselling second novel in the explosive Power of the Dog series—an action-filled look at the drug trade that takes you deep inside a world riddled with corruption, betrayal, and bloody revenge. Book Two of the Power of the Dog Series It’s 2004. Adán Barrera, kingpin of El Federación, is languishing in a California federal prison. Ex-DEA agent Art Keller passes his days in a monastery, having lost everything to his thirty-year blood feud with the drug lord. Then Barrera escapes. Now, there’s a two-million-dollar bounty on Keller’s head and no one else capable of taking Barrera down. As the carnage of the drug war reaches surreal new heights, the two men are locked in a savage struggle that will stretch from the mountains of Sinaloa to the shores of Veracruz, to the halls of power in Washington, ensnaring countless others in its wake. Internationally bestselling author Don Winslow's

The Cartel is the searing, unfiltered epic of the drug war in the twenty-first century.

The Oligarchs' Grip David Lingelbach,Valentina Rodríguez Guerra,2023-11-06 The first ever guide to oligarchs as a global and historical phenomenon. Today, more than twenty oligarchs serve as heads of state or government in countries such as Russia, South Africa, Lebanon, and El Salvador. Many have a net worth in excess of \$1 billion, and they all – whether directly or indirectly – impact our daily lives. Who are they and how have they dominated our world? What lessons can we learn from them, and what might the future hold? In *The Oligarchs' Grip: Fusing Wealth and Power*, entrepreneurship professor David Lingelbach and oligarch researcher Valentina Rodríguez Guerra draw upon more than 25 years of research (including conversations with Vladimir Putin and other oligarchs), 16 case studies, and dozens of historical examples to develop the first-ever model revealing the strategies oligarchs employ to fuse wealth and power, and transition between the two. This model gives insight into how oligarchs use multiple control mechanisms to exploit an increasingly uncertain world. *The Oligarchs' Grip* is a fascinating read for economists, political scientists, business academics, policymakers, businesspeople and anyone interested in oligarchs and the wealth and power they wield on the politico-economic scene today.

**The International Grain Trade** Michael Atkin, 1995-05-31 In the second edition of this book, Michael Atkin examines the political and economic dynamics of the international trade, explaining to the reader how the industry works and producing an understanding of the many ironies that are apparent in the trade of this vital commodity. This edition also takes into account a number of recent developments that have affected, or promise to affect, the grain trade such as the collapse of the USSR and the completion of the Uruguay Round at GATT.

*Thirty Years of Economic Policy* Charles Wyplosz, 2015 Over the last 30 years, Economic Policy has strived to produce policy relevant and rigorous analyses of the economic challenges of the time. A number of articles have been highly influential, shaping thinking among academic economists and policymakers. This volume brings together key historic articles that still resonate today. It provides academics with important research markers, and also provides students (and their teachers) with a 'reader' that demonstrates how the field of economics progresses by responding to challenges of the time. It will also inspire a new generation of students and academics with a recollection of how some of today's most influential economists made early contributions.

### **Fighting Cross-Border Cartels** Pierre Horna, 2020-03-19

This book is the first detailed treatment of the approaches taken to enforce competition laws against cross-border cartels (CBCs) from the perspective of young and small competition authorities (more than 70% of the total number of authorities worldwide). No other legal or inter-disciplinary scholarship exists in the market that deals with the issue of a taxonomy of CBCs combined with young/small competition authorities' problems. The book looks at the extent of the harms caused by CBCs and issues associated with tackling them at a transnational level. It explains why past solutions to problems with cooperation have failed and proposes novel ideas on how to improve cooperation and coordination in certain types of CBC investigations (transnational and regional CBCs). The proposals are based on primary-source information and observations made by the author as part of his work in the UN, and interviews with leading enforcers from young, small, old and large jurisdictions. Young/small competition authorities, competition lawyers and economists, scholars and students within the fields of competition law and international law, and those interested in international cooperation and coordination in the area of cartel enforcement in emerging markets will greatly benefit from this book. It is clearly structured and extensively referenced, providing a valuable guide to the topic.

### **The Anticompetitive Impact of Regulation** Giuliano

Amato, Laraine L. Laudati, 2001-01-01 This timely book addresses the important issue of the negative effects of anticompetitive regulation on industry and the massive economic harm it causes. The distinguished contributors, including economic and legal scholars, advocate the need for a review of all anticompetitive laws and address several industry and country case studies with the ultimate aim of providing recommendations to eliminate the impact of anticompetitive regulation. The first part of the book considers regulations affecting private business and professions, part two covers public utility and public services regulation, whilst

part three discusses the role of institutions and competition authorities in relation to anticompetitive practices. The authors draft guidelines, based on economic evidence and legal arguments, which they believe would provide a starting point for the European Union to address the problem. They go on to propose possible implementation strategies for these guidelines from both an institutional and legal perspective. The book also includes a historical perspective on the evolution of anticompetitive regulation complemented by an overview of the actions currently being implemented to address and reverse the problem in other jurisdictions.

**An Analysis of Cartelized Market Structures for Nonrenewable Resources** Robert A. Marshalla,2017-10-17  
Originally published in 1979. While the theory of non-renewable resources under competitive and monopolistic market regimes have been relatively well developed, almost no attention has been given to the development of a theoretical framework for analysis of the spectrum of mixed market structure between those extremes. The world oil market structure is an example of such an intermediate market structure. The purpose of this title is to develop such a theoretical framework. The study examines non-renewable resource markets in which a profit maximizing producer cartel co-exists with a non-cartel supply sector, which is alternately modelled as consisting of a collection of competitive firms or as exhibiting other exogenously assumed supply behaviours. This title will be of interest to students of environmental economics.

**The Measure of Madness:** Cheryl Paradis,Katherine Ramsland,2010-07-01 Enter the “fascinating” and frightening world of modern forensic psychology as experienced by one of the most respected practitioners in the field today (Robert K. Tanenbaum, New York Times–bestselling author). At the heart of

countless crimes lie the mysteries of the human mind. In this eye-opening book, Dr. Cheryl Paradis draws back the curtain on the fascinating world of forensic psychology, and revisits the most notorious and puzzling cases she has handled in her multifaceted career. Her riveting, sometimes shocking stories reveal the crucial and often surprising role forensic psychology plays in the pursuit of justice—in which the accused may truly believe their own bizarre lies, creating a world that pushes them into committing horrific, violent crimes. Join Dr. Paradis in a stark concrete cell with the indicted as she takes on the daunting task of mapping the suspect's madness or exposing it as fakery. Take a front-row seat in a tense, packed courtroom, where her testimony can determine an individual's fate—or if justice will be truly served. The criminal thought process has never been so intimately revealed—or so darkly compelling—as in this “excellent and entertaining” journey into the darkest corners of the human mind (Booklist).

**Running the World's Markets** Ruben Lee,2010-12-28 The efficiency, safety, and soundness of financial markets depend on the operation of core infrastructure--exchanges, central counter-parties, and central securities depositories. How these institutions are governed critically affects their performance. Yet, despite their importance, there is little certainty, still less a global consensus, about their governance. *Running the World's Markets* examines how markets are, and should be, run. Utilizing a wide variety of arguments and examples from throughout the world, Ruben Lee identifies and evaluates the similarities and differences between exchanges, central counter-parties, and central securities depositories. Drawing on knowledge and experience from various disciplines, including business, economics, finance, law, politics, and regulation, Lee employs a range of methodologies to tackle

different goals. Conceptual analysis is used to examine theoretical issues, survey evidence to describe key aspects of how market infrastructure institutions are governed and regulated globally, and case studies to detail the particular situations and decisions at specific institutions. The combination of these approaches provides a unique and rich foundation for evaluating the complex issues raised. Lee analyzes efficient forms of governance, how regulatory powers should be allocated, and whether regulatory intervention in governance is desirable. He presents guidelines for identifying the optimal governance model for any market infrastructure institution within the context of its specific environment. *Running the World's Markets* provides a definitive and peerless reference for how to govern and regulate financial markets.

*Israel* International Monetary Fund, 2012-04-12 Israel's compliance with International Organization of Securities Commissions' objectives and Principles of Securities Regulation has been assessed. The regulatory regime is well developed and in most respects is comparable with that of major jurisdictions. For the most part, it is compliant with international standards and regulation, and oversight by the Israel Securities Authority is robust and effective. With regard to the regulation of broker dealers, there is a significant gap in the coverage of the regulatory regime.

**Suspicious Inquiries of Ghost Rider** Glenn Brunet, 2018-05-22 G and Ghost Riders crew recently returned from a near-death voyage and are ready for rest and tranquility of the beautiful Florida Panhandle. G and his three sensuous ladies just want things to get back to normal, but no good deed goes unpunished. They find themselves being mysteriously sought out by two different factions one for retaliation of recent past events and the second for reasons they are unaware of. Both have high

stakes and cant be ignored. They learn that the government has a hand in the second factions quest, and G resists the effort to be pulled into the government plans. The consequences are just too high because he knows that the lives of his ladies are at stake, and to him, money cant buy the life of anyone he loves. But the long arm of the government does pull them into the perils of yet another life-threatening situation, and this time, someone has to pay the price.
