Girls. Translated by Graeme Wilson Su-Jang Kim,

At Home in Renaissance Italy Marta Ajmar,Flora Dennis,2010-09-01 This beautifully illustrated book is the first to look at the role of the urban Italian house in the development of Renaissance art and culture. The Renaissance Home brings together a wide range of objects, from furniture and kitchen utensils to popular prints, jewellery and everyday dress, to reveal how the homes of the upper- and middle-classes made a crucial contribution to the flowering of the visual arts in 15th- and 16th-century Italy. Drawing on a wide array of sources including inventories, account-books, letters, treatises, and archaeological and conservation reports, it offers a completely fresh exploration of the fascinating domestic world of Renaissance Italy.

A gentle, happy story based on a classic fairy tale, *Gingercat* is suitable for a younger audience, early readers, and as a loving bedtime story.

Latin America in the World Antonia Garcia-Rodriguez,Daniel J. Greenberg,2020-04-02 From the Foundations in Global Studies series, this text offers students a fresh, comprehensive, multidisciplinary entry point to Latin America. After a brief introduction to the study of the region, the early chapters of the book survey the essentials of Latin American history; important historical narratives; and the region's languages, religions, and global connections. Students are guided through the material with relevant maps, resource boxes, and text boxes that support and guide further independent exploration of the topics at hand. The second half of the book features interdisciplinary case studies, each of which focuses on a specific country or subregion and a particular issue. Each chapter gives a flavor for the cultural distinctiveness of the particular country yet also draws attention to global linkages. Readers will come away from this book with an understanding of the larger historical, political, and cultural frameworks that shaped Latin America as we know it today, and of current issues that have relevance in Latin America and beyond.

Regenerative Medicine: Laboratory to Clinic Asok Mukhopadhyay,2018-08-22 This book discusses the two different cellular approaches that are pursued in regenerative medicine: cell therapy and tissue engineering. It examines in detail the therapeutic application of hematopoietic stem cells in marrow regeneration, multi-potent mesenchymal stem cells (MSCs), also referred to as mesenchymal stromal cells. The interest in MSCs can be seen in more than 150 clinical trials, some of which have progressed to Phase III, despite the cells' limited differentiation potential. The book also explores how embryonic stem (ES) cells, being pluripotent in nature, can resolve some of the problems associated with adult stem cells, yet entail other challenges like risks of teratoma formation and immune rejection. A separate chapter deals with the role of noncoding RNAs in neuronal commitment of induced pluripotent stem (iPS) cells. Chapters like "Cord blood banking in India and the global scenario"; "3D bioprinting of tissue" and others will make this book an extremely interesting read for all students, researchers and clinicians working in the area of regenerative medicine/stem cells. The book is broadly divided into two parts, the first of which is devoted to basic information on stem cells, and the second of which addresses potential clinical applications in the areas of hematology, cardiology, orthopedic and immune suppression, etc.

Jonesy #1 Sam Humphries,2016-02-10 Jonesy is a self-described cool dork who spends her time making zines nobody reads, watching anime, and listening to riot grrrl bands and 1D simultaneously. But she has a secret nobody knows. She has the power to make people fall in love! Anyone. With anything. She's a cupid in plaid. With a Tumblr. There's only one catch - it doesn't work on herself. She's gonna have to find love the old-fashioned way, and in the meantime, figure out how to distract herself from the real emotions she inevitably has to face when her powers go wrong...
