Recent Developments in Mechatronics and Intelligent Robotics Kevin Deng,Zhengtao Yu,Srikanta Patnaik,John

Wang,2018-10-04 This book is a collection of proceedings of the International Conference on Mechatronics and Intelligent Robotics (ICMIR2018), held in Kunming, China during May 19-20, 2018. It consists of 155 papers, which have been categorized into 6 different sections: Intelligent Systems, Robotics, Intelligent Sensors & Actuators, Mechatronics, Computational Vision and Machine Learning, and Soft Computing. The volume covers the latest ideas and innovations both from the industrial and academic worlds, as well as shares the best practices in the fields of mechanical engineering, mechatronics, automatic control, IOT and its applications in industry, electrical engineering, finite element analysis and computational engineering. The volume covers key research outputs, which delivers a wealth of new ideas and food for thought to the readers.

Recent Developments in Mechatronics and Intelligent Robotics Feng Qiao,Srikanta Patnaik,John Wang,2017-11-11 This book gathers the Proceedings of the International Conference on Mechatronics and Intelligent Robotics (ICMIR2017), held in Kunming, China, on May 20-21, 2017. The book covers a total of 172 papers, which have been divided into seven different sections: Intelligent Systems, Intelligent Sensors & Actuators, Robotics, Mechatronics, Modeling & Simulation, Automation & Control, and Robot Vision. ICMIR2017 provided a vital forum for discussing the latest and most innovative ideas from both the industrial and academic worlds, and for sharing best practices in the fields of mechanical engineering, mechatronics, automatic control, electrical engineering, finite element analysis and computational engineering. The main focus of the conference was on promoting interaction between academia and industry, allowing the free exchange of ideas and challenges faced by these two key stakeholders and encouraging future collaboration between the

members of these groups. The proceedings cover new findings in the following areas of research and will offer readers valuable insights: Mechatronics Intelligent mechatronics, robotics and biomimetics; Novel and unconventional mechatronic systems; Modeling and control of mechatronics systems; Elements, structures and mechanisms of micro and nano systems; Sensors, wireless sensor networks and multi-sensor data fusion; Biomedical and rehabilitation engineering, prosthetics and artificial organs; Artificial Intelligence (AI), neural networks and fuzzy logic in mechatronics and robotics; Industrial automation, process control and networked control systems; Telerobotics, Human-Computer Interaction; and Human-Robot Interaction. Robotics Artificial Intelligence; Bio-inspired robotics; Control algorithms and control systems; Design theories and principles; Evolutional robotics; Field robotics; Force sensors, accelerometers, and other measuring devices; Healthcare robotics; Human-Robot Interaction; Kinematics and dynamics analysis; Manufacturing robotics; Mathematical and computational methodologies in robotics; Medical robotics; Parallel robots and manipulators; Robotic cognition and emotion; Robotic perception and decisions; Sensor integration, fusion, and perception; and Social robotics.

Contemporary China's Land Use Policy Long Cheng, 2020-09-24

This book discusses contemporary China's land use policy – the Link Policy – which calls for land consolidation and rural resettlement to achieve the goal of preserving farmland while also providing more space for urban development. Given the limited analyses and commentaries on the Link Policy in the literature, particularly in English-language articles, the book systematically presents and analyzes China's land use policy by assessing the impacts of the Link Policy on rural life and how effective the Link Policy is in achieving its objectives. It also examines how satisfied farmers are with the policy and what the contributing factors are. Drawing on a critical review of the literature, field observations and interviews with resettled farmers, the book offers insights into

China's land use policy, and compares it with similar policy instruments in other countries. Presenting research findings that help readers gain a holistic understanding of the Link Policy in China and its implications, the book is a valuable resource for professionals in other developing countries that are facing similar challenges in terms of balancing urban development and farmland conservation.

The Four Swords Paul Tozour, 2023-07-25 Four friends meet a mysterious stranger with a robotic voice ... an encounter that will change their lives forever. Jake and Leo have spent the last two years working on a sequel to a successful shooter / role-playing game at Scrub-Liminal Studios in Austin, Texas, working under industry legend Mickey Whitmore. Meanwhile, their friends Tim and Allison worked on a hugely anticipated new sci-fi space exploration game at Green Gryphon Games on the outskirts of town, under the eccentric leadership of Bentley Bartle. As the stranger asks them to recount their tale, they tell the story of their epic quest to achieve game development greatness -- a story of teamwork, ambition, struggle, tragedy, office politics, clashing expectations and personalities, extraordinary personal suffering, and a helper who guides them to a profound new understanding of how values drive culture, and how culture drives outcomes. This book gives a unique and entertaining perspective on game development, an in the trenches view of how teams succeed or fail from the point of view of the hard-working developers doing everything they can to help their teams succeed. It shows the critical role of leadership and values, the seemingly trivial mistakes that can snowball into serious problems, and insights into what it takes to change things for the better. Book Review 1: Tozour's parable of game development dissects the industry with candor and wit. -- Michel Sabbagh Book Review 2: Congratulations on making something I didn't think was possible. I'll be recommending this to lots of people. -- John Harries Book Review 3: Genuinely enjoying the tone and pacing of your novel ... I think

it's going to sell really well. You always, always, end your chapters perfectly. -- Jared Rasic Book Review 4: I think you've created a great 'mirror' for studios and individuals to hold up to themselves. I see people reading it, or being asked to read it, and simply reflecting on themselves, their team, their company and how that impacts what happens in their workplace. The afterword is super helpful, and I love that it is so personal. It demonstrates your values and critically the behaviours that underpin a strong culture (a great starting point for a studio). Awesome job Paul, I really enjoyed it. -- Chris Johnson

Electronics, Communications and Networks IV Amir Hussain, Mirjana Ivanovic, 2015-07-01 The 4th International Conference on Electronic, Communications and Networks (CECNet2014) inherits the fruitfulness of the past three conferences and lays a foundation for the forthcoming next year in Shanghai. CECNet2014 was hosted by Hubei University of Science and Technology, China, with the main objective of providing a comprehensive global forum

Reinventing the Automobile William J. Mitchell, Chris E. Borroni-Bird, Lawrence D. Burns, 2010-01-29 How to leave behind our unwieldy, gas-guzzling, carbon dioxide-emitting vehicles for cars that are green, smart, connected, and fun. This book provides a long-overdue vision for a new automobile era. The cars we drive today follow the same underlying design principles as the Model Ts of a hundred years ago and the tail-finned sedans of fifty years ago. In the twenty-first century, cars are still made for twentieth-century purposes. They are inefficient for providing personal mobility within cities—where most of the world's people now live. In this pathbreaking book, William Mitchell and two industry experts reimagine the automobile, describing vehicles of the near future that are green, smart, connected, and fun to drive. They roll out four big ideas that will make this both feasible and timely. The fundamental reinvention of the automobile won't be easy, but it is an urgent necessity—to make urban mobility more convenient and

sustainable, to make cities more livable, and to help bring the automobile industry out of crisis.

Civil Society in the Middle East Nadine Sika, 2024-04-30 Civil Society in the Middle East analyzes the impact of repression on civil society activism in the Middle East through analyzing the cases of Egypt and Jordan. Sika argues that authoritarian regimes' repressive strategies toward civil society actors vary depending on recent historical experience with regime breakdown and/or continuity. Authoritarian regimes that go through breakdown and that transition from one autocratic rule to another increase repression against all civil society actors in an effort to pre-empt large-scale mobilization. This instils fear into civil society actors, who as a result either disengage from civic and political activism or turn to different forms of participation, such as social entrepreneurship. On the other hand, long-standing authoritarian regimes that have not faced breakdown utilize targeted repression and co-optation strategies while tolerating civic and political activism, as well as some forms of contentious activities. Civil society actors in these regimes are able to grasp political opportunities to mobilize for demonstrations at certain times and in certain spaces, and to develop coalition partnerships to push the regime to advance some reforms and change.

The Avoidable War Kevin Rudd, 2022-03-22 A war between China and the US would be catastrophic, deadly, and destructive. Unfortunately, it is no longer unthinkable. The relationship between the US and China, the world's two superpowers, is peculiarly volatile. It rests on a seismic fault—of cultural misunderstanding, historical grievance, and ideological incompatibility. No other nations are so quick to offend and be offended. Their militaries play a dangerous game of chicken, corporations steal intellectual property, intelligence satellites peer, and AI technicians plot. The capacity for either country to cross a fatal line grows daily. Kevin Rudd, a former Australian prime minister who has studied, lived in, and worked with China for more than forty years, is one of the very few people who can offer real insight into the mindsets of the leadership whose judgment will determine if a war will be fought. *The Avoidable War* demystifies the actions of both sides, explaining and translating them for the benefit of the other. Geopolitical disaster is still avoidable, but only if these two giants can find a way to coexist without betraying

their core interests through what Rudd calls “managed strategic competition.” Should they fail, down that path lies the possibility of a war that could rewrite the future of both countries, and the world.

Sovereignty And The Status Quo Kevin P. Lane, 2019-07-11 Kevin Lane discusses the tension existed between China's traditional claim to sovereignty over Hong Kong. He believes that on historical track record China has the capacity for flexibility on Hong Kong that would enable arrangements about its future to work successfully.

Rise and Decline and Rise of China Ross Anthony, Kevin Bloom, Daouda Cissé, Martyn Davies, Maxime Lauzon-Lacroix, Garth le Pere, Thaddeus Metz, Richard Poplak, Gauhar Raza, Yongjun Zhao, Mapungubwe Institute for Strategic Reflection (MISTRA), 2015-09-14 Running like a red thread through this book are the manifestations of Sino-African relations dating back many centuries. In this way, *The Rise and Decline and Rise of China: Searching for an Organising Philosophy* takes forward the work MISTRA conducted on the Mapungubwe society, one of the advanced states that existed in southern Africa some 800 years ago. What makes this research report unique, though, is that the treatment of these issues has been undertaken primarily from an African perspective.

The Party Family Kimberley Ens Manning, 2023-08-15 The *Party Family* explores the formation and consolidation of the state in revolutionary China through the crucial role that social ties—specifically family ties—played in the state's capacity to respond to crisis before and after the foundation of the People's

Republic of China. Central to these ties, Kimberley Ens Manning finds, were women as both the subjects and leaders of reform. Drawing on interviews with 163 participants in the provinces of Henan and Jiangsu, as well as government documents and elite memoirs, biographies, speeches, and reports, Manning offers a new theoretical lens—attachment politics—to underscore how family and ideology intertwined to create an important building block of state capacity and governance. As The Party Family details, infant mortality in China dropped by more than half within a decade of the PRC's foundation, a policy achievement produced to a large extent through the personal and family ties of the maternalist policy coalition that led the reform movement. However, these achievements were undermined or reversed in the complex policy struggles over the family during Mao's Great Leap Forward (1958–60).
