Digital Hinduism Xenia Zeiler,2019-10-24 Digital Religion does not simply refer to religion as it is carried out online, but more broadly studies how digital media interrelate with religious practice and belief. This collection explores Digital Hinduism and consequentially studies how Hinduism is expressed in the digital sphere and how Hindus utilise digital media. Highlighting digital Hinduism and including case studies with foci on India, Asia and the global Hindu diaspora, this book features contributions from an interdisciplinary and international panel of academics. The chapters focus on specific case studies, which in summary exemplify the wide variety and diversity of what constitutes Digital Hinduism today. Applying methods and research questions from various disciplinary backgrounds appropriate to the study of religion and digital culture, such as Religious Studies, South Asian Studies, Anthropology and Media and Communication Studies, this book is vital reading for any scholar interested in the relationship between religion and the digital world.

AN ENVIRONMENTAL QUALITY INFORMATION SYSTEM USING GEOMATICS Dr. Dendukuri Satish Chandra & Dr. Asadi Siva Sankar ,2020-12-25 1. INTRODUCTION: The term Environment is the most vital for mankind. It is the natural world, which is affected by human activities, as whole or in a particular area geographically. It consists of parameters such as water, soil and air. One Oxygen and two hydrogen atoms combined by covalent bond in each molecule of water. Water is the transparent and no colour material which is main constituent in Earth's surface. Water is one of the essential components for living organisms to live on Earth. Water covers 71% of Earth's surface. Out of which 96.5% of water is saline. only 1.7% of water is groundwater and 1.7% of water is in the form of ice and glaciers.0.001% of water is in the form of vapour and in air. So very less percentage of water is in pure form. It is needed to safegaurd the water from pollution for next generations. The combination of presence of organic matter, minerals, gases, liquids, and organisms which support life on Earth is termed as Soil. The main functionalities of soil on Earth are plant growth, water storage, supply and purification. Finally another parameter left out in this study is air. It is the combination of many gases and dust particles on Earth's atmosphere. It is the mixture about 78% of nitrogen, 21% of oxygen, 0.9% of argon,0.04% of carbon-di-oxide and rest of other gases.

Advances in Applied Mechanical Engineering Hari Kumar Voruganti,K. Kiran Kumar,P. Handbook of the Ryukyuan Languages Patrick Heinrich,Shinsho Miyara,Michinori Shimoji,2015-02-17 The UNESCO atlas on endangered languages recognizes the Ryukyuan languages as constituting languages in their own right. This represents a dramatic shift in the ontology of Japan's linguistic make-up. Ryukyuan linguistics needs to be established as an independent field of study with its own research agenda and objects. This handbook delineates that the UNESCO classification is now well established and adequate. Linguists working on the Ryukyuan languages are well advised to refute the ontological status of the Ryukyuan languages as dialects. The Ryukyuan languages constitute a branch of the Japonic language family, which consists of five unroofed Abstand (language by distance) languages.The Handbook of Ryukyuan Languages provides for the most appropriate and up-to-date answers pertaining to Ryukyuan language structures and use, and the ways in which these languages

relate to Ryukyuan society and history. It comprises 33 chapters, written by the leading experts of Ryukyuan languages. Each chapter delineates the boundaries and the research history of the field it addresses, comprises the most important and representative information.

Sanathana Sarathi English Volume 01 (1958 to 1969) Sri Sathya Sai Media Centre,2022-11-08 Started in 1958, Sanathana Sarathi is a monthly magazine devoted to Sathya (Truth), Dharma (Righteousness), Shanti (Peace) and Prema (Love) – the four cardinal principles of Bhagawan Baba's philosophy. It is published from Prasanthi Nilayam (the Abode of Highest Peace) and acts as a mouthpiece of Baba's Ashram as it speaks of the important events that take place in His sacred Abode, besides carrying Divine Messages conveyed through Divine Discourses of Bhagawan Sri Sathya Sai Baba. The word meaning of Sanathana Sarathi is the 'Eternal Charioteer'. It signifies the presence of the Lord in every being as the atma guiding their lives like a charioteer. It implies that he who places his life, the body being likened to a chariot, in an attitude of surrender in the hands of the Lord, will be taken care of by the Lord even as a charioteer would take the occupant of his chariot safely to its destination. The magazine is an instrument to disseminate spiritual knowledge for the moral, physical and mental uplift of humanity without any discrimination as the subject matter discussed therein is always of common interest and of universal appeal. The fifteen Vahinis – streams of sacredness – known as the Vahini Series comprising annotation and interpretation of the Upanishads and other scriptures, Itihasas like the Ramayana, the Bhagavatha and the Mahabharata, and authentic explanations on Dhyana, Dharma, Prema, etc., have been serially published in this magazine as and when they emanated from the Divine pen of Bhagawan Baba. This magazine is published in almost all Indian languages, English and Telugu from Prasanthi Nilayam and others from respective regions. Every year Sanathana Sarathi comes out with a special issue in November commemorating the Divine Birthday. The English and Telugu magazines are posted on the 10th and 23rd respectively, of every month, from Prasanthi Nilayam. This magazine has wide, ever increasing circulation in India as well as abroad, as the study of it brings the reader closer to the philosophy of the Avatar in simple understandable language THUS SPAKE SAI... Discursing during the launch of Sanathana Sarathi... From this day, our Sanathana Sarathi will lead to victory the cohorts of truth – the Vedas, the Sastras and similar scriptures of all faiths, against the forces of the ego such as injustice, falsehood, immorality and cruelty. This is the reason why it has emerged. This Sarathi will fight in order to establish world prosperity. It is bound to sound the paeon of triumph when universal Ananda is achieved.

Environmental Geotechnology: Meeting Challenges Through Needs-based Instrumentation Devendra Narain Singh,Afshin Asadi,Venkata Siva Naga Sai Goli,2022-01-21 The rise of rapid and uncontrolled industrialization, its alarming levels of hazardous waste produced, and their negative contribution to the international environmental epidemic of global warming – in addition to the decrease in room to dispose of these wastes safely – have put the pressure for many engineers, researchers, and key decision-makers to find the answers to the constant tussle between progress and sustainability – and quickly.Environmental Geotechnology revisits existing concepts of geotechnical engineering critically, and brings them up to date with new knowledge and current affairs so as to better address and serve today's needs of the professionals. It points out the role and importance of the parameters and mechanisms that govern the interaction of contaminants with geomaterials (soil and rock mass), and also discusses their degradation in the long-run, and the consequences that follow.The book starts from a engineering philosophy that incorporates the influence of environmental effects (both manmade and natural) on geotechnical engineering practices. Its contents are based on geotechnical and environmental engineering studies pertaining to waste management, such as: the safe handling, transportation and disposal of waste, the estimation of waste leakage into the subsurface, its consequences, methods of containment, and the development of schemes to remediate contaminated land. It also proposes innovative strategies for waste management through the utilization of wastes based on a comprehensive characterization.Modelling techniques such as accelerated physical modelling using geotechnical centrifuge, finite-element or difference-based numerical modelling and physico-chemico-mineralogical modelling are discussed in this book to enable the study of the complex (and otherwise slow) process of contaminant-geomaterial interaction.Related Link(s)

Sathyam Sivam Sundaram N. Kasturi,2014-04-16 Prof. N. Kasturi, who had the extreme fortune of being close to Bhagawan Baba, has brought out in this volume the life story of the Divine Avatar from His birth in 1926 to 1961. For those, who are unaware of Baba's might, this book will reveal His mahimas and leelas.
