Préface. Les enjeux de l'éducation préscolaire Annie Charron, Joanne Lehrer, Monica Boudreau, Elisabeth Jacob, 2019-08-10 300 pages, 19,95 \$ (pb). L'éducation préscolaire est une éducation de qualité, accessible à tous les enfants, qui vise à leur faire découvrir le monde et à leur transmettre des valeurs. Elle est une éducation de proximité, qui se fait en lien avec la famille et la communauté. Elle est une éducation de confiance, qui permet à l'enfant de s'exprimer et de développer sa personnalité. Elle est une éducation de respect, qui apprend à l'enfant à respecter les autres et l'environnement. Elle est une éducation de responsabilité, qui apprend à l'enfant à agir pour le bien commun. Elle est une éducation de joie, qui permet à l'enfant de découvrir le plaisir d'apprendre et de vivre. Elle est une éducation de liberté, qui permet à l'enfant de s'exprimer et de développer sa personnalité. L'éducation préscolaire au Québec Annie Charron, Joanne Lehrer, Monica Boudreau, Elisabeth Jacob, 2022-09-01 T00:00:00-04:00 Avec l'arrivée universelle des maternelles 4 ans à temps plein et la parution du nouveau programme-cycle de l'éducation préscolaire, la réalité du contexte d'éducation préscolaire évolue au Québec. Pour répondre aux besoins découlant de cette évolution, il importe de former les futures enseignantes et celles en exercice à cette nouvelle réalité. Dirigé par une équipe de quatre professeures-chercheuses qui sont membres du Collectif de chercheurs.ses et experts.es en éducation préscolaire et en développement de l'enfant, cet ouvrage se veut une référence dans le cadre de la formation initiale et continue à l'éducation préscolaire. Divisé en trois parties, il aborde les fondements théoriques et pratiques; les enfants, leur famille et les communautés; ainsi que les pratiques pédagogiques. Plusieurs exemples et mises en situation permettent d'illustrer les contenus présentés, en plus de soutenir la compréhension du lecteur. Le présent ouvrage entend répondre aux besoins des futures enseignantes et celles en exercice, ainsi qu'à toutes les personnes qui interviennent à l'éducation préscolaire (éducatrices à la petite enfance ou spécialisées, orthopédagogues, orthophonistes, psychoéducatrices, conseillères pédagogiques). Annie Charron, Ph. D., est professeure titulaire en éducation préscolaire au Département de didactique de l'Université du Québec à Montréal. Ses travaux de recherches portent principalement sur les pratiques en émergence de l'écrit et la qualité de l'environnement physique et interactif à l'éducation préscolaire. Joanne Lehrer, Ph. D., est professeure en éducation préscolaire au Département des sciences de l'Éducation de l'Université du Québec en Outaouais. Ses travaux de recherche portent sur les transitions, les relations avec les familles, et la diversité des contextes éducatifs à la petite enfance. Monica Boudreau, Ph. D., est professeure titulaire en éducation préscolaire à l'Unité départementale des sciences de l'éducation de l'Université du Québec à Rimouski (campus de Lévis). Ses recherches se concentrent notamment sur l'émergence de l'écrit, la littératie familiale, les pratiques enseignantes et la littérature jeunesse. Elisabeth Jacob, Ph. D., est professeure en éducation préscolaire au Département des sciences de l'éducation à l'Université du Québec à Chicoutimi. Ses travaux de recherche portent sur le jeu des enfants dans une perspective socioculturelle et les pratiques de sécurisation culturelle pour soutenir les enfants autochtones.

Multiscale Textile Preforms and Structures for Natural Fiber Composites Mohamad Midani, Tamer Hamouda, Ahmed H. Hassanin, Abdel-Fattah M. Seyam, 2023-07-10 Textile reinforcement forms (preforms) play an important role in determining the properties of the final composite and product. The preform formation process provides precise control of the fiber architecture and orientation using a suitable textile manufacturing technique. While the techniques employed for preparing glass and carbon preforms are well-known, there is still a gap in understanding on how to prepare natural preforms for composite reinforcements. Multiscale Textile Preforms and Structures for Natural Fiber Composites will bridge this gap by presenting unified knowledge on the relevant preform preparation techniques and resulting fiber architectures. Emphasis is on the structural parameters of each preform and their effect on the final composite properties. This book assembles information and knowledge on natural fiber reinforcement forms, including conventional forms, such as spun yarn, woven, knitted, nonwoven, braided, and comingled. These are illustrated and classified into one-, two-, and three-dimensional reinforcements. This book also includes information on nonconventional preform formation techniques such as unidirectional tapes, pre-impregnated preforms, spread tows, and tailored fiber placement. Covers all relevant textile processing technology for natural fiber preforms Provides academic researchers with a better understanding of recent practices in preparing textile reinforcements for natural fiber composites Helps practitioners determine how to use natural fiber reinforcements in producing new sustainable and innovative composites

Mastering Geospatial Analysis with Python Silas Toms, Paul Crickard, Eric van Rees, 2018-04-27 Explore GIS processing and learn to work with various tools and libraries in Python. Key Features Analyze and process geospatial data using Python libraries such as; Anaconda, GeoPandas Leverage new ArcGIS API to process geospatial data for the cloud. Explore various Python geospatial web and machine learning frameworks. Book Description Python comes with a host of open source libraries and tools that help you work on professional geoprocessing tasks without investing in expensive tools. This book will introduce Python developers, both new and experienced, to a variety of new code libraries that have been developed to perform geospatial analysis, statistical analysis, and data management. This book will use examples and code snippets that will help explain how Python 3 differs from Python 2, and how these new code libraries can be used to solve age-old problems in geospatial analysis. You will begin by understanding what geoprocessing is and explore the tools and libraries that Python 3 offers. You will then learn to use Python code libraries to read

and write geospatial data. You will then learn to perform geospatial queries within databases and learn PyQGIS to automate analysis within the QGIS mapping suite. Moving forward, you will explore the newly released ArcGIS API for Python and ArcGIS Online to perform geospatial analysis and create ArcGIS Online web maps. Further, you will deep dive into Python Geospatial web frameworks and learn to create a geospatial REST API. What you will learn Manage code libraries and abstract geospatial analysis techniques using Python 3. Explore popular code libraries that perform specific tasks for geospatial analysis. Utilize code libraries for data conversion, data management, web maps, and REST API creation. Learn techniques related to processing geospatial data in the cloud. Leverage features of Python 3 with geospatial databases such as PostGIS, SQL Server, and Spatialite. Who this book is for The audience for this book includes students, developers, and geospatial professionals who need a reference book that covers GIS data management, analysis, and automation techniques with code libraries built in Python 3.

Manuscripts and Ghosts V. J. Scattergood,2006 Before the development of printing in the mid-15th century the written culture of Europe was transmitted through manuscripts. This collection of essays, which concentrates mainly on the late medieval period in England, explores how manuscript books were made, who made them, who owned them, and how they passed from one owner to another. Some deal with how particular manuscripts signify, how their layout and execution generate meaning. Some deal more generally with what manuscripts reveal about the ways in which literary culture was transmitted and about the importance of manuscripts in the interpretation of that culture. The subjects of these essays include, amongst other things, studies of an Anglo- Saxon riddle on the destruction of manuscripts, Chaucer's famous poem on 'Adam' his own scribe, a Lollard Bible owned by a succession of religious dissidents, two manuscripts of the Middle English Brut chronicle, and Trinity College Dublin MS 160, one of the most authoritative collections of early Tudor poetry.

	◦ Minimizing Distractions ◦ Managing Screen Time	specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing MiLibris books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for MiLibris books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents.
