US Foreign Policy in a Challenging World Marco Clementi, Matteo Dian, Barbara Pisciotto, 2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems. The book comprises four parts, the first of which addresses global issues such as nonproliferation, trade, and freedom of the seas. US policies in these areas are carefully analyzed, considering whether and how they have been differently implemented at the regional level. The remaining parts of the book focus on the US posture toward specific regions: Europe, the Middle East, and East Asia. The policies adopted by the US to confront the most relevant challenges in each region are identified, and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored. The book is a rich source of knowledge on the nature of the balance that the US has pursued between global and regional interests. It will be of much interest to scholars, to practitioners, to postgraduate/PhD students of international relations theory and American foreign policy, and to all with an interest in the ability of the US to produce international order.

Applications in Electronics Pervading Industry, Environment and Society Sergio Saponara, Alessandro De Gloria, 2021-01-25 This book provides a thorough overview of cutting-edge research on electronics applications relevant to industry, the environment, and society at large. It covers a broad spectrum of application domains, from automotive to space and from health to security, while devoting special attention to the use of embedded devices and sensors for imaging, communication and control. The book is based on the 2020 ApplePies Conference, held online in November 2020, which brought together researchers and stakeholders to consider the most significant current trends in the field of applied electronics and to debate visions for the future. Areas addressed by the conference included information communication technology; biotechnology and biomedical imaging; space; secure, clean and efficient energy; the environment; and smart, green and integrated transport. As electronics technology continues to develop apace, constantly meeting previously unthinkable targets, further attention needs to be directed toward the electronics applications and the development of systems that facilitate human activities. This book, written by industrial and academic professionals, represents a valuable contribution in this endeavor.

Theatermania in Eighteenth-Century Europe Sonia Bellavia, 2023-04-26 The group volume distinguishes itself by its multidisciplinary, comparative approach and by the network of relationships it weaves between the various European languages and cultures. The study takes shape from its different viewpoints and in its diverse contexts, to chart a detailed historical-conceptual map of the basic role theater played in forging the modern European consciousness. The thematic core of 'theatermania' lay in the authentic theatrical passion that manifested itself in different ways from one country to another throughout the 18th century. While the aesthetic, social and political value of theater took a variety of forms, its central feature was the privileged place it gave to collective and individual social revolutions, phenomena that could be defined as upheavals of the collective imagination, which found in theater a source of nourishment, mediation or control. The volume offers not just a series of historical-theatrical studies, but a view of history that foregrounds the passions that were regularly sparked by theater. It adds an essential feature to the profile of the century that redefined the role and importance of theater, and that led to its full re-evaluation in the Romantic age.

El poder secreto Stefania Maurizi,2024-02-20 En la celda de una de las prisiones de máxima seguridad del Reino Unido, un hombre lucha contra algunas de las instituciones más poderosas del planeta, que llevan más de una década queriendo destruirle. No es un delincuente, es un periodista. Se llama Julian Assange y fundó WikiLeaks, que ha cambiado profundamente la manera de informar en el siglo xxi, explotando los recursos de la red y violando sistemáticamente el secreto de Estado cuando se utiliza no para proteger la seguridad de los ciudadanos, sino para ocultar delitos y garantizar la impunidad de los poderosos. En 2008, la periodista Stefania Maurizi comenzó a investigar a una organización aún no muy conocida llamada WikiLeaks. Desde entonces, y en estrecho contacto con Assange, no ha dejado de trabajar para poner al descubierto a ese poder que, oculto tras gruesas capas de secretismo, persigue sin piedad a quienes se empeñan en contar la verdad de las cosas. Este libro, que incluye documentos inéditos, aborda un caso decisivo de nuestro tiempo, la historia de una venganza silenciosa pero feroz en la que está en juego la misma esencia de nuestra libertad.

Modern Architecture and its Representation in Colonial Eritrea Sean Anderson,2016-03-03 Modern Architecture and its Representation in Colonial Eritrea offers a critical assessment of architecture and urbanism constructed in Eritrea during the Italian colonial period spanning from 1890-1941. Drawing together imperial projects, modernist aesthetics, and fascist motives, the book examines how the merger of these three significant influences yielded a complex built environment that served to emulate, if not redefine, Italian colonial pursuits. As Italy's colonia primogenità or 'first born colony', Eritrea and its capital, Asmara, not only bore witness to the emergence of politicized interiors and international expositions, the colony became a vehicle that polarized issues of race and gender. Exploring discourses of modernity in Africa, this book moves between histories of architecture, urbanism, literature and media to describe how Eritrea and Asmara became a crucial fulcrum for Italy's ill-fated pursuits in Ethiopia and other neighboring countries. Consequently, modern architecture inscribed Eritrean subjectivities while redefining technologies that affected constructions of the colonial interior. Modern Architecture and its Representation in Colonial Eritrea demonstrates how architecture in Asmara reshaped the creation and reception of Italian East Africa.
