Anthrax in Humans and Animals World Health Organization, 2008 This fourth edition of the anthrax guidelines encompasses a systematic review of the extensive new scientific literature and relevant publications up to end 2007 including all the new information that emerged in the 3-4 years after the anthrax letter events. This updated edition provides information on the disease and its importance, its etiology and ecology, and offers guidance on the detection, diagnostic, epidemiology, disinfection and decontamination, treatment and prophylaxis procedures, as well as control and surveillance processes for anthrax in humans and animals. With two rounds of a rigorous peer-review process, it is a relevant source of information for the management of anthrax in humans and animals.

Green Hills of Africa Ernest Hemingway, 2023-12-21 *Green Hills of Africa* is a work of nonfiction by American writer Ernest Hemingway. Hemingway's second work of nonfiction, *Green Hills of Africa* is an account of a month on safari he and his wife, Pauline Marie Pfeiffer, took in East Africa during December 1933. Much of the narrative describes Hemingway's adventures hunting in East Africa, interspersed with ruminations about literature and authors. Generally the East African landscape Hemingway describes is in the region of Lake Manyara in Tanzania.

The Art of Being Human Michael Wesch, 2018-08-07 Anthropology is the study of all humans in all times in all places. But it is so much more than that. Anthropology requires strength, valor, and courage, Nancy Scheper-Hughes noted. Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to

commit yourself, body and mind. Susan Sontag called anthropology a heroic profession. What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the first draft edition from 2017 and includes 7 new chapters.

Flying Eagle Sudipta Bardhan-Quallen, 2009-02-01

Tired hunter, must succeed. Baby hungry mouth to feed.
Flying eagle, soaring high. Blazing sunset, crimson sky.
The sun is setting, and the weary tawny eagle continues to
soar and search over the vast Serengeti Plain. He has been
hunting all day, and he will not stop until he finds food for
his young chick. As the sky darkens and nighttime
approaches, predators and prey emerge on the land below.
Hippos lounge, cobras slither, lions prowl, zebras gallop,
rhinos graze, dik-diks scurry?and still the eagle searches.
Poetic text and stunning illustrations depict a father tawny
eagle on his evening flight. Back matter provides additional
information about the tawny eagle and the Serengeti Plain.
FLYING EAGLE is an intriguing introduction to the African
landscape of the Serengeti, which is rich in wildlife but in
danger of being damaged by poachers.

Ungulate Taxonomy Colin Groves, Peter
Grubb, 2011-11-15 A group of special interest to
mammalogists, taxonomists, and systemists, ungulates
have proven difficult to classify. This comprehensive review
of the taxonomic relationships of artiodactyls and
perissodactyls brings forth new evidence in order to
propose a theory of ungulate taxonomy. With this
straightforward volume, Colin Groves and the late Peter
Grubb cut through previous assumptions to define
ungulate genera, species, and subspecies. The species-by-
species accounts incorporate new molecular, cytogenetic,
and morphological data, as well as the authors' own
observations and measurements. The authors include
references and supporting arguments for new
classifications. A starting point for further research, this
book is sure to be discussed and hotly debated in the
mammalogical community. A well-reasoned synthesis,
Ungulate Taxonomy will be a defining volume for years to
come.

The Gift Marcel Mauss, 2002-09-10 First published in 1990. Routledge is an imprint of Taylor & Francis, an informa company.

The Jack Bank Glen Retief, 2011-04-12 An extraordinary, literary memoir from a gay white South African, coming of age at the end of apartheid in the late 1970s. Glen Retief's childhood was at once recognizably ordinary--and brutally unusual. Raised in the middle of a game preserve where his father worked, Retief's warm nuclear family was a preserve of its own, against chaotic forces just outside its borders: a childhood friend whose uncle led a death squad, while his cultured grandfather quoted Shakespeare at barbecues and abused Glen's sister in an antique-filled, tobacco-scented living room. But it was when Retief was sent to boarding school, that he was truly exposed to human cruelty and frailty. When the prefects were caught torturing younger boys, they invented the jack bank, where underclassmen could save beatings, earn interest on their deposits, and draw on them later to atone for their supposed infractions. Retief writes movingly of the complicated emotions and politics in this punitive all-male world, and of how he navigated them, even as he began to realize that his sexuality was different than his peers'.

Generation Revolution Rachel Aspden, 2017-02-07 A New York Times Notable Book of the Year "An excellent social history of Egypt's persistent pathologies, as well as a universal story about the difficulties of changing deeply ingrained societal attitudes." —New York Times Book Review *Generation Revolution* unravels the complex forces shaping the lives of four young Egyptians on the eve and in the aftermath of the Arab Spring, and what their stories mean for the future of the Middle East. In 2003, Rachel Aspden arrived in Egypt as a twenty-three-year-old journalist. She found a country on the brink of change. The

two-thirds of Egypt's eighty million citizens under the age of thirty were stifled, broken, and frustrated, caught between a dictatorship that had nothing to offer them and their autocratic parents' generation, defined by tradition and obedience. In January 2011, the young people's patience ran out. They thought the revolution that followed would change everything. But as violence escalated, the economy collapsed, and as the united front against Mubarak shattered into sectarianism, many found themselves at a loss. Following the stories of four young Egyptians—Amr the atheist software engineer, Amal the village girl who defied her family and her entire community, Ayman the one-time religious extremist, and Ruqayah the would-be teenage martyr—Generation Revolution exposes the failures of the Arab Spring and shines new light on those left in the wake of its lost promise.

The Lion Tracker's Guide To Life Boyd

Varty, 2019-10-22 Somewhere deep inside, you know what your gift, purpose, and mission are. Boyd Varty, a lion tracker and life coach, reveals how the wisdom from the ancient art of tracking can teach you how to recognize these essential ingredients in a meaningful life. Know how to navigate, don't worry about the destination, and stay alert. These are just a few of the strategies that contribute to both successful lion tracking and a life of fulfillment. When we join Boyd Varty and his two friends tracking lions, we are immersed in the South African bush, and, although we learn some of the skills required for actual tracking, the takeaways are the strategies that can be applied to our everyday lives. Trackers learn how to use all of their senses to read the environment and enter into a state of "greater aliveness." When we learn to find and follow our inner tracks, we learn to see what is deeply

important to us. In the same way the trip in the classic Zen and the Art of Motorcycle Maintenance was a vehicle to examine how to live out our values, the story of this one-day adventure—with danger and suspense along the way—uses the ancient art of tracking to convey profound lessons on how to live a purposeful, meaningful life of greater harmony.

A Girl Named Disaster Nancy Farmer,2010-02-01

Orchard Classics is a collectible hardcover line of Newbery award-winning titles from the Orchard backlist that have fresh, beautiful new designs and include author prefaces and discussion guides. A GIRL NAMED DISASTER is the humorous and heartwrenching story of young girl who discovers her own courage and strength when she makes the dangerous journey from Mozambique to Zimbabwe. Nhamo is a Shona girl living in a traditional village in Mozambique in 1981. When her family tries to force her into a marriage with a cruel man, she flees. What was supposed to have been a short boat trip across the border into Zimbabwe, where she hoped to find her father, turns into an adventure filled with challenges and danger that lasts a year.

The Safari Companion Richard D. Estes,1999-12-01

The best field guide to observing and understanding the behavior of African mammals and an indispensable tool for naturalists traveling to Africa! The Second Edition has been fully revised and includes a new preface. The Safari Companion enables readers to recognize and interpret visible behavioral activities, such as courtship rituals, territorial marking, aggression, and care of young. Each account of over 80 species includes a behavioral table in which the unique actions of the hoofed mammals, carnivores, and primates are described for easy reference.

Other features include: Expert Illustrations Useful maps showing major national boundaries, vegetation zones, and game parks An extensive glossary Tips on wildlife photography A list of organizations working to protect African wildlife The best behavioral field guide ever.—Sy Montgomery, author of *Tamed and Untamed* The book is more than a field guide; it is a valuable tool for conservation.—Kathryn S. Fuller, President, World Wildlife Fund (U.S.A.)

Born to Run Christopher McDougall, 2010-12-09 A New York Times bestseller 'A sensation ... a rollicking tale well told' - The Times At the heart of *Born to Run* lies a mysterious tribe of Mexican Indians, the Tarahumara, who live quietly in canyons and are reputed to be the best distance runners in the world; in 1993, one of them, aged 57, came first in a prestigious 100-mile race wearing a toga and sandals. A small group of the world's top ultra-runners (and the awe-inspiring author) make the treacherous journey into the canyons to try to learn the tribe's secrets and then take them on over a course 50 miles long. With incredible energy and smart observation, McDougall tells this story while asking what the secrets are to being an incredible runner. Travelling to labs at Harvard, Nike, and elsewhere, he comes across an incredible cast of characters, including the woman who recently broke the world record for 100 miles and for her encore ran a 2:50 marathon in a bikini, pausing to down a beer at the 20 mile mark.

Culture and Customs of Kenya Neal W. Sobania, 2003-06-30 Kenya, a land of safaris, wild animals, and Maasai warriors, perfectly represents Africa for many Westerners. This peerless single-source book presents the contemporary reality of life in Kenya, an important East-African nation that has served as a crossroads for peoples

and cultures from Africa, the Middle East, and East Asia for centuries. As such, it is a land rich in cultural and ethnic diversity, where unique and dynamic traditions blend with modern influences. Students and general readers will be engrossed in narrative overviews highlighting Kenyan history, as well as the beliefs, vibrant cultural expressions, and various lifestyles and roles of the Kenyan population. A chronology, glossary, and numerous photos enhance the narrative. Kenya today struggles with nation building. Its society comprises the haves and the have-nots and faces the challenges of the trend toward urbanization, with its attendant disruption of traditional social structures. For Kenyans, the preserving of traditional cultures is as important as making the statement that Kenya is a modern nation. Chapters on the land, people, and history; religion and worldview; literature, film, and media; art and architecture; cuisine and traditional dress; gender roles, marriage, and family; and social customs and lifestyle are up to date and written by a country expert. A chronology, glossary, and numerous photos enhance the narrative.

The Chinese Alligator John Thorbjarnarson, Xiaoming Wang, 2010-05-17 Illustrated throughout and featuring the most up-to-date biological information available, this volume is a complete overview of the Chinese alligator, a conservation and cultural icon.

Molecular Evolution Roderick D.M. Page, Edward C. Holmes, 2009-07-14 The study of evolution at the molecular level has given the subject of evolutionary biology a new significance. Phylogenetic 'trees' of gene sequences are a powerful tool for recovering evolutionary relationships among species, and can be used to answer a broad range of evolutionary and ecological questions. They are also beginning to permeate the medical sciences. In this book,

the authors approach the study of molecular evolution with the phylogenetic tree as a central metaphor. This will equip students and professionals with the ability to see both the evolutionary relevance of molecular data, and the significance evolutionary theory has for molecular studies. The book is accessible yet sufficiently detailed and explicit so that the student can learn the mechanics of the procedures discussed. The book is intended for senior undergraduate and graduate students taking courses in molecular evolution/phylogenetic reconstruction. It will also be a useful supplement for students taking wider courses in evolution, as well as a valuable resource for professionals. First student textbook of phylogenetic reconstruction which uses the tree as a central metaphor of evolution. Chapter summaries and annotated suggestions for further reading. Worked examples facilitate understanding of some of the more complex issues. Emphasis on clarity and accessibility.

Wild Cats Kristin Nowell, Peter Jackson, IUCN/SSC Cat Specialist Group, 1996 Presents the most comprehensive and up-to-date information available on the 36 wild cats of the world. It includes the first published collection of detailed range maps and some of the first photographs of rare species in the wild. It provides a thorough review of major issues in cat conservation such as habitat loss and management of big cats in livestock areas; field and laboratory research; international trade; the role of zoos; and reintroduction. High priority are identified to further the cause of cat conservation.

The Rome Zoo Pascal Janovjak, 2021-08-03 Rome, too, wants the sound of roaring as evening falls ... The Rome Zoo: a place born of fantasy and driven by a nation's aspirations. It has witnessed – and reflected in its tarnished mirror – the great follies of the twentieth century. Now, in

an ongoing battle that has seen it survive world wars and epidemics, the zoo must once again reinvent itself, and assert its relevance in the Eternal City. Caught up in these machinations is a cast of characters worthy of this baroque backdrop: a man desperate to find meaning in his own life, a woman tasked with halting the zoo's decline and a rare animal, the last of its species, who bewitches the world. Drifting between past and present, *The Rome Zoo* weaves together these and many other stories, forming a colourful and evocative tapestry of life at this strange place. It is both a love story and a poignant juxtaposition of the human need to classify, to subdue, with the untameable nature of our dramas and anxieties. Spellbinding and disturbing, precise and dreamy, this award-winning novel, translated by Stephanie Smee, is unlike any other. Winner of the Swiss Literature Award, the Prix Michel-Dentan and the Prix du public de la RTS "Like all truly great literary allegories, *The Rome Zoo* is both innocent and wise, filled equally with tenderness and darkness. A gorgeous, dream-like fable of Italy's past and present." —Ceridwen Dovey

The Leopard in India J. C. Daniel, 2009 Elegant in its beautiful coat and lithe body, the leopard is a majestic predator. Its small size permits it to occupy habitat denied to its larger cousins and its strength, intelligence and ability give it a wide spectrum of prey species ranging in size from a young buffalo to a small rodent. Unfortunately, like its cousins, ruthless poaching and sadly diminishing habitat threaten its survival. This book is the first to collate all available and detailed information on the leopard -- its distribution, colour, behaviour and co-existence with other animals. The book also includes the leopard's encounters with humans and the documented stories of man-eating leopards. The author, an authority on the subject has sieved this body of work from the early issues of the

Journal of the Bombay Natural History Society. The author has consciously let the stories speak for themselves, with additional comments, where necessary, to give the reader the flavour of a bygone era. This book is useful for students and researchers, policy makers and naturalists and all those who want to learn about the majestic animal to help save it from extinction.
