Peer-to-Peer Systems and Applications Ralf Steinmetz,Klaus Wehrle,2005-11-03 Starting with Napster and Gnutella, peer-to-peer systems became an integrated part of the Internet fabric attracting millions of users. According to recent evaluations, peer-to-peer traffic now exceeds Web traffic, once the dominant traffic on the Internet. While the most popular peer-to-peer applications remain file sharing and content distribution, new applications such as Internet telephony are emerging. Within just a few years, the huge popularity of peer-to-peer systems and the explosion of peer-to-peer research have created a large body of knowledge, but this book is the first textbook-like survey to provide an up-to-date and in-depth introduction to the field. This state-of-the-art survey systematically draws together prerequisites from various fields, presents techniques and methodologies in a principled and coherent way, and gives a comprehensive overview on the manifold applications of the peer-to-peer paradigm. Leading researchers contributed their expert knowledge to this book, each in his/her own specific area. Lecturers can choose from the wide range of 32 tightly integrated chapters on all current aspects of P2P systems and applications, and thus individually tailor their class syllabi. R&D professionals active in P2P will appreciate this book as a valuable source of reference and inspiration.

The book explores these new challenges and scope of using computational intelligence in educational technology. The book also addresses how based on the data collected from the outcome of conventional educational system, intelligent diagnostic and feedback system is developed which will change the teaching strategies and corresponding teaching-learning process. The book covers a wider framework of digital pedagogy and its intelligent applications on various sectors of education system.

The Mobile Phone of Jeremy Bone Ken Frodsham,2013-11-26 Jeremy Bone is a retired schoolmaster who lives alone in a large schoolhouse. He dislikes modern technology, so is appalled when he mistakenly receives a mobile phone through the mail. Roger Bennet is a boy of junior school age who has some learning difficulties. Each week he delivers an apple pie to Mr Bone in exchange for an hour's tuition. He activates the phone which has mystical powers and a great adventure begins. During the story's progress an interesting relationship is formed between the pair, as they endeavour to return the mobile phone to its rightful owner. However there are evil forces at work which lead to some exciting and hilarious situations.
