The Transpacific Experiment Matt Sheehan,2020-08-04 A timely, vital account of California's unique relationship with China, told through the exploits of the entrepreneurs, activists, and politicians driving transformations with international implications. Tensions between the world's superpowers are mounting in Washington, D.C., and Beijing. Yet, the People's Republic of China and the state of California have built deep and interdependent socioeconomic exchanges that reverberate across the globe, making California and China a microcosm of the most important international relationship of the twenty–first century. In The Transpacific Experiment, journalist and China analyst Matt Sheehan chronicles the real people who are making these connections. Sheehan tells the story of a Southern Californian mayor who believes a Chinese

electric bus factory will save his town from meth labs and skinheads. He follows a Chinese AI researcher who leaves Google to compete with his former employer from behind the Great Firewall. Sheehan joins a tour bus of wealthy Chinese families shopping for homes in the Bay Area, revealing disgruntled neighbors and raising important questions about California's own narratives around immigration and the American Dream. Sheehan's on–the–ground reporting reveals movie sets in the "Hollywood of China," Chinese–funded housing projects in San Francisco, Chinese immigrants who support Donald Trump, and more. Each of these stories lays bare the new reality of twenty–first–century superpowers: the closer they get to one another, the more personal their frictions become. "Cuts right to the heart of the relationship between Silicon Valley and China: the tangled history, the current tensions, and the uncertain future . . . a must–read."—Kai–Fu Lee, former president of Google China and founder of Sinovation Ventures

Television and the Second Screen James Blake,2016-11-10 Television is changing almost beyond recognition. In the battle for consumers, social media sites, smart phones and tablets have become rivals to

traditional linear TV. However, audiences and producers are also embracing mobile platforms to enhance TV viewing itself. This book examines the emerging phenomenon of the second screen: where users are increasingly engaging with content on two screens concurrently. The practice is transforming television into an interactive, participatory and social experience. James Blake examines interactive television from three crucial angles: audience motivation and agency, advances in TV production and the monetisation of second screen content. He also tracks its evolution by bringing together interviews with more than 25 television industry professionals - across the major UK channels - including commissioning editors, digital directors, producers and advertising executives. These reveal the successes and failures of recent experiments and the innovations in second screen projects. As the second screen becomes second nature for viewers and producers, the risks and opportunities for the future of television are slowly beginning to emerge. Television and the Second Screen will offer students and scholars of television theory, industry professionals and anyone with an abiding interest in television and technology, an accessible and illuminating guide to this important cultural shift.
