Sustainable Tourism Development Anukrati Sharma, 2019-08-05 Exploring the importance of destination branding and destination marketing as well as their implications on sustainability in tourism, this book approaches the topic through the lens of destination image, taking into account the large influence of appearance on tourist attraction. With consideration to various stakeholders in sustainable tourism development, this book incorporates ideas for new techniques in destination branding and marketing in order to maximize economic impact. The book also discusses the rising influence of social media on tourists' interest. Emphasizing sustainability in tourism development, the chapters address a number of important issues, such as post-disaster tourism marketing, culture and heritage tourism, eco-tourism, community-based nature tourism, community involvement in destination development, benchmarking for destination performance evaluation, sustainable food practices in tourism, and more. Each chapter of this book incorporates a quantifiable trend in tourism development, including various paradigms and studies that relay different statistics about certain areas of tourism. The book makes use of case studies for specific destinations and integrates strategies, evidence, and analyses to offer a holistic understanding of the myriad factors involved in sustainable tourism development.

Disruptive Technologies in International Business Alka Maurya, J. Mark Munoz, Loveleen Gaur, Gurinder Singh, 2023-07-24 New technologies such as artificial intelligence, blockchain, the Internet of Things (IoT), etc. are redefining business processes around the world at a rapid rate and resulting in both great opportunities and challenges for businesses. Though these technologies are extensively being used in developed countries, emerging economies are also not far behind. Disruptive Technologies in International Business advances the understanding of technological applications in business within an international paradigm. With its in-depth discussions of diverse topics such as the global value chain (GVC), environmental risk management, IoT, Surface Mobility, and anime, the book argues that technologies offer

many advantages but there are accompanying risks, challenges, and disadvantages as well. The need of the hour is to address the impact of these technologies on the environment, society, and economy of the world. This book offers a collage of insights on how these technologies can potentially change the playing field in businesses and countries and contribute to the betterment of society. This book will provide business practitioners, international organizations, government officials, and policy makers with inspiration and new leads toward more efficient systems, policies, and operational frameworks in our increasingly technology-driven society.

Digital Marketing: Cases from India Rajendra Nargundkar, Romi

Sainy, 2018-12-19 Given the above challenge, we have selected a few authentic Indian cases that can be used to discuss various concepts of digital marketing. This will address the dearth of contextual cases in the field of digital marketing. The book is a collection of short cases which address specific issues on digital marketing like social media marketing, email marketing, campaign management and analysis, digital marketing strategies, blogs and others. We have tried to present real digital marketing challenges faced by organizations, and how they manage their marketing issues. Each case was developed by considered effort of the authors and editors so that a right blend of theory and practice can be presented in front of the readers. We are hopeful that this book will prove to be useful to both students and teachers working in the area of digital marketing. This book can be used as a supplement to any Digital Marketing text of a professor's choice for both classroom teaching for management programs, and teaching at executive training and regular courses. We hope to bring out new editions of the book with additional/new cases every year or two and keep it contemporary.

Advances in Computational and Bio-Engineering S. Jyothi,D. M. Mamatha,Suresh Chandra Satapathy,K. Srujan Raju,Margarita N. Favorskaya,2020-07-06 This book gathers state-of-the-art research in computational engineering and bioengineering to facilitate knowledge exchange between various scientific communities. Computational engineering (CE) is a relatively new discipline that addresses the development and application of computational models and simulations often coupled with high-performance computing to solve complex physical problems arising in engineering analysis and design in the context of natural phenomena. Bioengineering (BE) is an important aspect of computational biology, which aims to develop and use efficient algorithms, data structures, and visualization and communication tools to model biological systems. Today, engineering approaches are essential for biologists, enabling them to analyse complex physiological processes, as well as for the pharmaceutical industry to support drug discovery and development programmes.

The Unicorn Quest Archana Rai, 2023-11-10 Starting up is not just about business. In the life of a young nation like India, it is also a marker of changing mores, aspirations and perhaps even the evolving cultural fabric of a society that is finally coming into its own. This book will seek to illustrate how this wave of change, which differs from earlier ones in the history of Indian business, has come to pass. It will examine what these changes mean in an era that looks set to be dominated as much by the uncertainties of climate change and a transition away from a fossil-fuel economy as also by the rise and disquieting threat of artificial intelligence. This is a story of innovation, of ambition and yes, the grand vision of a select few that is transforming the way India learns, works and plays.
