African Fashion, Global Style Victoria L. Rovine,2015-01-12 African Fashion, Global Style provides a lively look at fashion, international networks of style, material culture, and the world of African aesthetic expression. Victoria L. Rovine introduces fashion designers whose work reflects African histories and cultures both conceptually and stylistically, and demonstrates that dress styles

associated with indigenous cultures may have all the hallmarks of high fashion. Taking readers into the complexities of influence and inspiration manifested through fashion, this book highlights the visually appealing, widely accessible, and highly adaptable styles of African dress that flourish on the global fashion market.

Death and Taxes Johann van Loggerenberg, 2018-07-13 Nothing in life is certain, except death and taxes - or so the expression goes. And over the past two decades South African criminals and tax dodgers have come to realise this truth the hard way. Tax sleuth Johann van Loggerenberg was at the centre of many of SARS' high-profile cases during his time there. As far as SARS is concerned all forms of income are subjected to tax, even if by ill-gotten means. Whether you are a drug dealer from Durban, one of the hitmen who shot Brett Kebble or soccer boss Irvin Khoza, you have to pay your dues! Van Loggerenberg relates the riveting inside stories of the investigations into businessmen like Dave King, Billy Rautenbach, Barry Tannenbaum and his ponzi scheme, and others. Over the years he got to know all the scams and dirty tricks in the book and he explains these in plain language. In these investigations the tax authority worked closely with the police, the NPA and the Directorate of Special Operations. However, after a few years SARS became the victim of its own success. In telling the stories of how tax evaders were caught, Van Loggerenberg also shows how the power struggle between different state departments and the phenomenon of state capture in recent years started crippling SARS.

Gateway State Sarah Miller-Davenport, 2021-07-06 How Hawai'i became an emblem of multiculturalism during its journey to statehood in the mid-twentieth century Gateway State explores the development of Hawai'i as a model for liberal multiculturalism and a tool of American global power in the era of decolonization. The establishment of Hawai'i statehood in 1959 was a watershed moment, not only in the ways Americans defined their nation's role on the international stage but also in the ways they understood the problems of social difference at home. Hawai'i's remarkable transition from territory to state heralded the emergence of postwar multiculturalism, which was a response both to independence movements abroad and to the limits of civil rights in the United States. Once a racially problematic overseas colony, by the 1960s, Hawai'i had come to symbolize John F. Kennedy's New Frontier. This was a more inclusive idea of who counted as American at home and what areas of the world were considered to be within the U.S. sphere of influence. Statehood advocates argued that Hawai'i and its majority Asian population could serve as a bridge to Cold War Asia—and as a global showcase of American democracy and racial harmony. In the aftermath of statehood, business leaders and policymakers worked to institutionalize and sell this ideal by capitalizing on Hawai'i's diversity. Asian Americans in Hawai'i never lost a perceived connection to Asia. Instead, their ethnic difference became a marketable resource to help other Americans navigate a decolonizing world. As excitement over statehood dimmed, the utopian vision of Hawai'i fell apart, revealing how racial inequality and U.S. imperialism continued to shape the fiftieth state—and igniting a backlash against the islands' white-dominated institutions.

Inclusive Dualism Nicoli Nattrass, Jeremy Seekings, 2019-05-29 W. Arthur Lewis, the founding father of development economics, proposed a dualist model of economic development in which 'surplus' (predominantly under-employed) labour shifted from lower to higher productivity work. In practice, historically, this meant that labour was initially drawn out of subsistence agriculture into low-wage, labour-intensive manufacturing, including in clothing production, before shifting into higher-wage work. This development strategy has become unfashionable. The International Labour Organisation (ILO) worries that low-wage, labour-intensive industry promises little more than an impoverishing 'race to the bottom'. Inclusive Dualism: Labour-intensive Development, Decent Work, and Surplus Labour in Southern Africa argues that decent work fundamentalism, that is the promotion of higher wages and labour productivity at the cost of lower-wage job destruction, is a utopian vision with potentially dystopic consequences for countries with high open unemployment, many of which are in Southern Africa. Using the South African clothing industry as a case study Inclusive Dualism argues that decent work fundamentalism ignores the inherently differentiated character of industry resulting in the unnecessary destruction of labour-intensive jobs and the bifurcation of society into highly-paid, high-productivity insiders and low-paid or unemployed

outsiders. It demonstrates the broader relevance of the South Africa case, examining the growth in surplus labour across Africa. It shows that low- and high-productivity firms can co-exist, and challenges the notion that a race to the bottom is inevitable. Inclusive Dualism instead favours multi-pronged development strategies that prioritise labour-intensive job creation as well as facilitating productivity growth elsewhere without destroying jobs.

Development Challenges, South-South Solutions: December 2009 Issue David South, Writer, 2015-02-10 Development Challenges, South-South Solutions is the monthly e-newsletter for the United Nations Development Programme's South-South Cooperation Unit (www.southerninnovator.org). It has been published every month since 2006.

Kwaito Bodies Xavier Livermon, 2020-04-24 In Kwaito Bodies Xavier Livermon examines the cultural politics of the youthful black body in South Africa through the performance, representation, and consumption of kwaito, a style of electronic dance music that emerged following the end of apartheid. Drawing on fieldwork in Johannesburg's nightclubs and analyses of musical performances and recordings, Livermon applies a black queer and black feminist studies framework to kwaito. He shows how kwaito culture operates as an alternative politics that challenges the dominant constructions of gender and sexuality. Artists such as Lebo Mathosa and Mandoza rescripted notions of acceptable femininity and masculinity, while groups like Boom Shaka enunciated an Afrodisporic politics. In these ways, kwaito culture recontextualizes practices and notions of freedom within the social constraints that the legacies of colonialism, apartheid, and economic inequality place on young South Africans. At the same time, kwaito speaks to the ways in which these legacies reverberate between cosmopolitan Johannesburg and the diaspora. In foregrounding this dynamic, Livermon demonstrates that kwaito culture operates as a site for understanding the triumphs, challenges, and politics of post-apartheid South Africa.
