Neuropsychanalysis of the Inner Mind Teodosio Giacolini,Cristiana Pirrongelli,2021-11-29 This comprehensive and well-curated collection explores how neuroscience can be integrated into psychoanalytic thinking and practice, reexamining the biological science within psychological (sexuality, pleasure, and dreams), social (pornography), and psychopathological (learning and attention disorders, anhedonia) phenomena relevant to therapists and analysts. Neuropsychanalysis of the Inner Mind stands out for its focus on the emotional-motivational aspects of the mind, which are considered through the lenses of affective neuroscience, psychoanalytic theory and neuropsychanalysis, and is important reading for scholars and psychologists interested in the topics originally addressed by Freud in his 1895 publication *Project for a Scientific Psychology*.

Children in Custody Mary McAuley,2009-11-03 This book is available as open access through the Bloomsbury Open Access programme and is available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com). Despite their very different histories, societies, political and legal systems, Russia and the UK stand out as favouring a punitive approach to young law breakers, imprisoning many more children than any other European countries. The book is based on the author's primary research in Russia in which she visited a dozen closed institutions from St Petersburg to Krasnoyarsk and on similar research in England and Northern Ireland. The result is a unique study of how attitudes to youth crime and criminal justice, the political environment and the relationship between state and society have interacted to influence the treatment of young offenders. McAuley's account of the twists and turns in policy towards youth illuminate the extraordinary history of Russia in the twentieth century and the making of social policy in Russia today. It is also the first study to compare the UK (excluding Scotland because of its separate juvenile justice system) with Russia, a comparison which highlights the factors responsible for the making of 'punitive' policy in the two societies. McAuley places the Russian and UK policies in a European context, aiming to reveal how other European countries manage to put so many fewer children behind bars.

*Precision Interferometry in a New Shape* Paul Fulda,2013-09-13 With his Ph.D. thesis, presented here in the format of a Springer Theses, Paul Fulda won the 2012 GWIC thesis prize awarded by the Gravitational Wave International Committee. The impact of thermal noise on future gravitational wave detectors depends on the size and shape of the interrogating laser beam. It had been known since 2006 that, in theory, higher-order Laguerre-Gauss modes could reduce thermal noise. Paul Fulda's research brings Laguerre-Gauss modes an enormous step forward. His work

includes analytical, numerical and experimental work on table-top setups as well as experiments at the Glasgow 10m prototype interferometer. Using numerical simulations the LG33 mode was selected as the optical mode to be tested. Further research by Paul and his colleagues since then concentrated on this mode. Paul has developed and demonstrated simple and effective methods to create this mode with diffractive optics and successfully demonstrated its compatibility with the essential building blocks of gravitational wave detectors, namely, optical cavities, Michelson interferometers and opto-electronic sensing and control systems. Through this work, Laguerre-Gauss modes for interferometers have been transformed from an essentially unknown entity to a well understood option with an experimental basis.

Can Detective JOE DYLAN find THE KILLER before he becomes one of the hunted? THE WHITE FLAMINGO is a break-neck neo-noir crime thriller from beak to tail feather.
