**Runes Across the North Sea from the Migration Period and Beyond** Livia Kaiser, 2021-09-20 Die Germanische Altertumskunde Online wird – wie bereits das in ihr aufgegangene Reallexikon – durch Ergänzungsbände begleitet. Diese Reihe umfasst Monographien ebenso wie Sammelbände zu spezifischen Themen aus Archäologie, Geschichte und Literaturwissenschaft. Damit wird der Inhalt der Datenbank um jene Aspekte erweitert, die einer ausführlichen Analyse bedürfen. Inzwischen sind bereits mehr als 100 Bände erschienen von Germanenproblemen in heutiger Sicht bis zur Germanischen Altertumskunde im Wandel.

**Engineering of Sport 6** Eckehard Moritz, Steve Haake, 2010-05-10 This proceedings volume of the ISEA 2006 examines sports engineering, an interdisciplinary subject which encompasses and integrates not only sports science and engineering but also biomechanics, physiology and anatomy, and motion physics. This is the first title of its kind in the emerging field of sports technology.

**Kinetics Of Gas Reaction VIB** Willhelm Jost, 2012-12-02 Physical Chemistry: An Advanced Treatise: Kinetics of Gas Reactions, Volume VIB, is devoted to gas phase chemical reactions. The purpose of this treatise is to present a comprehensive treatment of physical chemistry for advanced students and investigators in a reasonably small number of volumes. An attempt has been made to include all important topics in physical chemistry together with borderline subjects which are of particular interest and importance. The book contains six chapters and begins with a study on the elastic and inelastic scattering of ions on molecules, including such topics as rainbow scattering, reactive scattering, and experimental procedures and results of high-resolution measurements. This is followed by separate chapters on collision processes and the theory of elastic scattering; and atom reactions, with a discussion of experimental techniques (static, flow, and pulse methods), among the selected examples being the reactions of H, O, C, and N atoms with alkanes, alkenes, acetylene, sulfur, and nitrogen compounds. Subsequent chapters deal with experimental methods and results obtained by several techniques of relaxation methods in gases; thermal unimolecular reactions; and the interactions between chemical reactions, transport processes, and flow phenomena.

Coherence in Atomic Collision Physics H.J. Beyer, Karl Blum, R. Hippler, 2013-11-21 During the last two

decades the experimental investigation of atomic coherence phenomena has made rapid progress. Detailed studies have been performed of angular correlations, spin polarization effects, angular momentum transfer, and the alignment parameters which characterize the charge cloud of excited atoms. The enormous growth in the number of these investigations was made possible through substantial development and application of new experimental technology, the development of sophisticated theoretical models and numerical methods, and a fine interplay between theory and experiment. This interplay has resulted in a deeper understanding of the physical mechanisms of atomic collision processes. It is the purpose of the chapters in this book to provide introductions for nonspecialists to the various fields of this area as well as to present new experimental and theoretical results and ideas. The interest in spin-dependent interactions in electron-atom scattering has a long history; it dates back to the early investigations of Mott in 1929. While the more traditional measurements in this field were concerned with the determination of spin polarization and asymmetries, the range of investigations has been expanded enormously during the last few years and now includes many observables sensitive to one or more of the various spin dependent interactions. The understanding of these effects requires a theoretical description of the orientation and alignment parameters of the target atoms, of the formation of resonances, of the influence of electron-exchange processes, and of the relativistic interactions inside the atom and between projectile and target.

Oral and maxillofacial surgery Harald Eufinger, Alexander Kübler, Henning Schliephake, 2023-05-26 In dem Band sind alle Eingriffe der Mund-, Kiefer- und Gesichtschirurgie detailliert beschrieben und in über 1000 Zeichnungen illustriert. Darüber hinaus geben Experten der MKG-Chirurgie Tipps für die

Anwendung im OP-Saal. Dargestellt werden Implantologie, septische Chirurgie, Traumatologie des Kiefer- und Gesichtsbereichs sowie die Behandlung der Lippen-Kiefer-Gaumenspalten und die Chirurgie des Gesichtsschädels, die Tumorchirurgie inklusive der plastisch rekonstruktiven Chirurgie und der modernen Verfahren des mikrovaskulären Gewebetransfers.

**Postcolonising the Medieval Image** Eva Frojmovic, Catherine E. Karkov, 2017-03-16 Postcolonial theories have transformed literary, historical and cultural studies over the past three decades. Yet the study of medieval art and visualities has, in general, remained Eurocentric in its canon and conservative in its approaches. 'Postcolonising', as the eleven essays in this volume show, entails active intervention into the field of medieval art history and visual studies through a theoretical reframing of research. This approach poses and elicits new research questions, and tests how concepts current in postcolonial studies - such as diaspora and migration, under-represented artistic cultures, accented art making, displacement, intercultural versus transcultural, hybridity, presence/absence - can help medievalists to reinvigorate the study of art and visibility. Postcolonial concepts are deployed in order to redraft the canon of medieval art, thereby seeking to build bridges between medievalist and modernist communities of scholars. Among the varied topics explored in the volume are the appropriation of Roman iconography by early medieval Scandinavian metalworkers, multilingualism and materiality in Anglo-Saxon culture, the circulation and display of Islamic secular ceramics on Pisan churches, cultural negotiation by Jewish minorities in Central Europe and the Iberian peninsula, Holy Land maps and medieval imaginative geography, and the uses of

Thomas Becket in the colonial imaginary of the Plantagenet court.

**The Implied Author** Tom Kindt,Hans-Harald Müller,2008-08-22 This book addresses itself to the concept of the implied author, which has been the cause of controversy in cultural studies for some fifty years. The opening chapters examine the introduction of the concept in Wayne C. Booth's "Rhetoric of Fiction" and the discussion of the concept in narratology and in the theory and practice of interpretation. The final chapter develops proposals for clarifying or replacing the concept.

*Passages* Elizabeth Kovach,Jens Kugele,Ansgar Nünning,2022-11-07 The study of literature and culture is marked by various distinct understandings of passages – both as phenomena and critical concepts. These include the anthropological notion of rites of passage, the shopping arcades (Passagen) theorized by Walter Benjamin, the Middle Passage of the Atlantic slave trade, present-day forms of migration and resettlement, and understandings of translation and adaptation. Whether structural, semiotic, spatial/geographic, temporal, existential, societal or institutional, passages refer to processes of (status) change. They enable entrances and exits, arrivals and departures, while they also foster moments of liminality and suspension. They connect and thereby engender difference. *Passages* is an exploration of passages as contexts and processes within which liminal experiences and encounters are situated. It aims to foster a concept-based, interdisciplinary dialogue on how to approach and theorize such a term. Based on the premise that concepts travel through times, contexts and discursive settings, a conceptual approach to passages provides the authors of this volume with the analytical tools to (re-)focus their research questions and create a meaningful exchange

across disciplinary, national and linguistic boundaries. Contributions from senior scholars and early-career researchers whose work focuses on areas such as cultural memory, performativity, space, media, (cultural) translation, ecocriticism, gender and race utilize specific understandings of passages and liminality, reflecting on their value and limits for their research.

**Forest Decline in the Atlantic and Pacific Region** Reinhard F. Huettl, Dieter Mueller-Dombois, 2012-12-06 Forest damage, forest decline, forest dieback - not related to biotic agents - is occurring in the Atlantic and Pacific regions. In Europe and Eastern North America this serious problem is considered to be, at least to some part, related to industrial air pollutants and their atmospheric conversion products, such as acid rain or ozone. Forest declines in the Pacific region have been attributed largely to natural causes involving forest dynamics, since air pollution and other negative anthropogenic influences are practically absent. Presented here are typical decline phenomena in the Pacific and Atlantic region, potential causes, effects and mitigation strategies, and the question whether there are any similarities on a functional or structural basis is addressed.

**Anglo-Saxon Button Brooches** Seiichi Suzuki, 2008 The Anglo-Saxon button brooch is a small disc brooch, about 2cm in diameter and decorated with a single human face mask, found mainly in southern England and occasionally in France; although many examples survive, its origins and development are not

fully understood. This book offers a comprehensive study of its typology, genealogy and chronology. It investigates formal and structural design features, proposes a prototype- and statistics-based typology, and examines the physical, conceptual and geographical dimensions of the classification. Through an in-depth description of class-internal distinctions and class-external similarities, the author also explores the development of button brooches and reconstructs their genealogy or derivational history. He then situates the evolutionary trajectory of button brooches in a temporal framework, by linking them to other brooch types such as Jutlandic relief brooches and Saxon cast saucer brooches, and by taking account of associated grave goods as appropriate. A catalogue of the entire corpus of 209 button brooches and that of related objects is provided in the appendices; there are also over 200 plates and other illustrations, enabling the details to be carefully studied. SEIICHI SUZUKI is Professor of Old Germanic Studies, Kansai Gaidai University, Japan.

**Metaphors Dead and Alive, Sleeping and Waking** Cornelia Müller, 2009-10-15 Traditional thinking on metaphors has divided them into two camps: dead and alive. Conventional expressions from everyday language are classified as dead, while much rarer novel or poetic metaphors are alive. In the 1980s, new theories on the cognitive processes involved with the use of metaphor challenged these assumptions, but with little empirical support. Drawing on the latest research in linguistics, semiotics, philosophy, and psychology, Cornelia Müller here unveils a new approach that refutes the rigid dead/alive dichotomy, offering in its place a more dynamic model: sleeping and waking. To build this model, Müller presents an

overview of notions of metaphor from the classical period to the present; studies in detail how metaphors function in speech, text, gesture, and images; and examines the way mixed metaphors sometimes make sense and sometimes do not. This analysis leads her to conclude that metaphors may oscillate between various degrees of sleeping and waking as their status changes depending on context and intention. Bridging the gap between conceptual metaphor theory and more traditional linguistic theories, this book is a major advance for the field and will be vital to novices and initiates alike.
