The Vertical Mouse: Learning the Best Features Dale Michelson,2018-06-07

The vertical mouse allows individuals to use the device while at the same time maintaining a normal hand position. This will therefore relieve carpal tunnel syndrome, joint pains from the shoulders and arms and other upper body pains associated with the prolonged use of a mouse. The vertical mouse is covered in a rubber coating which prevents the hand from slipping, making it ideal for working for long periods. Some vertical ergonomic mouse come equipped with a Lithium ion battery, similar to that found in today's mobile phones, which is rechargeable. The battery, when fully charged may last for up to two months, depending on the manufacturer, saving money from regular battery change. Six (6) buttons are found on some brands compared to the two (2) found on the traditional mouse and up to three possible positions of adjustment.

Comparative Immunoglobulin Genetics Azad K. Kaushik,Yfke Pasman,2014-05-01

This contemporary book covers significant new knowledge that has emerged during the last two decades and, thus, provides novel antibody phylogenetic perspectives relevant to development of new antibody-based therapeutics and vaccines. It fills a much-needed niche in the area of immunoglobulin genetics across species from a comparative perspective. New insights and perspectives from immunoglobulin genetics from species such as sea lamprey, cattle, marsupial, bat, rat, rabbit, and swine—other species than the traditional subjects of mice and humans—are relevant to antibody design and engineering. These new perspectives find direct application in the cutting-edge areas of antibody design, engineering and therapeutics, antibody-drug conjugates, and novel antibody-based vaccines. This book fills the need to provide updated knowledge of this newly exploded area that is finding applications in new drug development. No other competing books on the topic are available in the market. The book will be of great interest to immunologists, immunology researchers, immunogeneticists, researchers in pharmaceutical science, those involved in the infectious disease and antibody therapeutics areas, and many others.

Zoological Physics Boye K. Ahlborn,2006-09-29 This book presents a physicists view of life. The primary life functions of animals, such as eating, growing, reproducing and getting around all depend on motion: Motion of materials through the body, motion of limbs and motion of the entire body through water, air and on land. These activities are driven by internal information stored in the genes or in the brain and by external information transmitted by the senses. This book models these life functions with the tools of physics. It will appeal to all scientists, from the undergraduate level upwards, who are interested in the role played by physics in the animal kingdom.

Sensor Networks and Configuration Nitaigour P. Mahalik,2007-06-04 This book incorporates a selection of research and development papers. Its scope is on history and background, underlying design methodology, application domains and recent developments. The readers will be able to understand the underlying technology, philosophy, concepts, ideas, and principles, with

device, and a personal assistant, it is particularly important to address challenges timely in applying advanced pattern recognition, signal, information and multimedia processing techniques, and new emerging networking technologies to such mobile systems. The primary objective of this book is to foster interdisciplinary discussions and research in mobile multimedia processing techniques, applications and systems, as well as to provide stimulus to researchers on pushing the frontier of emerging new technologies and applications. One attempt on such discussions was the organization of the First International Workshop of Mobile Multimedia Processing (WMMP 2008), held in Tampa, Florida, USA, on December 7, 2008. About 30 papers were submitted from 10 countries across the USA, Asia and Europe.

Life System Modeling and Intelligent Computing Kang Li, Li Jia, Xin Sun, Minrui Fei, George W. Irwin, 2010-09-02 The 2010 International Conference on Life System Modeling and Simulation (LSMS 2010) and the 2010 International Conference on Intelligent Computing for Sustainable Energy and Environment (ICSEE 2010) were formed to bring together researchers and practitioners in the fields of life system modeling/simulation and intelligent computing applied to worldwide sustainable energy and environmental applications. A life system is a broad concept, covering both micro and macro components ranging from cells, tissues and organs across to organisms and ecological niches. To comprehend and predict the complex behavior of even a simple life system can be extremely difficult using conventional approaches. To meet this challenge, a variety of new theories and methodologies have emerged in recent years on life system modeling and simulation. Along with improved understanding of the behavior of biological systems, novel intelligent computing paradigms and techniques have emerged to handle complicated real-world problems and applications. In particular, intelligent computing approaches have been valuable in the design and development of systems and facilities for achieving sustainable energy and a sustainable environment, the two most challenging issues currently facing humanity. The two LSMS 2010 and ICSEE 2010 conferences served as an important platform for synergizing these two research streams.

Syntax within the Word Daniel Siddiqi, 2009-02-18 Syntax within the Word provides a multifaceted look into the syntactic framework of Distributed Morphology (DM) within the Minimalist program. For those unfamiliar with the theory, this monograph provides an overview of DM and argues its strengths. For those more familiar with DM, this monograph provides analyses of familiar data much of which has not been treated within the framework: argument selection, stem allomorphy and suppletion, nominal compounds in English (feet-first vs. *heads-first), and the structure of the verb phrase. This monograph also proposes a future for the theory in the form of revisions to DM including: the elimination of readjustment rules, a new economy constraint (Minimize Exponence) that triggers fusion of functional heads, and a feature blocking system.

A Remote Integrated Testbed for Cooperating Objects Jose Ramiro Martinez-de

Dios,Adrian Jimenez-Gonzalez,Alberto de San Bernabe,Anibal Ollero,2013-09-30
 Testbeds are gaining increasing relevance in research domains and also in industrial applications. However, very few books devoted to testbeds have been published. To the best of my knowledge no book on this topic has been published. This book is particularly interesting for the growing community of testbed developers. I believe the book is also very interesting for researchers in robot-WSN cooperation. This book provides detailed description of a system that can be considered the first testbed that allows full peer-to-peer interoperability between heterogeneous robots and ubiquitous systems such as Wireless Sensor Networks, camera networks and pervasive computing systems. The system architecture includes modules that allows full bidirectional communication between robots and WSN. One robot can The book describes the current state of the art in development of testbeds integrating Cooperating Object technologies. It describes in detail the testbed specification and design using requirements extracted from surveys among experts in robotics and ubiquitous systems in academia and industry. The book also describes the testbed novel architecture and its hardware and software components. Moreover, it includes details on user support tools to facilitate its use such as remote use using a virtual private network and sets of functionalities of interest for members from the robotics, WSN and robot-WSN communities. Finally, the book illustrates its capabilities and potentialities describing the implementation of some of the experiments that have been performed. Examples from the robotics, WSN and robot-WSN communities are described.
